SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTES ON PRICES AND PRICE INDEX NUMBERS

Industry Selling Price Index: Manufacturing (1961 = 100)

The industry selling price index (Total Manufacturing) rose 1.3% in January 1975 to 185.0 from the December 1974 index of 182.7. It was 17.5% higher than the January 1974 index of 157.4.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes were increases recorded in the paper and allied industries group (6.8%) with advances in the pulp and paper mills industry (8.5%). Upward movement in the cement manufacturers industry (15.1%), ready-mix concrete manufacturers (5.8%) and concrete products manufacturers (3.3%) moved the non-metallic minerals group higher. Notable increases to a lesser degree were registered in chemical and chemical products group (1.8%) and primary metals group (0.9%).

Decreases were evident in the foods and beverages group (0.4%) and in the textile industries group (0.5%).

NOTES SUR LES PRIX ET LES INDICES DE PRIX

Indice des prix de vente dans l'industrie: Fabrication (1961 = 100)

L'indice des prix de vente dans l'industrie (ensemble du secteur de la fabrication) a augmenté de 1.3%, passant de 182.7 en décembre 1974 à 185.0 en janvier 1975. Il a progressé de 17.5% par rapport à l'indice de janvier 1974 (157.4).

Si l'on compare les facteurs de variation de l'indice total, les changements les plus appréciables ont été les augmentations observées dans le groupe de l'industrie du papier et activités annexes (6.8%), en raison des progressions notées dans le cas des usines de pâte et papier (8.5%). En ce qui concerne la progression du groupe des produits minéraux non métalliques, elle est imputable aux augmentations chez les fabricants de ciment (15.1%), les fabricants de béton préparé (5.8%) et les fabricants de produits en béton (3.3%). Des augmentations tout aussi appréciables, mais dans une moindre mesure, ont été enregistrées dans le cas de l'industrie chimique (1.8%) et du groupe de la première transformation des métaux (0.9%).

On a observé des baisses dans le groupe des industries des aliments et boissons (-0.4%) ainsi que dans celui de l'industrie textile (-0.5%).

These indexes are preliminary. - Ces indices sont provisoires.

General Wholesale Index (1935-39=100)

The general wholesale index rose 0.6% to 484.7 from the revised December index of 482.0. It was 12.9% higher than a year earlier. Five of the eight major groups increased while three decreased.

The wood products group index showed an increase of 6.3% to 605.2 from the revised December index of 569.6. This was due principally to price increases in newsprint and wrapping paper 12.1% and wood pulp 8.5%. The non-metallic minerals group index increased 4.4% to 369.7 from the December index of 354.0, due to increases in coke 30.5%, cement 14.2% and salt 12.5%. The iron products group index rose 2.8% with an index of 487.2 in January from the revised December index of 473.9 mainly as a result of increases in wire and in rolling mill products. The chemical products index rose 1.1% where a 33.7% increase in dyeing material occurred. Textile products increased 0.8%. The vegetable group index decreased 4.1% to 517.4 from the revised December index of 539.6 reflecting price declines for onions, sugar and its products and potatoes. The animal products index decreased by 1.0% to 503.2 from the revised index of 508.4 in December. The non-ferrous metals group index declined 0.6%.

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros a augmenté de 0.6%, passant de 482.0 en décembre (indice rectifié) à 484.7 en janvier. Il a augmenté de 12.9% en un an. Cinq des huit principaux groupes ont progressé, alors que trois autres ont baissé.

L'indice du groupe des produits du bois a augmenté de 6.3%, passant de 569.6 en décembre (indice rectifié) à 605.2 en janvier. Cette augmentation est attribuable en grande partie à la hausse du prix du papier journal et du papier d'emballage (12.1%), et de la pâte de bois (8.5%). L'indice du groupe des minéraux non métalliques est passé de 354.0 à 369.7, soit une augmentation de 4.4%, en raison de la hausse du coke (30.5%), du ciment (14.2%) et du sel (12.5%). L'indice du groupe des produits du fer a augmenté de 2.8% pour s'établir à 487.2 en janvier comparativement à 473.9 en décembre (indice rectifié); cette augmentation est due principalement à la hausse du prix du fil métallique et des produits du laminage des métaux. L'indice des produits chimiques a augmenté de 1.1% en raison d'une hausse de 33.7% du prix des produits de teinture. S'agissant des produits textiles, la progression est de 0.8%. L'indice du groupe des produits d'origine végétale a diminué de 4.1%, passant de 539.6 en décembre (indice rectifié) à 517.4 en janvier en raison de la réduction du prix des oignons, du sucre et de ses dérivés et des pommes de terre. L'indice des produits d'origine animale a baissé de 1.0% soit de 508.4 en décembre (indice rectifié) à 503.2 en janvier. L'indice du groupe des métaux non ferreux a diminué de 0.6%.

* These indexes are preliminary. — Ces indices sont provisoires.

Security Price Indexes (1961=100)

The investors index of common stocks rose 11.0% to 144.7 in January from 127.3 in December, with all three major groups registering increases. Industrials gained 11.4% to 144.7, utilities increased 10.0% to 121.9 and finance 10.2% to 153.6. Within the thirteen industrial sub-groups, petroleum increased 17.0 to 204.2 followed by metal fabricating which increased 14.9% to 151.5. Pulp and paper gained the least 3.2% to 109.0. In utilities increases were registered for all sub-groups. Pipelines recorded the greatest increase 15.3% to 158.8 while telephone showed the least gain 3.2% to 90.9. The increase in the finance group is the result of increases in banks and investment and loan of 11.1% and 7.8% to 180.0 and 113.0 respectively.

During the same period, the index of mining stocks increased 1.5% to 109.5. A decline in golds of 3.8% to 180.5 offset an increase in base metals of 9.7% to 71.5.

As for the two supplementary indexes, there was a 0% increase in uraniums to 216.6 and a gain of 18.4% in primary oil and gas to 246.3.

The preferred stock index registered an increase of 9.6 to 53.1 in December to 58.2 in January.

Canadian Farm Products Index (1935-39=100)

The price index of Canadian farm products at terminal markets declined 1.9% to 479.8 in January from the revised December index of 489.0. The animal products index increased 2.1% to 561.1 from 572.9, reflecting lower prices for both markets for steers, eggs and hogs, and for calves in the East, and for raw wool in the West. Price increases were shown for lambs on both markets, while the prices for butterfat and cheesemilk rose in the East, and for calves and milk in the West.

The field products index declined 1.6% to 398.5 from the revised December index of 405.0. These figures include final Wheat Board payments for the 1973-74 crop year, estimates of the final payments for 74-75. Lower prices were shown for potatoes, oats and corn in the East, and for wheat, rye and hay in the West. Price increases occurred for wheat and tobacco in the East, and for potatoes in the West.

Thirty Industrial Materials Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, declined 1.2% to 499.3 in January from the revised December index of 505.2. Prices were higher for six commodities, lower for ten and

Indices des cours des valeurs mobilières (1961=100)

L'indice des cours de placements des actions ordinaires a augmenté de 11.0% pour s'établir à 141.3 en janvier comparativement à 127.3 en décembre; les trois grands groupes ont enregistré des progressions de 11.4% pour les valeurs industrielles, à 144.7, de 10.0% pour les finances à (153.6). Parmi les treize sous-groupes industriels, le pétrole a augmenté de 17.0% pour s'établir à 204.2, suivi du groupe de la fabrication des métaux avec 151.5, soit une hausse de 14.9%. Ce sont les pâtes et papiers qui ont le moins progressé, soit de 2.4% pour s'inscrire à 109.0. Dans le secteur des services publics, on a enregistré des hausses pour tous les sous-groupes. Ce sont les pipe-lines qui ont le plus progressé, soit de 15.3% pour s'inscrire à 106.8 alors que le téléphone enregistrerait la hausse la moins élevée (3.2%) à 90.9. L'augmentation de l'indice des finances est attribuable aux hausses des banques et des placements et prêts qui à 180.0 (-11.1%) et à 113.0 (-7.8%) respectivement.

Au cours de la même période, l'indice des cours des titres miniers a augmenté de 1.5% pour s'inscrire à 109.5. Une baisse de 3.8% à 180.5 des aurifères a contrebalancé une augmentation de 9.7% à 71.5 des métaux communs.

En ce qui a trait aux deux indices supplémentaires, l'uranium a augmenté de 14.0%, à 216.6, et le pétrole et le gaz primaires de 18.4%, à 246.3.

L'indice des actions privilégiées est passé de 53.1 en décembre à 58.2 en janvier, soit une augmentation de 9.6%.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a baissé de 1.9% pour s'établir à 479.8 en janvier comparativement à 489.0 (indice rectifié) en décembre. L'indice des produits d'origine animal est passé de 572.9 à 561.1, soit une diminution de 2.1% en raison de la baisse du prix des bouvillons, des oeufs et des porcs sur les deux marchés, de celui des veaux dans l'Est et de la laine brute dans l'Ouest. On a enregistré une hausse du prix des moutons sur les deux marchés; dans l'Est, le prix du gras de beurre et du lait de fromagerie a augmenté, et, dans l'Ouest, celui des veaux et du lait nature.

L'indice des prix des produits de grande culture est passé de 405.0 (indice rectifié) en décembre à 398.5 janvier, soit une baisse de 1.6%. Ces chiffres prennent en compte les paiements finals de la Commission canadienne du blé pour la campagne agricole 1973-74 et les estimations des paiements finals pour 1974-75. On a observé une baisse du prix des pommes de terre de l'avoine et du maïs dans l'Est, et du lin, du seigle et du foin dans l'Ouest. Il y a eu hausse du prix du foin, du blé et du tabac dans l'Est, et du prix des pommes de terre dans l'Ouest.

Indice des prix de trente matières industrielles (1935-39=100)

L'indice des prix de trente matières industrielles, calculé comme moyenne géométrique non pondérée, a baissé de 1.2% pour s'établir à 499.3 en janvier comparativement à 505.2 (indice rectifié) en décembre. On a observé des hausses de prix dans le cas

unchanged for fourteen. The most notable decreases were raw sugar, raw wool, linseed oil, domestic copper and domestic wheat, followed by steers in Toronto, spruce lumber, hogs, raw cotton, and raw rubber. Principal increases included steel bars, iron ore, tin, bleached sulphite pulp and oats.

The Consumer Price Index

The Consumer Price Index for Canada (1961 = 100) rose 0.5% to 176.6 in January from 175.8 in December, to register its smallest month-to-month movement since October 1973. Between January 1974 and January 1975 the CPI advanced 12.1%, with more than one-third of the 12-month rise contributed by increased food prices and a further one-quarter by advances in the housing component.

In the latest month, lower retail prices for sugar, beef and poultry largely offset higher prices for fresh milk, eggs and cereal and bakery products, thereby limiting the rise in the Food index to 0.3%. Two-thirds of this increase is attributable to higher prices for food consumed outside the home which, on average, rose by 1.3%.

The index for All-Items other than Food moved up 0.6%, mainly due to higher electricity and gas rates, increased prices of alcoholic beverages following recent government tax and price adjustments, advances in rail fares and increases in prices for automobiles from outside North America. The effect of these price rises was partially offset by lower clothing prices which moved down slightly as is normally the case between December and January, and by a decline in the homeownership index because of price reductions for building materials.

The Consumer Price Index reclassified by goods and services offers another view of the incidence of price change. Between December and January, the total goods index moved up 0.4% while the index for services advanced 0.5%.

On a seasonally adjusted basis the December to January rise in the All-Items Consumer Price Index was 0.5%, less than half the rate of increase of the preceding three months. The Food index, seasonally adjusted, edged up by only 0.1%, while All-Items excluding Food moved up by 0.6%.

de six marchandises, des diminutions pour dix et aucun changement pour quatorze. Le sucre brut, la laine brute, l'huile de lin, le cuivre et le blé canadiens ont enregistré les diminutions les plus sensibles suivies des bouvillons à Toronto, des sciages d'épinette, des porcs, du coton brut et du caoutchouc brut. Les plus fortes augmentations portent sur les barres d'acier, le minerai de fer, l'étain, la pulpe au sulfite blanchie et l'avoine.

L'indice des prix à la consommation

L'indice des prix à la consommation au Canada (1961 = 100) a augmenté de 0.5% pour passer de 175.8 en décembre 1974 à 176.6 en janvier 1975, soit la plus faible hausse mensuelle depuis octobre 1973. Entre janvier 1974 et janvier 1975, l'I.P.C. a augmenté de 12.1%; plus d'un tiers de cette hausse annuelle était dû aux augmentations enregistrées pour les prix des aliments et un quart était attribuable aux augmentations enregistrées pour l'indice de l'habitation.

Au cours du mois dernier, les diminutions de prix observées pour le sucre, le boeuf et la volaille ont largement compensé les hausses du prix du lait, des oeufs et des produits céréaliers et de boulangerie, ce qui a limité la hausse de l'indice des aliments à 0.3%. Deux tiers de cette hausse étaient attribuables à l'augmentation des coûts des repas pris au restaurant qui ont, en moyenne, augmenté de 1.3%.

L'indice d'ensemble, à l'exception des aliments, a augmenté de 0.6%, par suite, surtout, de la hausse des tarifs de l'électricité et du gaz domestique, des prix des boissons alcooliques (par suite des récents ajustements de prix et de taxe effectués par le gouvernement), des tarifs ferroviaires et des prix des automobiles fabriquées à l'extérieur de l'Amérique du Nord. Ces augmentations ont été partiellement compensées par une légère baisse des prix des vêtements qui est un fait d'observation normal entre décembre et janvier, et par la baisse de l'indice de la propriété à la suite des réductions de prix enregistrées pour les matériaux de construction.

L'indice des prix à la consommation, reclassé en fonction des biens et services, présente une autre image des conséquences des variations de prix. Entre décembre et janvier, l'indice d'ensemble des biens a augmenté de 0.4% tandis que l'indice des services a connu une hausse de 0.5%.

L'indice global des prix à la consommation désaisonnalisé, a augmenté de 0.5% entre décembre et janvier, soit moins de la moitié du taux d'augmentation enregistré les trois mois précédents. L'indice des aliments, désaisonnalisé, n'a augmenté que de 0.1%, tandis que l'indice d'ensemble, à l'exception des aliments, a augmenté de 0.6%.

Construction - Construction	119.8	107.4	157.3	143.9	11.5	9.3	- 23.9
Retail trade - Commerce de détail	136.3	119.0	132.6	133.6	14.3	- 0.8	2.5
Utilities - Total - Services publics	121.9	110.8	135.1	128.7	10.0	5.0	- 9.8
Pipeline - Pipe-line	106.8	92.6	138.9	130.4	15.3	6.5	- 23.1
Transportation - Transport	284.3	255.8	308.9	288.0	11.1	7.2	- 8.0
Telephone - Téléphone	90.9	88.1	82.1	81.3	3.2	1.0	10.8
Electric power - Énergie électrique	78.2	67.9	99.3	97.9	15.2	1.5	- 21.3
Gas distribution - Distribution du gaz	140.2	126.3	162.4	148.4	11.0	9.5	- 13.7
Finance - Total - Finances	153.6	139.4	176.9	173.1	10.2	2.2	- 13.2
Banks - Banques	180.0	162.0	210.8	205.0	11.0	2.8	- 14.6
Investment and loan - Placements et prêts	113.0	104.8	123.1	123.1	7.8	0.1	- 8.2
Mining - Actions minières:							
Mining index - Total - Indices des prix des titres minières	109.5	107.9	161.5	135.7	1.5	19.0	- 32.2
Gold - Or	180.5	187.7	258.6	196.9	- 3.8	31.3	- 30.2
Base metals - Métaux communs	71.5	65.2	109.7	103.4	9.7	6.1	- 34.8
Supplementary indexes - Indices supplémentaires:							
Uranium - L'uranium	216.6	190.0	307.3	285.3	14.0	7.7	- 29.5
Primary oils and gas - Pétrole et gaz primaires	246.3	208.0	492.4	460.8	18.4	6.9	- 50.5

(1) Gross weighted, including inter-industry shipments. For explanation see page 88. - Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication, voir page 88.

(2) Indexes for 1973, 1974 and 1975 are subject to revision. - Les indices pour 1973, 1974 et 1975 sont sujets à révision.

(3) Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1974 are subject to revision. See notes page 89 for details of Western grain prices. - La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1974 sont sujets à révision. Voir les renvois de la page 89 pour les prix détaillés des grains de l'Ouest.

TABLE 2. Industry Selling Price Indexes by Industry and Selected Commodities
TABLEAU 2. Indice des prix de vente dans l'industrie par industrie et par certains produits

Industries and selected commodities(1)		1961 = 100												Annual

TABLEAU 2. Indice des prix de vente dans l'industrie par industrie et par certains produits

Industries and selected commodities(1) Industrie et certains produits(1)	1961 = 100 Month - Mois												Annual Annuel
	J	F	M	A	M	J	J	A	S	O	N	D	
Manufacturers of soaps and cleaning compounds - Fabri- cants de savons et de composés de nettoyage.	1971 109.4	108.2	110.8	110.1	108.7	109.2	109.8	108.5	110.4	111.3	109.6	112.5	109.9
	1972 111.7	109.7	111.5	110.9	108.9	111.0	112.9	111.8	112.7	111.5	112.0	113.7	111.5
	1973 112.1	112.7	115.4	117.0	117.6	117.9	119.5	123.4	122.8	123.4	125.5	127.6	119.5
	1974 128.7	131.8	137.1	137.5	139.3	144.9	148.5	150.2	152.4	153.2	156.6	158.1	
19 3760	1975 156.9												
Toilet soap (excl. liquid) less than 2 lb. - Savon de toilette (sauf liquide) pain de moins de 2 livres.	1971 115.4	115.5	116.9	123.7	116.3	112.0	119.1	117.8	115.7	116.5	118.2	125.5	117.7
	1972 120.6	116.6	116.1	118.0	107.3	113.8	122.6	113.5	120.4	122.8	121.8	121.2	117.9
	1973 113.0	113.2	116.2	119.0	116.4	127.4	117.1	128.2	134.2	145.0	150.5	152.3	127.7
	1974 149.7	147.4	165.3	152.4	176.7	177.6	180.8	189.0	176.8	183.0	185.6	191.4	
19 3760 005	1975 176.9												
Javelle water - Eau de javel	1971 103.0	97.3	103.0	103.0	103.0	103.0	103.0	103.0	103.0	100.2	100.2	95.2	101.4
	1972 100.2	100.2	100.2	100.2	100.2	100.2	100.2	103.8	103.8	103.8	103.8	105.5	101.8
	1973 105.5	105.5	105.5	109.7	109.7	109.7	109.7	109.7	109.2	109.2	109.2	116.6	109.1
	1974 116.6	120.9	120.9	120.9	120.9	120.9	120.9	123.8	123.8	124.2	124.2	127.7	
19 3760 026	1975 133.7												
Glycerine (refined) B.P. and A.S.P. grade - Glycérine (rafinée) Pharmacopée britannique et américaine No	1971 85.4	83.7	83.7	83.7	83.7	83.7	86.4	87.6	88.0	87.0	88.0	87.4	85.7
	1972 87.8	88.3	87.9	86.6	87.8	88.1	88.3	88.3	88.3	88.3	87.7	88.3	88.0
	1973 88.3	88.3	88.3	88.3	92.1	92.1	92.1	92.1	91.6	92.1	91.6	96.7	91.1
	1974 104.1	115.1	119.0	119.0	114.6	136.4	181.5	181.5	177.3	178.4	180.8	180.8	
19 3760 042	1975 185.8												
Dentifrice paste - Pâte dentifrice	1971 127.3	126.5	121.7	121.5	122.7	115.9	124.9	120.7	124.2	124.1	130.5	129.5	124.1
	1972 124.2	131.3	127.5	123.2	130.5	130.3	128.1	131.8	128.6	118.6	124.2	132.2	127.5
	1973 121.5	132.4	130.9	131.1	132.2	122.7	129.8	126.5	132.7	128.3	134.4	134.6	129.8
	1974 138.7	123.0	131.1	133.4	128.3	139.1	139.1	138.5	141.5	141.5	140.5	143.6	
19 3760 047	1975 148.0												
Synthetic organic detergent liquid (and paste) - Détergent organique synthétique, liquide (et pâte)	1971 80.3	80.8	87.6	85.9	92.6	88.9	81.3	83.4	92.6	93.1	84.4	92.2	86.9
	1972 85.5	85.4	88.0	87.9	88.7	85.1	93.4	89.3	88.1	82.8	82.2	86.9	86.5
	1973 90.0	81.9	88.8	89.6	90.3	89.9	82.4	90.1	87.4	78.7	86.9	87.5	87.0
	1974 88.0	97.3	96.9	91.4	90.3	92.5	98.5	104.9	99.5	96.4	98.9	112.0	
19 3760 064	1975 113.1												
Synthetic organic detergent solid (incl. bar-flake or powder) - Détergent organique synthétique, solide (y compris en barre, en flocons ou en poudre).	1971 108.0	105.4	109.1	106.5	103.2	108.8	108.9	104.8	107.8	109.7	106.0	111.0	107.4
	1972 110.2	106.4	109.4	110.0	107.3	108.8	108.4	110.4	112.5	111.7	112.4	113.3	110.1
	1973 113.5	114.6	119.7	120.2	120.9	118.4	123.3	120.6	118.5	121.0	122.5	123.4	119.7
	1974 124.2	123.6	126.9	129.2	126.8	140.5	139.0	136.1	142.0	142.2	143.9	148.7	
19 3760 065	1975 146.5												
Manufacturers of industrial chemicals - Fabricants de produits chimiques industriels.	1971 94.9	95.4	95.3	94.7	94.9	95.3	95.7	95.5	95.4	96.1	96.0	96.0	95.4
	1972 96.1	96.6	96.8	98.2	98.2	98.0	97.8	97.7	97.7	98.0	98.1	98.8	97.7
	1973 99.3	99.8	100.3	100.8	101.2	101.1	102.5	103.0	104.5	107.0	108.5	113.7	103.5
	1974 120.1	124.5	126.8	129.3	134.6	140.0	144.7	149.3	157.1	162.7	164.5	166.3	
19 3780	1975 170.0												
Acid, sulphuric and grades - Acide sulfurique, toutes qualités.	1971 130.5	130.5	130.5	119.5	119.5	119.5	119.5	119.5	119.5	119.5	119.5	119.5	122.2
	1972 119.6	119.6	119.6	119.6	119.6	119.6	119.6	119.6	119.6	119.6	119.6	119.6	119.6

	1974 120.9	120.9	120.9	120.9	120.9	120.9	120.9	120.9	128.6	132.5	132.5	132.5	
19 3780 016	1975 136.3												
Chlorine - Chlore	1971 97.6	98.1	99.3	99.3	99.2	99.2	99.2	99.3	99.2	99.2	99.2	99.2	99.0
	1972 99.3	99.7	99.6	99.7	99.5	101.2	101.2	101.3	101.4	101.4	101.4	101.3	100.6
	1973 101.5	101.0	100.9	102.3	102.1	103.5	103.3	103.2	103.2	103.1	103.0	104.4	102.6
	1974 106.8	106.8	108.2	108.2	108.2	108.2	113.3	113.5	113.5	121.2	121.2	121.7	
19 3780 039	1975 131.4												
Sodium hydroxide (caustic soda) - Hydrate de soude (soude caustique).	1971 118.5	120.9	122.4	124.4	124.3	124.4	124.4	124.4	124.4	124.3	124.3	124.3	123.4
	1972 124.6	128.3	129.8	132.2	132.2	132.3	132.4	132.5	132.1	132.1	132.2	132.2	131.1
	1973 132.4	132.6	133.2	134.3	133.6	135.0	136.2	138.0	137.8	137.8	137.8	139.7	135.7
	1974 140.7	140.7	141.9	143.0	143.1	145.1	152.0	152.2	157.3	167.2	167.2	167.3	
19 3780 084	1975 196.4												
Acetylene - Acétylène	1971 103.1	104.3	103.3	109.3	111.1	112.2	111.6	112.7	111.8	111.2	111.4	111.1	109.4
	1972 111.2	111.3	111.5	111.4	111.5	111.5	111.5	111.5	111.5	111.5	111.5	111.5	111.5
	1973 111.3	112.1	112.3	112.5	112.6	112.6	112.8	112.9	113.0	112.9	113.0	113.0	112.6
	1974 120.1	120.0	119.9	119.9	119.8	119.7	124.9	125.4	122.0	126.3	126.6	126.8	
19 3780 109	1975 126.8												
Oxygen, gas in cylinder - Oxygène, gaz sous pression	1971 107.3	108.0	107.3	114.9	116.7	118.5	117.6	118.5	118.2	117.6	117.6	117.3	115.0
	1972 117.6	117.6	117.6	118.2	118.2	117.9	117.9	117.9	117.9	117.9	117.9	117.9	117.9
	1973 120.5	121.4	121.4	121.7	121.9	122.1	122.2	122.2	122.3	122.3	122.5	122.5	121.9
	1974 130.4	130.1	130.2	130.2	130.2	130.3	134.2	136.1	136.4	134.9	135.3	135.4	
19 3780 115	1975 135.4												
Ammonium nitrate, fertilizer grade - Nitrate d'ammoniaque, pour engrais.	1971 104.8	107.7	108.9	110.9	112.0	112.3	113.3	112.2	110.1	110.2	109.6	110.7	110.2
	1972 111.0	111.9	115.1	118.2	118.3	119.5	115.2	110.8	112.1	113.2	114.0	115.8	114.6
	1973 119.0	121.6	123.4	123.9	124.1	124.3	124.6	125.9	127.9	128.8	132.3	146.8	126.9
	1974 148.1	160.2	162.9	163.5	163.5	163.5	186.6	202.6	205.3	210.0	210.4	216.4	
19 3780 123	1975 219.4												
Manufacturers of printing inks - Fabricants d'encre d'imprimerie.	1971 110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1
	1972 110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1	110.1
	1973 110.1	110.1	110.1	110.1	110.1	110.1	112.2	114.2	114.9	114.9	119.0	119.0	112.9
	1974 118.9	118.9	118.9	128.8	128.8	136.9	136.9	136.9	136.9	136.9	136.9	136.9	
19 3791	1975 136.9

TABLE 2. Industry Selling Price Indexes by Industry and Selected Commodities

TABLÉAU 2. Indice des prix de vente dans l'industrie par industrie et par certains produits

1961 = 100

Industries and selected commodities(1) Industrie et certains produits(1)	Month — Mois												Annual Annuel
	J	F	M	A	M	J	J	A	S	O	N	D	Annuel
	1971												
	1972												
	1973												
	1974												
Industry selling price index manufacturing(7) — Indice de prix de vente dans l'industrie: industries manufactu- rières(7)	1971 119.4	119.8	120.3	121.2	121.2	121.7	122.3	122.4	122.5	122.6	122.7	123.2	121.6
	1972 124.5	125.3	125.9	126.5	126.7	126.9	127.4	127.8	128.5	129.0	129.7	130.9	127.4
	1973 133.1	134.6	136.6	138.2	139.5	141.0	143.0	147.9	147.7	149.0	150.4	152.9	142.7
	1974 157.4	159.3	162.2	165.5	167.9	169.9	173.1	175.9	178.0	179.7	182.6	182.7	
	1975 185.0												

(1) Indexes for 1973, 1974 and 1975 are subject to revision. — Les indices pour 1973, 1974 et 1975 sont sujets à révision.

(2) This industry was changed in commodity content, price sample and weights in accordance with significant changes within the industry. Figures are revised from January 1971 to date. — La composition en marchandises, les échantillons de prix et les mesures de poids ont changé dans cette industrie conformément à des changements importants survenus dans l'industrie même. Les chiffres sont révisés de janvier 1971 à aujourd'hui.

(3) Effective January 1973 changes have been made in the calculation of this index. For details see page 88. — A compter de janvier 1973, on a modifié le calcul de cet indice. Pour plus de détails, voir la page 88.

(4) An extensive revision of the weight and price sample (including the incorporation of goods purchased and resold in same condition as purchased) necessitated by developments in the industry's production pattern since 1961 have resulted in the introduction of new price indexes and a discontinuity in the industry price index. — Une révision approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix industriels.

	Old series — Ancienne série	New series — Nouvelle série
December — 1970 — Décembre	95.1	92.3
January — 1971 — Janvier	95.1	92.1
Average — 1971 — Moyenne	95.2	91.8

(5) This series has been revised from January 1969 forward. An expanded list of establishments and commodities has been selected and prices for these have been aggregated to a total industry index using 1971 shipments data. The price quotations are, in general, of an improved quality. Selected commodity data on a 1971 time and weight base, are available on request. — Les chiffres de cette série ont été révisés à partir de janvier 1969. Une liste augmentée des établissements et des produits a été établie, et les prix de ces produits ont été agrégés pour former un indice total de l'activité économique à partir des données sur les livraisons de 1971. De manière générale, le calcul des prix est plus fiable. Les utilisateurs peuvent obtenir sur demande des données sur certain produits utilisant les facteurs de pondération de 1971 et dont la période de référence est 1971.

(6) Motor gasoline prices are 'List' and may not be a reflection of actual transaction prices. — Les prix de l'essence sont des prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction.

(7) Gross weighted, including inter-industry shipments. For explanation see page 88. — Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 88.

All-items Consumer Price Index converted to 1949=100, January 1975 - L'indice des prix à la consommation de tous les éléments converti à 1949=100, janvier 1975 228.2

(1) Indexes prior to May 1973 incorporate 1957 expenditure weights, those for May 1973 forward are based on 1967 expenditures. The revised series is linked to its predecessor at April 1973. For further explanation, see page 92. - Avant mai 1973 les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957; à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 92.

TABLE 9. Consumer Price Indexes for Canada - Main Groups and Selected Components and Items(1)

TABLEAU 9. Indices des prix à la consommation, Canada - Groupes principaux, éléments et articles choisis(1)

1961=100

	Jan. 1975 Janv.	Dec. 1974	Jan. 1974 Janv.	Dec. 1973	1974	1973	1972
All-items - Indice d'ensemble	176.6	175.8	157.6	156.4	166.8	150.4	139.8
Food - Aliments	202.3	201.6	174.0	172.1	188.4	162.0	141.4
Food for home consumption - Aliments consommés à la maison	195.5	195.3	168.8	166.9	182.8	157.9	137.5

Shortening - Graisse végétale	212.8	211.7	148.2	143.1	183.5	129.2	121.8
Salad/cooking oil(2) - Huile à frire ou de table(2)	183.0	182.2	112.5	110.9	149.1
Salad dressing - Vinaigrette	178.7	175.5	123.1	123.2	147.3	114.2	109.9
Meat, poultry and fish - Viande, volaille et poisson	198.9	201.0	198.8	198.9	198.9	182.6	147.7
Meat - Viande	195.6	197.1	195.5	195.6	194.2	181.3	147.5
Beef - Boeuf	205.4	209.0	205.7	204.2	210.0	190.4	157.6
Sirloin steak - Bifteck de surlonge ..	214.8	214.4	185.2	180.4	203.5	176.1	152.4
Round steak - Bifteck dans la ronde ..	226.6	229.9	208.9	207.6	219.0	195.2	160.4
Prime rib roast - Rôti de côtes de choix	216.8	215.4	188.5	186.6	205.4	181.6	154.3
Blade roast - Rôti de palette	199.7	196.3	194.9	198.4	197.4	182.0	148.9
Stewing beef - Boeuf pour ragoût	214.0	212.6	202.9	204.5	210.2	186.3	157.3
Hamburg - Boeuf haché	181.1	196.1	246.6	245.9	225.0	217.8	170.4
Liver - Foie	192.8	187.5	186.9	188.1	193.1	168.6	134.8
Pork - Porc	184.3	182.7	179.1	181.3	171.0	168.4	132.4
Bacon(3) - Bacon(3)	184.6	180.2	166.8	172.4	159.5	153.2	115.8
Smoked ham - Jambon fumé	176.4	176.2	175.3	178.7	162.0	158.8	125.7
Cottage Roll - Roulé de haut d'épaule	196.9	194.6	189.4	189.8	180.7	176.9	135.0
Loin cuts - Coupes de longe	194.2	193.5	184.6	185.1	186.2	187.5	153.0
Shoulder cuts - Coupes d'épaule	166.0	165.9	188.6	190.8	158.1	173.8	128.0
Sausages - Saucisses	180.7	179.2	191.6	187.3	181.8	166.4	130.9
Other meat - Autres viandes	187.0	187.9	196.4	197.8	190.6	178.8	146.6
Wieners - Saucisses de Francfort	165.2	166.4	176.3	178.2	168.2	160.1	127.8
Veal - Veau	240.3	239.9	242.6	243.0	245.5	225.5	189.9
Canned meat - Viandes en conserve	181.1	182.0	189.2	187.5	184.4	151.5	123.3
Poultry - Volaille	177.9	183.6	181.2	182.5	186.4	164.3	124.6
Chicken - Poulet	186.0	189.4	180.4	180.2	191.4	169.1	128.9
Turkey - Dinde	144.7	155.9	170.2	175.1	160.3	140.4	105.4
Fish - Poisson	278.4	279.4	267.3	264.5	275.9	222.3	180.5
Canned salmon - Saumon en boîte	241.5	241.6	239.6	238.1	241.0	181.3	149.0
Canned tuna(2) - Thon en boîte(2)	121.5	121.6	114.6	114.2	118.5
Eggs - Oeufs	153.5	148.1	158.8	156.9	151.2	136.5	94.7
Fruit and vegetables - Fruits et légumes ...	183.1	182.4	167.9	151.8	189.5	166.7	139.8
Fresh fruit - Fruits frais	172.5	177.4	176.3	172.8	198.6	175.6	143.2
Oranges - Oranges	122.5	128.7	113.9	121.5	127.9	119.8	104.4
Bananas - Bananes	100.3	90.2	85.6	69.0	97.6	82.8	79.3
Apples - Pommes	160.6	174.1	177.2	177.5	199.7	160.0	123.8
Grapefruit - Pamplemousses	162.4	158.3	143.0	133.6	163.4	158.7	153.4
Processed fruit - Fruits traités	183.6	182.5	158.2	155.1	169.3	142.4	127.6
Canned peaches - Pêches en conserve	208.5	207.6	162.0	161.3	181.9	155.9	140.8
Canned pears - Poires en conserve	173.5	170.1	138.3	138.2	149.4	132.7	124.5
Canned apple sauce(2) - Compote de pommes en conserve(2)	156.9	154.1	131.3	125.3	142.7
Canned apple juice(3) - Jus de pommes en conserve(3)	186.7	187.1	174.5	168.4	184.1	138.3	122.0
Canned orange juice - Jus d'oranges en conserve	124.2	123.3	113.2	112.6	117.5	112.6	115.0
Raisins - Raisins secs	270.4	270.5	256.1	244.0	262.8	207.2	153.4
Fresh vegetables - Légumes frais	179.3	174.7	167.7	156.0	196.0	180.6	147.0
Potatoes - Pommes de terre	164.4	166.2	196.4	186.2	248.3	212.3	128.2
Tomatoes - Tomates	220.4	215.4	192.2	177.7	207.8	173.7	167.5
Lettuce - Laitue	183.8	213.7	146.6	135.4	188.8	189.6	162.9
Carrots - Carottes	142.3	141.0	112.0	112.9	142.1	126.6	124.9
Celery - Céleri	166.0	154.7	148.5	139.3	166.4	167.4	164.2
Onions - Oignons	164.9	168.5	177.5	172.3	190.9	221.6	157.9
Cabbage - Choux	204.7	173.1	193.4	160.3	190.1	199.1	171.9
Turnips - Navets	172.7	175.5	156.4	156.7	167.2	182.0	154.2

TABLEAU 11. Indices des prix à la consommation, agglomérations urbaines(1)

Nota: (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subséquentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au tableau 14.

34	Mar. - Mars					
35	Apr. - Avril					
36	May - Mai					
37	June - Juin					

- (1) Indexes prior to May 1973 incorporate 1957 expenditure weights (1964 expenditure weights for Québec and Thunder Bay); those for May 1973 forward are based on 1967 expenditures. The revised series are linked to their predecessors at April 1973. For further explanation see page 96.
- (2) As of January 1975, the separate consumer price indexes for Saskatoon, Regina, Edmonton and Calgary supersede the combined-cities series. Users of the combined series are therefore advised to switch to the separate city indexes which are available only from April 1973. (The historical data for the combined-cities series are presented in Table 11A). Should users have any questions, contact the Retail Prices Section or consult the Retail Prices and Living Costs Service Bulletin, Catalogue 62-005, Volume 3, No. 5.
- (3) Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes so that the Canada and regional city shelter indexes now contain the same elements. See also page 97.
- (4) Includes shelter and household operation. Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes, so that the Canada and regional city shelter indexes now contain the same elements. See also page 97.

- (1) Avant mai 1973, les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957 (pour Québec et Thunder Bay sur les dépenses de 1964); à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 96.
- (2) A partir de janvier 1975, les indices séparés des prix à la consommation pour Saskatoon, Regina, Edmonton et Calgary remplacent les séries combinées. Nous conseillons donc aux utilisateurs des séries combinées d'utiliser les séries des indices séparés qui sont disponibles depuis avril 1973. (Les données historiques pour les séries combinées sont publiées au tableau 11A). Si il y a des questions, communiquez avec la section des prix de détail ou consultez le Bulletin de service sur les prix de détail et les coûts de la vie, no 62-005 au catalogue, volume 3, no. 5.
- (3) Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 97.
- (4) Comprend le logement et l'entretien du ménage. Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations urbaines; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 97.

- (1) Indexes prior to May 1973 incorporate 1957 expenditure weights; those for May 1973 forward are based on 1967 expenditure. The revised series are linked to their predecessors at April 1973. For further explanation see page 96. - Avant mai 1973, les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957 à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 96.
- (2) As of January 1975, the separate consumer price indexes for Saskatoon, Regina, Edmonton and Calgary supersede the combined-cities series. Users of the combined series are therefore advised to switch to the separate city indexes which are available only from April 1973. Should users have any questions, contact the Retail Prices Section or consult the Retail Prices and Living Costs Service Bulletin, Catalogue 62-005, Volume 3, No. 5. - À partir de janvier 1975, les indices séparés des prix à la consommation pour Saskatoon, Regina, Edmonton et Calgary remplacent les séries combinées. Nous conseillons donc aux utilisateurs des séries combinées d'utiliser les séries des indices séparés qui sont disponibles depuis avril 1973. Si il y a des questions, communiquez avec la section des prix de détail ou consultez le Bulletin de service sur les prix de détail et les coûts de la vie, no 62-005 au catalogue, volume 3, no 5.
- (3) Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes so that the Canada and regional city shelter indexes now contain the same elements. See also page 97. - Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 97.
- (4) Includes shelter and household operation. Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes, so that the Canada and regional city shelter indexes now contain the same elements. See also page 97. - Comprend le logement et l'entretien du ménage. Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations urbaines; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Explanation of Methods Used and Additional Sources for Price Series

Industrial Price Indexes

Industry Selling Price Indexes (1961 = 100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 5th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue 62-528.

Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

"Iron & Steel Mills:" 12-2910

The principal change in the index is as follows: From January 1973 forward prices collected from the various companies are, for any given commodity, weighted together in a way that reflects the relative importance of each company's shipments of the commodity to the total shipments of that commodity by all companies in the year 1971. In addition prices for stainless products were deleted from the series bars hot rolled etc. (12-2910-082), in September 1972 and from the series sheets and strip cold rolled etc. (12-2910-084) in October 1972. Prices for stainless products, however, are included in the price index for the iron and steel mills industry.

The concept of price change measured is net return to

Explication des méthodes utilisées et sources supplémentaires des séries de prix

Indices des prix industriels

Indices des prix de vente dans l'industrie (1961 = 100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", (n° 62-528 au catalogue).

Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

"Sidérurgie:" 12-2910

Le principal changement apporté à l'indice est le suivant: depuis janvier 1973, les prix recueillis auprès des différentes sociétés sont, pour tout produit, pondérés de manière à refléter l'importance relative des livraisons de chaque société par rapport aux livraisons totales de ce produit par toutes les sociétés en 1971. En outre, les prix des produits en acier inoxydable ont été enlevés de la série "barres, laminés à chaud, etc." (12-2910-082) en septembre 1972 et de la série "tôles et feuillards, laminés à froid etc." (12-2910-084) en octobre 1972. Ils sont toutefois compris dans l'indice des prix de l'industrie de la sidérurgie.

Le concept de la mesure de la variation des prix se fonde sur le revenu net à l'usine.

Purchase Price Indexes of Secondary Metals (1969 = 100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1935-39 = 100)

Prices for Western grains used in the index are Canadian Wheat Board buying prices for grain in store at Vancouver or Thunder Bay.

Final payments for the crop year August 1973 - July 1974 were announced on December 24, 1974 and have been incorporated into the index. Estimates for the total 1974-1975 payments are based on the initial payment plus half of the 1973-74 crop year final payment.

Indices du prix d'achat des métaux de deuxième fusion (1969 = 100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice des prix des produits agricoles canadiens (1935-39 = 100)

Les prix des céréales de l'Ouest utilisés dans l'indice sont les prix d'achat de la Commission canadienne du blé pour les céréales entreposées à Vancouver ou à Thunder Bay.

Les paiements finals pour la campagne agricole août 1973 - juillet 1974 ont été annoncés le 24 décembre 1974 et ont été incorporés à l'indice. Les estimations des paiements totaux de 1974-1975 sont basées sur le paiement initial plus la moitié du paiement final de la campagne agricole 1973-1974.

General Wholesale Index (1935-39 = 100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Vol. 23) (Catalogue 62-501).

Thirty Industrial Materials, (1935-39 = 100)

The price index of thirty industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{\frac{P^1}{tN} \times \frac{P^2}{tN} \times \frac{P^3}{tN} \times \dots \times \frac{P^{30}}{tN}}$$

$$\sqrt[30]{\frac{P^1}{35-39} \times \frac{P^2}{35-39} \times \frac{P^3}{35-39} \times \dots \times \frac{P^{30}}{35-39}}$$

Indice général des prix de gros (1935-39 = 100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter *Wholesale Price Indexes 1913-50 (Reference Paper No. 24)* et *Prices and Price Indexes 1949-52 (Vol. 23)* (n° 62-501 au catalogue).

Indice des prix de trente matières industrielles (1935-39 = 100)

L'Indice des prix de trente matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

$$\sqrt[30]{\frac{P^1}{tN} \times \frac{P^2}{tN} \times \frac{P^3}{tN} \times \dots \times \frac{P^{30}}{tN}}$$

$$\sqrt[30]{\frac{P^1}{35-39} \times \frac{P^2}{35-39} \times \frac{P^3}{35-39} \times \dots \times \frac{P^{30}}{35-39}}$$

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering 5 and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyre's type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

The Consumer Price Index for Canada (1961 = 100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index may not represent closely the experience of any one specific family within the group, nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families — (a) living in cities with over 30,000 population, (b) ranging in size from two to six persons and (c) with annual incomes in 1967 ranging from \$4,000 to \$12,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In January 1969, the time base was updated to 1961 = 100 from 1949 = 100; details are contained in the January 1969 issue of the monthly publication *Prices and Price Indexes*, Catalogue 62-002.

From March 1961 to April 1973 inclusive, the weights or relative importance of the items in the Consumer Price Index were based on 1957 family expenditure patterns; details of these weights can be found in *The Consumer Price Index for Canada (1949 = 100) (Revision Based on 1957 Expenditures)*, Catalogue 62-518. A subsequent weight revision to reflect 1967 family expenditure patterns (and within the food component, 1969 detailed spending habits) was introduced in May 1973. Full details of the latest weighting pattern and other background information on the Consumer Price Index is available in the occasional paper *The Consumer Price Index for Canada (1961 = 100) (Revision Based on 1967 Expenditures)*, Catalogue 62-539.

Le choix des matières servant au prélèvement des prix est se rapportant à des groupes tels que prix "stables", (12 matières) prix des aliments (5 matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérées comme intrants importants dans l'industrie.

L'indice des prix à la consommation pour le Canada (1961 = 100)

L'indice des prix à la consommation mesure le taux de variation dans le temps du coût à l'achat d'un "panier" constant de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" est constitué par des biens et des services en quantité et de qualité constantes; il comprend uniquement les biens et services qui ont un prix et dont les prix peuvent être observés de façon continue.

L'indice se rapporte à un groupe vaste, mais délimité, de familles urbaines et rend compte des changements de prix auxquels ce "groupe cible" doit faire face. L'indice peut ne pas suivre de près les changements de prix touchant une famille en particulier de ce groupe, pas plus que les changements de prix touchant d'autres groupes de la population dont le revenu, la taille des familles ou les lieux de résidence diffèrent sensiblement. Le groupe cible auquel se rapporte l'indice actuel se compose de familles a) vivant dans des villes de plus de 30,000 habitants, b) dont la taille est comprise entre deux et six personnes, et c) dont les revenus annuels en 1967 étaient compris entre \$4,000 et \$12,000. Afin de mesurer les effets de changements de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation suit les mouvements de quelque 300 articles.

L'histoire des indices de prix à la consommation au Canada remonte au début des années 1900, et elle comprend des révisions périodiques des périodes de référence de base de l'indice ainsi que des schémas de pondération. En janvier 1969, on a aligné la base de temps de 1949 = 100 à 1961 = 100; d'autres renseignements figurent dans l'édition de janvier 1969 de la publication mensuelle *Prix et indices des prix* (n° 62-002 au catalogue).

De mars 1961 à avril 1973 inclusivement, les poids, ou l'importance relative des éléments de l'indice des prix à la consommation étaient basés sur les tendances de dépense de familles pour 1957; on peut trouver le détail de ces poids dans la publication *The Consumer Price Index for Canada (1949 = 100) (Revision based on 1957 Expenditure)*, (n° 62-518 au catalogue). En mai 1973, on a introduit une nouvelle révision des poids afin de prendre en compte les tendances de consommation des familles en 1967 (et, dans l'élément aliments, les habitudes détaillées de dépense en 1969). Le détail complet du dernier schéma de pondération et d'autres renseignements fondamentaux sur l'indice des prix à la consommation figurent dans la publication hors série *L'indice des prix à la consommation du Canada (1961 = 100) (Révision fondée sur les dépenses de 1967)*, (n° 62-539 au catalogue).

The Consumer Price Index for Canada Reclassified by Goods and Services

A revised supplementary classification system, entitled "The Consumer Price Index Reclassified by Goods and Services", was introduced in May 1973 with the revision of the weighting pattern of the Consumer Price Index to reflect 1967 expenditures.

This supplementary classification introduces an improved framework for regrouping the items which comprise the Index. In it, all items in the C.P.I. have been reclassified into two major categories — goods and services — according to their most characteristic or dominant attribute. The goods component has been sub-divided into three categories: durable, semi-durable, and non-durable goods, according to expected average useful lifetime criteria. Services, on the other hand, have been sub-divided according to broad functional categories.

Historical series conforming to the revised classification system replace the previously published supplementary indexes and are available, with explanatory notes, for the period January 1961 to April 1973 inclusive, in *Retail Prices and Living Costs Service Bulletin*, Catalogue 62-005, Vol. 2 No. 7.

Consumer Price Indexes for Regional Cities (1961 = 100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). Except for their individual weighting systems, and the fact that they are based on fewer quotations, the regional city indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada.

Prior to May 1973, the city indexes may have underestimated the degree of price movements occurring because the shelter component of the city indexes moved on the basis of changes in rents only, whereas changes in both rents and homeownership costs were, and continue to be, included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and the items indexes for cities tended to underestimate somewhat the rates of price increase particularly over longer periods. From May 1973 forward, however, homeownership costs are included in the regional city consumer price indexes so that the Canada and the regional city indexes are consistent in terms of their content and treatment.

Each city index is designed to measure the influence of changes in retail prices taking place in the locality specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in the particular area specified.

In using the city indexes, it should be remembered that they do not in any way indicate whether price levels are higher or lower in one city than in another. Rather, they measure, within each city, the percentage change in consumer prices from the base period to subsequent time periods.

L'indice des prix à la consommation au Canada reclassé par biens et services

Un système révisé de classification supplémentaire, intitulé "L'indice des prix à la consommation au Canada reclassé par biens et services", a été introduit en mai 1973 en même temps que la révision des schémas de pondération de l'indice des prix à la consommation afin de rendre compte des dépenses de 1967.

Cette classification supplémentaire regroupe dans un cadre amélioré les éléments de l'indice. En effet, tous les éléments de l'I.P.C. ont été reclassés dans deux grandes catégories, soit la catégorie des biens et celle des services, suivant leur caractère le plus distinctif ou dominant. La catégorie des biens présente trois sous-catégories (biens durables, biens semi-durables, biens non durables) déterminées en fonction de la vie utile moyenne prévisible. D'autre part, on a réparti les services suivant quelques grandes catégories fonctionnelles.

Les séries historiques conformes au système révisé de classification remplacent les indices supplémentaires publiés auparavant, et on peut les trouver, avec des notes explicatives, pour la période janvier 1961-avril 1973, dans la publication "Prix de détail et coût de la vie" - Bulletin de service, n° 62-005 au catalogue, vol. 2 N° 7.

Indices des prix de la consommation dans certaines agglomérations urbaines (1961 = 100)

Ces indices sont publiés tous les mois dans la présente publication (Tableau 11). À l'exception de leurs systèmes de pondération particuliers, et de ce qu'ils font appel à moins de prix, ces indices sont en général semblables par leur concept et par les éléments qui les composent à l'indice des prix à la consommation au Canada.

Avant mai 1973, les indices des agglomérations ont pu sous-estimer le degré de changement des prix, parce que l'élément logement des indices des agglomérations ne variait qu'en fonction de l'évolution des loyers, tandis que l'indice pour le Canada ne comprenait et ne comprend toujours que les changements des loyers et les coûts de propriété. Comme les coûts de propriété ont augmenté plus vite que les loyers, les indices du logement et l'ensemble pour les villes tendent à sous-estimer quelque peu les taux de croissance des prix, principalement sur des périodes plus longues. À partir de mai 1973, cependant, les coûts de propriété sont inclus dans les indices de prix à la consommation des agglomérations urbaines, de sorte que les indices pour le Canada et les agglomérations urbaines sont homogènes à la fois pour ce qui est de leur contenu et de leur traitement.

Chaque indice de ville est conçu de manière à mesurer l'effet des changements des prix de détail dans la ville en question sur les prix d'un panier constant de biens et de services représentant le niveau de consommation d'un groupe représentatif de familles dans cette ville.

Le lecteur devra toujours garder en mémoire que ces indices n'indiquent en aucune façon si les prix sont plus élevés dans une ville que dans une autre. Ils mesurent plutôt dans chaque ville le taux de variation des prix à la consommation à partir de la période de base et des périodes subséquentes.

For comparisons of retail price differentials between cities, see Table 14 of this publication and the relevant explanatory notes.

Purchasing Power of the 1961 Consumer Dollar

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases, and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

The purchasing power of the consumer dollar, in other words, bears an inverse relationship to the movement of the Consumer Price Index. For example, by January 1973, compared with their average level in 1961, consumer prices as measured by the C.P.I. were 44.5% higher, so that an equivalent basket of goods and services which could be purchased for \$100.00 in 1961 would cost the consumer \$144.50 in January 1973. Each consumer dollar in January 1973, therefore, buys less than in 1961, and the amount of its reduced value can be expressed in terms of the inverse consumer price movement. Thus, in January 1973 the purchasing power of the 1961 consumer dollar declined to approximately 69 cents ($\$1.00 \times 100.0/144.5 = \0.69).

Users of the tabulation which shows the purchasing power of the 1961 consumer dollar at different points in time (Table 12) should note that, as in the case of the Consumer Price Index from which it is derived, it may not represent closely the experience of any one specific family within the large group to which the C.P.I. relates; nor should it be expected to reflect the experience of other population groups whose income, family size and place of residence are characteristically different. It should also be noted that, like the C.P.I., it is not directly affected by changes in income tax, unemployment insurance premiums and certain other security payments.

Measuring the Purchasing Power of Wages

Changing consumer price levels affect the amounts of consumer goods and services which a dollar will buy, and average wages, insofar as they are spent on such items will, of course, be affected in the same way. A wage measurement which takes the change of consumer prices into account, can be calculated by reducing actual average wages by the percentage rise in consumer price levels, or increasing them by the amount price levels fall. Wages thus adjusted may be used to indicate the comparative purchasing power of average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. On the

Pour étudier les différences de prix de détail entre les villes, il faut consulter le tableau 14 de la présente publication et les notes explicatives qui l'accompagnent.

Pouvoir d'achat du dollar de consommation 1961

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente, et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie, et la baisse des prix est liée à la hausse du pouvoir d'achat.

Le pouvoir d'achat du dollar de consommation, en d'autres termes, évolue en raison inverse du mouvement de l'indice des prix à la consommation. Ainsi, en janvier 1973, par rapport au niveau de 1961, les prix à la consommation mesurés par l'I.P.C. avaient progressé de 44.5%, de sorte qu'un panier équivalent de biens et de services qui coûtait \$100 à l'achat en 1961 aurait coûté \$144.50 en janvier 1973 au consommateur. Par conséquent, chaque dollar de consommation en janvier 1973 achète moins qu'en 1961, et l'on peut exprimer le montant de sa valeur réduite en fonction de l'inverse du mouvement des prix à la consommation. Ainsi, en janvier 1973, le pouvoir d'achat du dollar de consommation 1961 était tombé approximativement à 69 cents ($\$1.00 \times 100.0/144.5 = \0.69).

Les utilisateurs du tableau qui indique le pouvoir d'achat du dollar de consommation de 1961 à différentes périodes (tableau 12) doivent noter que, comme dans le cas de l'indice des prix à la consommation dont il a été tiré, il peut ne pas suivre de près le cas d'une famille en particulier faisant partie du grand groupe auquel se rapporte l'I.P.C., pas plus qu'il ne rend nécessairement compte des dépenses d'autres groupes de la population dont les revenus, la taille des familles et les lieux de résidence diffèrent sensiblement. Il faut également noter que, tout comme l'I.P.C., in n'est pas touché directement par les changements de l'impôt sur le revenu, les primes d'assurance-chômage et certains autres paiements d'assistance.

Mesure du pouvoir d'achat des salaires

Les changements du niveau des prix à la consommation affectent les quantités de biens et de services de consommation qu'un dollar peut acheter, et les salaires moyens, dans la mesure où ils sont consacrés à de tels articles, seront naturellement touchés de la même façon. Une mesure des salaires qui prendrait en compte les changements de prix à la consommation peut se calculer en réduisant les salaires moyens réels du taux d'accroissement des prix à la consommation, ou en les augmentant dans une proportion égale à la baisse des prix. Les salaires ainsi ajustés peuvent servir à indiquer le pouvoir d'achat comparatif des gains moyens si les prix à la consommation et les tendances de consommation étaient restés constants. L'exemple suivant montre comment on peut procéder à un ajustement de cette nature.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B, et qu'au cours de la même période un indice des prix à la consommation passe de 100 à 110. Par suite de la hausse de 10% des prix à la consommation, \$1 n'achètera pas autant au cours de

er hand, the 25% rise from \$80.00 to \$100.00 will over-
the increase which has occurred in the purchasing power
verage weekly wages. This overstatement can be removed
reducing the figure of \$100.00 by the amount of the
sumer price index increase. The adjusted average is
 $91.1((100.0/110.0) \times 100)$, which may be referred to as
eekly wage average for week B expressed in the dollars of
od A; or it may be said to indicate the level of real weekly
ges relative to week A.

The foregoing calculation can be carried a step fur-
to express, in index number form, the relationship
ween the week A average of \$80.00 and the week B
asted figure of \$90.91. Assuming the week A average of
00 as an index equal to 100, the week B index becomes
 $113.6((90.91/80.00) \times 100)$. Such an index may be called an
ex of average weekly real wages. It indicates that average
es for week B will buy 13.6% more goods and services
a they did in week A, in spite of a 10% rise in consumer
es. This 13.6% increase in real wages compares with the
rise in money wages ($((\$100.00-\$80.00)/\$80.00) \times 100$).

In Table 13, the index numbers of average weekly
es in manufacturing in current dollar terms (1961 = 100)
calculated by dividing the weekly wages in current dollars
he 1961 average weekly wage in current dollars and
ultiplying the result by one hundred. For example, the
yly wage index for September 1972 in current dollars
1 = 100) is 196.4 ($((146.23/74.45) \times 100)$). The weekly
es in 1961 dollar terms are determined by dividing the
yly wage in current dollars by the consumer price index
Canada for the month following the month to which the
es relate and multiplying the result by one hundred.
s, the September 1972 weekly wage in 1961 dollars is
 $196.4((146.23/74.45) \times 100)$. (The wage and the price
both refer to generally similar time periods: current
es for a particular month relate to the last pay periods in
month, while most prices for the consumer price index of
following month are collected in the first week of that
th.)

The index numbers of weekly wages in 1961 dollar
s (1961 = 100) are determined by dividing the weekly
es in 1961 dollars by the base (1961) average weekly
and multiplying the result by one hundred. For exam-
he September 1972 weekly wage index in 1961 dollar
s (1961 = 100) is 138.3 ($((102.98/74.45) \times 100)$).

It should be noted that while the estimates of average
wages may reflect the experiences of broad groups of
ers in manufacturing fairly well, their applicability to
dual wage-earners depends upon a number of consider-
s. For example, individual earnings will differ signifi-
ly from the group average, depending upon occupation,
try, geographical location, or sex of the wage-earner.
over, individual spending habits differ widely, but the
mer price index which is used to adjust the earnings
refers only to the average consumption pattern of a
tular population group. Group spending patterns
e over periods of time. To the extent that this occurs,
age data adjusted by the consumer price index (which
"fixed" consumption pattern), will gradually be ren-

la semaine B qu'au cours de la semaine A. Par contre, la hausse
de 25% (de \$80 à \$100) va surévaluer la hausse qui s'est produite
dans le pouvoir d'achat des salaires hebdomadaires moyens. Cette
surévaluation peut être réduite en réduisant le chiffre de \$100 du
montant de l'accroissement de l'indice des prix à la consomma-
tion. La moyenne ajustée sera \$90.91 ($((100.0/110.0) \times 100)$), et
que l'on peut désigner comme étant la moyenne du salaire
hebdomadaire pour la semaine B exprimée en dollars de la
période A; on peut aussi dire qu'elle indique le niveau réel des
salaires par rapport à la semaine A.

On peut pousser ce calcul plus loin, en exprimant à l'aide
d'un indice, la relation entre le salaire moyen de \$80 de la semaine
A, et le salaire révisé de \$90.91 de la semaine B. En supposant que
la moyenne de la semaine A soit un indice égal à 100, l'indice de
la semaine B devient 113.6 ($((90.91/80.00) \times 100)$). On pourrait
appeler un tel indice l'indice de la rémunération hebdomadaire
effective. Il indique que le salaire moyen pour la semaine B
permettra aux consommateurs d'acheter pour 13.6% de plus en
biens et services que pendant la semaine A, et ceci, en dépit de
l'augmentation de 10% des prix à la consommation. Cette aug-
mentation effective de 13.6% se compare à l'augmentation de 25%
des salaires ($((\$100.00-\$80.00)/\$80.00) \times 100$).

Au Tableau 13, les nombres indices des salaires hebdoma-
daires moyens dans les industries manufacturières en dollars
courants (1961 = 100) s'obtiennent en divisant les salaires hebdo-
madaires en dollars courants par le salaire hebdomadaire moyen
de 1961 en dollars courants et en multipliant le résultat par cent.
Ainsi, l'indice des salaires hebdomadaires pour septembre 1972
exprimés en dollars courants (1961 = 100) est 196.4
 $((146.23/74.45) \times 100)$. Les salaires hebdomadaires en dollars de
1961 s'obtiennent en divisant les salaires hebdomadaires en
dollars courants par l'indice des prix à la consommation pour le
Canada pour le mois qui suit celui auquel se rapportent les
salaires, et en multipliant le quotient par cent. Ainsi, le salaire
hebdomadaire de septembre 1972 exprimé en dollars de 1961 est
 $196.4((146.23/74.45) \times 100)$. (Les données sur les salaires et
les prix portent en général sur des périodes semblables: les salaires
courants d'un mois donné sont généralement ceux des dernières
périodes de paie du mois, alors que la plupart des prix pour
l'indice des prix à la consommation du mois suivant sont recueillis
au cours de la première semaine de ce mois.)

Les nombres indices des salaires hebdomadaires en dollars
de 1961 (1961 = 100) s'obtiennent en divisant les salaires hebdo-
madaires en dollars de 1961 par les salaires hebdomadaires
moyens de l'année de base (1961) et en multipliant le quotient par
cent. Ainsi, l'indice des salaires hebdomadaires pour septembre
1972, exprimés en dollars de 1961 (1961 = 100), sera 138.3
 $((102.98/74.45) \times 100)$.

Il convient de souligner que, même si les estimations des
salaires réels moyens résument assez bien la situation d'un large
éventail de travailleurs dans les industries manufacturières, elles
ne peuvent être appliquées aux individus sans quelques précau-
tions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la
moyenne du groupe en fonction de sa profession, de l'industrie
dans laquelle il travaille, de sa situation géographique ou de son
sexe. De plus, les habitudes de consommation varient considéra-
blement d'un individu à l'autre, alors que l'indice des prix à la
consommation qui sert à redresser les données sur les gains porte
uniquement sur la structure moyenne de consommation d'un
groupe déterminé. De même, les habitudes de consommation
changent avec le temps. Ainsi, les données sur les gains rajustées
par l'indice des prix à la consommation (les habitudes de consom-

dered less valid; the consumer price index weighting pattern was last revised in May 1973, and prior to that, in 1961. Furthermore, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual (current dollar) and real (constant dollar) wages uses 1961 as a reference year. However, any reference period may be chosen as a base since percentage changes between any two periods will be the same regardless of the reference period selected.

Further information regarding Table 13 can be obtained from: Labour Division, Statistics Canada.

Inter-City Retail Price Comparisons

Statistics relating to differences in retail prices between Canadian cities were initially developed for food, and subsequently extended to cover such other elements of the family budget as clothing, transportation, household operation, health and personal care, recreation, education and reading, and tobacco and alcohol. In all, inter-city price comparisons are drawn for commodities and services comprising nearly three-quarters of the budget on which the Consumer Price Index for Canada is currently based with the major omission being shelter (both rented and owned). While recognizing the importance of shelter differentials in any overall comparison of the general price level being encountered by consumers in different urban centres, the problems inherent in drawing valid comparisons between cities are such as to require further research. Meanwhile, it is considered that, despite the absence of shelter differentials at this time, publication of retail price comparisons for other elements of the budget will go some distance towards serving the varied needs of users.

Table 14 presents the results of an updating of earlier spatial retail price measurements to May 1971 and includes more complete data on several cities. A fuller explanation of the study from which this table is derived is contained in the November 1968, November 1969 and April 1972 issues of *Prices and Price Indexes* (Statistics Canada, Catalogue 62-002).

mation étant supposées "fixes") perdront graduellement de leur valeur; le schéma de pondération de l'indice des prix à la consommation a été révisé pour la dernière fois en mai 1973, et avant cela, en 1961. De plus, il ne faut pas oublier qu'une partie du revenu peut être épargnée et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations des gains effectifs calculées à partir de moyennes effectives peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations de niveaux de consommation des salariés ou de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente les salaires tant réels (en dollars courants) qu'effectifs (en dollars constants) prend pour base l'année 1961. En fait, on peut choisir n'importe quelle période de référence comme base, puisque les taux de variation entre deux périodes seront les mêmes quelle que soit la période de référence choisie.

On peut obtenir plus de renseignements sur le tableau 13 en s'adressant à la Division du travail, Statistique Canada.

Comparaisons entre les prix de détail d'une ville à l'autre

À l'origine, la statistique des différences entre les prix de détail d'une ville du Canada à l'autre a été mise au point pour l'alimentation; par la suite, on l'a étendue à d'autres postes du budget familial tels que l'habillement, les transports, l'entretien du ménage, la santé et les soins personnels, les loisirs, la formation et la lecture, et le tabac et l'alcool. Au total, les comparaisons d'une ville à l'autre portent sur des biens et des services constituant près des trois quarts du budget servant actuellement à construire l'indice des prix à la consommation au Canada, la seule grande omission étant le logement (location et frais de possession). Sans vouloir nier l'importance des différences en ce qui concerne le logement dans toute comparaison globale du niveau général des prix auxquels les consommateurs doivent faire face dans divers centres urbains, il faut bien dire que les problèmes qui comporteraient l'établissement d'une comparaison valable d'une ville à l'autre sont tels qu'ils nécessitent plus de recherches. Entre-temps, on estime que malgré l'absence actuelle de données sur les dépenses de logement, la publication de comparaisons de prix de détail pour d'autres postes du budget permettra de faire de gros progrès en ce qui concerne la satisfaction des besoins variés des utilisateurs.

On trouvera au tableau 14 le résultat d'une mise à jour des mesures de prix de détail tirées précédemment jusqu'à mai 1971 ainsi que des données plus complètes sur plusieurs villes. Une explication plus détaillée de l'étude dont le tableau en question est tiré figure dans les livraisons de novembre 1968, novembre 1969 et avril 1972 de *Prix et indices des prix* (n° 62-002, catalogue).

The original data base of this study was the wide range of retail price quotations collected in the course of production of the national and urban Consumer Price Indexes. In developing these spatial price comparisons, efforts were made to achieve comparability by equating qualities of goods and services and by matching types of retail outlets, as far as possible. Price relationships between pairs of cities were derived and subsequently converted to a common base of Winnipeg prices equalling 100 to facilitate comparisons over the whole range of cities. Except for foodstuffs and new passenger cars for which inter-city price differentials were derived directly from new comparisons based on May 1971 price data, the updating of these measurements of inter-city retail price differentials was accomplished by application of the relative movement of prices, at the item level in each city, over the intervening periods as derived from the relevant city consumer price indexes. These price relationships at the item level were aggregated on the basis of the Canada urban consumer spending pattern, rather than the patterns applicable to individual cities. While differences in spending patterns exist among cities, the magnitude of these differences in the cities covered is not such as to affect most of the spatial comparisons significantly. Because of the previously mentioned absence of shelter price relationships, which may be of considerable significance in any overall comparison of inter-urban retail price differentials, aggregative indexes beyond major budget groupings are not shown.

The weighting factors used to combine items to group and component levels in Table 14 are based on 1957 expenditures, and therefore will not be identical to the 1967 weights, introduced in May 1973, in Consumer Price Index tables.

It should be noted that the retail prices used in this comparison, being those faced by consumers, include sales and excise taxes as applicable. Variations between provinces in the scale of sales taxes imposed on a wide range of non-food commodities can be of significance in explaining inter-city price differentials for these items.

While these indexes have been expressed in terms of Winnipeg = 100, the selection of Winnipeg as the base city has no special significance, and the indexes may be expressed on the base of any of the individual cities included.

Farm Input Price Indexes (1961 = 100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961 = 100 time base.

Les premières données de base pour la présente étude ont été constituées par l'importante collection de prix de détail recueillie lors de la confection des indices nationaux et urbains des prix à la consommation. Au moment d'établir ces comparaisons géographiques de prix, on s'est efforcé d'assurer la comparabilité en prenant des biens et des services de qualité égale et en assortissant autant que possible les points de vente au détail par type. Les relations de prix entre paires de villes ont été calculées puis converties à la base commune des prix de Winnipeg = 100 afin de faciliter des comparaisons pour l'ensemble de toutes les villes. Sauf pour les denrées alimentaires et les voitures neuves, pour lesquelles les différences de prix entre villes ont été tirées directement de nouvelles comparaisons fondées sur les données de mai 1971, la mise à jour de ces mesures des différences de prix de détail entre les villes a été assurée grâce à l'extension des mouvements relatifs de prix au niveau de chaque article dans chaque ville aux périodes observées selon le calcul établi à partir de l'indice des prix à la consommation pour la ville en question. Ces relations entre les prix au niveau de l'article ont été agrégées sur la base des habitudes de consommation du citoyen pour l'ensemble du Canada et non pas selon les habitudes de dépense applicables à des villes individuelles. Même s'il existe des différences dans les habitudes de dépense d'une ville à l'autre, l'importance de ces différences en ce qui concerne les villes dont il est question ici ne sont pas suffisantes pour influencer sensiblement sur la plupart des comparaisons géographiques. Du fait de l'absence des relations de prix en ce qui concerne le logement, dont il a déjà été question ci-dessus et qui pourrait avoir une importance considérable chaque fois que l'on voudrait tirer une comparaison globale entre les différences de prix à la consommation au détail d'une ville à l'autre, on ne trouvera ici aucun indice synthétique agrégé au-delà des principales composantes du budget.

Les facteurs de pondérations utilisés pour regrouper les articles en groupes et en éléments dans le Tableau 14 sont basés sur les dépenses de 1957; ils ne sont donc pas identiques aux pondérations de 1967 adoptées en mai 1973 dans les tableaux relatifs à l'indice des prix à la consommation.

Il faut remarquer que les prix de détail ayant servi à la présente comparaison sont ceux que doit payer le consommateur et comprennent donc les taxes de vente et les taxes d'accises qui peuvent s'appliquer. Les différences d'une province à l'autre entre les barèmes de taxe de vente imposés sur une grande variété de biens non alimentaires peut avoir une grande importance pour expliquer les différences de prix d'une ville à l'autre pour les articles en question.

Le fait que ces indices aient été exprimés en prenant Winnipeg = 100 ne signifie pas que le choix de Winnipeg comme ville de référence ait une signification particulière et les indices pourraient être exprimés sur la base de n'importe laquelle des villes qui y figurent.

Indices de prix des entrées dans l'agriculture (1961 = 100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961 = 100.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services Used by Farmers, 1935-39 = 100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-534, and is reproduced in the September 1971 issue of *Prices and Price Indexes*, Catalogue 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-004, and in the monthly publication *Prices and Price Indexes*, Catalogue 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterparts, and publication has been suspended.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto and Montreal stock exchanges.

The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in the investor's mining and supplementary stock indexes are Thursday's closing quotations from the exchange (Montreal, Toronto, Vancouver or Calgary) with the highest volume for a particular stock, as reported in the Daily Canadian Data Bank of the Financial Post Computer Services Department. For preferred stocks, prices are monthly weighted averages of the daily closing price in which weights are daily total volume. The price reference base for the indexes is the year 1956, and the indexes express prices as a percentage of price in 1956, arithmetically converted to the 1961 = 100 base.

Revised indexes on the base 1956 = 100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the indexes, apart from the shift in the price reference base, was the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials, 4 sub-groups (Milling and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) were replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Beverages, Textile and Clothing, Pulp and Paper, and Oils (renamed Petroleum) were continued. The major group utilities was contin-

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39 = 100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série *Farm Input Price Indexes, 1961 = 100* (N° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reprise dans *Prices and Price Indexes* de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel *Farm Input Price Indexes, 1961 = 100* (n° 62-004) et dans le bulletin annuel *Prices and Price Indexes* (n° 62-002).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour on a cessé de la publier.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières mesurent dans le temps l'incidence du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un actionnaire hypothétique (par opposition au spéculateur). Le portefeuille comprend des actions de sociétés canadiennes cotées à la Bourse de Toronto et de Montréal.

Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres miniers et les indices supplémentaires sont le cours de fermeture de jeudi (Montréal, Toronto, Vancouver, Calgary) affichant le volume le plus élevé pour une valeur particulière, d'après la Banque des données canadiennes quotidiennes du Service de l'informatique du *Financial Post*. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles des cours de clôture de chaque jour et les poids, le volume quotidien total. La période de référence pour les indices est l'année 1956 et les indices représentent les prix exprimés en pourcentage des prix de 1956 recalculé sur la base 1961 = 100.

Les indices révisés sur la base 1956 = 100 ont été publiés pour la première fois dans la livraison de juin 1962 de cette publication. La modification la plus importante à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice : mines industrielles, boissons, textiles et habillement, pâte à papier, et huiles (sous la désignation de pétrole). Le grand groupe

ued but the Pipelines index was added as a sub-group and the previous Power and Traction sub-group was replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A major group Finance was composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights which were previously limited to major groups, were extended to sub-groups. Weights in the index continue to be based on shares outstanding.

A revision of the Security Price Indexes to the 1971 = 100 base is under development.

For the list of stocks currently included in the Investors Index and Preferred Index, see *Prices and Price Indexes* for March 1974.

Price Indexes of Machinery and Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968 = 100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

de services d'utilité publique a été conservé mais l'indice des pipelines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et traction a été remplacé par deux nouveaux sous-groupes: l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements et prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

On prépare actuellement une révision des Indices des cours des valeurs mobilières sur la base 1971 = 100.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve dans *Prix et indices des prix* de Mars 1974.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968 = 100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du U.S. Bureau of Labour Statistics ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

NOTES ON PRICES AND PRICE INDEX NUMBERS

Industry Selling Price Index: Manufacturing (1961 = 100)

The industry selling price index (Total Manufacturing) moved 0.5% higher in February to 186.5 from the January index of 185.6. This increase was less than the January over December revised 1.6% and approximately half the average monthly increase experienced over the last six months. The index was 16.5% higher than the February 1974 index of 160.1.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes were increases recorded in the wood products group (2.5%), halting a recent downward trend in these prices. Gains were particularly evident in sawmills and planing mills industry (4.0%). Increases continued to occur in the chemical products group (0.8%), due mainly to higher prices recorded in the manufacture of industrial chemicals (0.9%). Advances were also noted in the paper and allied industries group and the non-metallic minerals group.

For the third successive month decreases were registered in the foods and beverages group with slaughtering and meat packing down (4.1%) flour mills (2.2%) and in the miscellaneous food mfrs. group (1.5%). Lower prices in the cotton yarn and cloth mills (0.7%) moved the textile industries downward slightly continuing the downward trend in these prices.

NOTES SUR LES PRIX ET LES INDICES DE PRIX

Indice des prix de vente dans l'industrie: Industries manufacturières (1961 = 100)

L'indice des prix de vente dans l'industrie (ensemble des industries manufacturières) a augmenté de 0.5% entre janvier et février pour passer de 185.6 à 186.5. Cette augmentation était inférieure à celle observée entre décembre et janvier, qui était de 1.6% (chiffre rectifié), et représentait environ la moitié de celle observée en moyenne au cours des six derniers mois. L'indice était de 16.5% supérieur à celui de février 1974.

En ce qui concerne l'apport relatif des groupes à la variation globale de l'indice des industries manufacturières, les variations les plus sensibles ont été observées dans le groupe des produits du bois où une augmentation de 2.5% a été enregistrée, qui mettait fin à une tendance à la baisse. Les augmentations ont été particulièrement sensibles dans le groupe des scieries (4.0%). L'indice du groupe des produits chimiques a continué à augmenter (0.8%), surtout par suite de la hausse des coûts de production des produits chimiques industriels (0.9%). On a également noté des augmentations dans le groupe des industries du papier et industries connexes et dans le groupe des minéraux non métalliques.

Pour le troisième mois consécutif, l'indice des aliments et boissons a diminué, avec des baisses dans le sous-groupe de l'abattage et du conditionnement de la viande (4.1%), dans celui des moulins à farine (2.2%) et dans les industries d'aliments divers (1.5%). L'indice du groupe des industries textiles a diminué légèrement, poursuivant une tendance déjà en cours, avec des baisses de prix dans la filature et le tissage (0.7%).

General Wholesale Price Index (1935-39=100)

The general wholesale price index declined 0.2% to 483.2 from the revised January index of 484.3. It was 10.4% higher than a year earlier. Three of the eight major groups decreased, while five showed increases.

The vegetable products group index declined 3.4% in February to 502.0 from the revised January index of 519.4 due mainly to lower prices recorded for potatoes 20.2%, grains 10.0%, fresh fruits 5.5%, and livestock and poultry feeds 3.8%, and vegetable oil products 3.6%. The animal products group decreased 2.6% to 490.0 from the revised January index of 503.2, due to decreases in livestock 8.4%, fresh meats 6.6%, hides and skins 6.3%, and leather and eggs indexes 3.8%. The textile products group showed a decline of 0.1% with a decrease of 9.8% for rayon fabric and a 5.0% decrease in cotton yarns.

The iron products group rose 2.8% in February to 496.2 from the revised January index of 482.9 due to increases in wire 7.4%, rolling mill products 4.7% and iron foundries and steel pipe and tubing 2.7%. The non-metallic minerals group index increased 1.9% to 377.1 from the revised January index of 370.1, due to increases in lime 11.9%, sand and gravel 9.8%, clay and allied products 7.5% and asbestos and its products 6.3%. Wood products rose 1.8% to 615.7 from the revised January index of 604.7, with the most significant price changes in fir 7.3%, cedar 5.7%, spruce and hemlock 3.8%. The non-ferrous metals group index rose 1.7% with increases in nickel and silver. Chemical products rose 1.4% to 382.3 from the revised January level of 377.0.

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros a diminué de 0.2%; il est passé de 484.3 en janvier (chiffre rectifié) à 483.2 en février. Il était de 10.4% supérieur à celui de février 1974. Trois des huit groupes principaux ont diminué et cinq ont augmenté.

L'indice du groupe des substances végétales a diminué de 3.4% entre janvier et février; il est passé de 519.4 (chiffre rectifié) à 502.0, surtout par suite des baisses de prix des pommes de terre (20.2%), des céréales (10.0%), des fruits frais (5.5%), des aliments pour le bétail et la volaille (3.8%) et des huiles végétales (3.6%). L'indice du groupe des produits animaux a diminué de 2.6%; il est passé de 503.2 (chiffre rectifié) à 490.0, par suite des baisses de prix du bétail (8.4%), des viandes fraîches (6.5%), des peaux (6.3%), et des oeufs et du cuir (3.8%). Le groupe des produits textiles a enregistré une baisse de 0.1% avec une diminution de 9.8% pour les tissus de rayonne et de 5.0% pour les fils de coton.

Le groupe des produits du fer a augmenté de 2.8% entre janvier et février; il est passé de 482.9 (chiffre rectifié) à 496.2, par suite des hausses de prix du fil de fer (7.4%), des produits de laminage (4.7%) et des produits des fonderies de fer et de l'industrie des tubes et tuyaux d'acier (2.7%). L'indice du groupe des minéraux non métalliques a augmenté de 1.9%; il est passé de 370.1 (chiffre rectifié) en janvier à 377.1 en février, par suite des hausses de prix observées pour la chaux (11.9%), le sable et le gravier (9.8%), l'argile et les produits connexes (7.5%) ainsi que l'amiante et ses produits (6.3%). Le groupe des produits du bois a augmenté de 1.8%; l'indice est passé de 604.7 (chiffre rectifié) à 615.7, par suite surtout de l'augmentation du prix du sapin (7.3%) du cèdre (5.7%), de l'épinette et de la pruche (3.8%). L'indice du groupe des métaux non ferreux a augmenté de 1.7%, avec des hausses du prix du nickel et de l'argent. Les produits chimiques ont augmenté de 1.4%; l'indice est passé de 377.0 (chiffre rectifié) en janvier à 382.3 en février.

Security Price Indexes (1961=100)

The investors' index of common stock prices increased 8.5% to 153.3 in February from 141.3 in January. Of the three major groups, industrials increased 8.2% to 156.5, utilities 8.5% to 132.3 and finance 10.0% to 168.9. In industrials, all thirteen sub-groups increased. Construction registered the largest increase of 18.7% to 142.2. All utilities sub-groups advanced, ranging from 10.8% for transportation (315.0) to 3.7% for telephone (94.3). The 10.0% increase in the finance index was due to increases of 11.2% to 200.2 in banks and 6.0% to 119.8 in investments and loans.

The mining index moved up 13.7%, in the same period. Golds and base metals increased 18.2% and 7.6% respectively to 213.3 and 76.9.

Of the two supplementary indexes, uraniums advanced 10.6% to 239.6 and primary oils and gas moved up 22.0% to 300.4.

The preferred stock index increased 7.6% to 62.6 in February from 58.2 in January.

Canadian Farm Products Index (1935-39=100)

The price index of Canadian farm products at terminal markets decreased 4.4% to 458.1 in February from the revised January index of 479.3. The animal products index decreased 5.9% to 527.0 from the revised January index of 60.1 due to lower prices for steers and eggs on both markets, and for raw wool, lambs and calves in the West. Price increases were shown for cheesemilk, fluid milk and hogs on both markets, and for butterfat in the West. Higher prices in the East were shown for calves, raw wool, lambs and poultry.

The field products index declined 2.3% to 389.2 from 398.5 due to lower prices for corn, barley, oats and tobacco in the East, for flax and hay in the west, and for potatoes and beets on both markets. Higher prices were shown for hay and wheat in the East.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, decreased 1.1% to 493.5 in February from the revised January index of 498.9. Prices were lower for nine commodities, higher for nine and unchanged for twelve. Principal changes included decreases for steers, sisal, cottonseed oil, domestic wheat, oats, domestic copper, beef hides, linseed oil and raw cotton while increases were recorded for steel bars, structural shapes, raw

Indices des cours des valeurs mobilières (1961=100)

L'indice des investisseurs pour les cours des actions ordinaires a augmenté de 8.5%; il est passé de 141.3 en janvier à 153.3 en février. Parmi les trois grands groupes, les valeurs industrielles ont augmenté de 8.2%, pour passer à 156.5, les services publics de 8.5%, pour passer à 132.3, et les finances de 10.0%, pour passer à 168.9. Les treize sous-groupes des valeurs industrielles ont enregistré des augmentations. C'est dans la construction que l'on a observé la plus forte augmentation, soit 18.7%, ce qui a porté l'indice à 142.2. Tous les sous-groupes de la catégorie des services publics ont connu des augmentations qui allaient de 10.8% pour les transports (315.0) à 3.7% pour le téléphone (94.3). L'augmentation de 10.0% enregistrée pour les finances était due aux augmentations de l'indice bancaire (11.2% pour 200.2) et des valeurs des placements et des prêts (6.0% pour 119.8).

Au cours de la même période, l'indice des prix des titres miniers a augmenté de 13.7%, à la suite des hausses des aurifères (18.2%) et des métaux communs (7.6%) qui sont passés respectivement à 213.3 et 76.9.

Pour ce qui est des deux indices supplémentaires, on a observé une augmentation de 10.6% pour l'uranium qui est passé à 239.6 et de 22.0% pour le pétrole et le gaz primaires qui sont passés à 300.4.

L'indice des actions privilégiées a augmenté de 7.6% pour passer de 58.2 en janvier à 62.6 en février.

Indices des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a diminué de 4.4%; il est passé de 479.3 (chiffre rectifié) en janvier à 458.1 en février. L'indice des produits animaux a diminué de 5.9%, passant de 560.1 (chiffre rectifié) en janvier à 527.0 en février, par suite des baisses de prix enregistrées pour les bouvillons et les oeufs sur les deux marchés, et pour la laine brute, les agneaux et les veaux sur le marché de l'Ouest. On a enregistré des hausses du prix du lait de fromagerie, du lait de consommation et des porcs sur les deux marchés, et des matières grasses dans l'Ouest. Dans l'Est, les augmentations ont touché les veaux, la laine brute, les agneaux et la volaille.

L'indice des produits de grande culture a diminué de 2.3%, passant de 398.5 à 389.2, par suite des baisses de prix du maïs, de l'orge, de l'avoine et du tabac dans l'Est, du lin et du foin dans l'Ouest et des pommes de terre et du seigle sur les deux marchés. Dans l'Est, on a enregistré des hausses du prix du foin et du blé.

Indice des prix de trente matières industrielles (1935-39=100)

L'indice des prix de trente matières industrielles, calculé comme moyenne géométrique non pondérée, a diminué de 1.1%, passant de 498.9 (chiffre rectifié) en janvier à 493.5 en février. Neuf marchandises ont baissé, neuf ont augmenté et les douze autres n'ont pas varié. Les principales variations englobent des diminutions pour les bouvillons, le sisal, l'huile de coton, le blé canadien, l'avoine, le cuivre canadien, les peaux de boeuf, l'huile de lin, et le coton brut, tandis qu'on enregistrerait des hausses pour

rubber, crude oil, raw sugar, hogs, iron ore, bleached sulphite pulp and spruce lumber.

Farm Input Price Index, First Quarter 1975

The Farm Input Price Index for Canada (1961 = 100) increased 1.1% in the first quarter to 206.6 from 204.3 in the fourth quarter of 1974. The eastern index declined 0.5% to 208.5 from 209.6 in the fourth quarter. The western index increased 3.1% to 204.4 from 198.2.

In the latest 12 months, the index rose 10.2% in Canada 9.0% in the East and 11.6% in the West.

The latest index showed higher prices for mortgage replacement and operation and seed. Prices were lower for feed and for feeder cattle.

The Consumer Price Index

The Consumer Price index for Canada (1961 = 100) rose 0.8% to 178.0 in February from 176.6 in January. Though all main components moved up in the latest month, the CPI registered a smaller advance than in the corresponding period last year, mainly because of less rapidly rising food prices. Contrasting with 1974 when food price increases regularly outpaced those of other parts of the consumer budget, so far in 1975 the indexes for Food and for All-Items excluding Food are rising at similar rates. Between February 1974 and February 1975 the total CPI registered an 11.8% increase.

The main impetus behind the 0.8% rise in retail food prices in the latest month was generally higher quotations for fresh fruit and vegetables (with the exception of potatoes) and increased prices for milk, butter and other dairy products as well as for most cereal and bakery items. Partially offsetting these advances, beef prices moved down, on average, by 6.5% in early February to reach the level at which they stood in mid-1973. Sugar also continued to move downwards in price; though still retailing at about double its price of a year earlier it as declined by 23% from its late-1974 peak.

The rise of 0.7% in the index for All-Items other than Food was mainly attributable to widespread increases in insurance rates for automobiles as well as for dwellings and for household effects. Higher quotations for other items required to run the home, such as cleaning supplies, also contributed to this rise. In addition, notably higher prices were registered for movie admission, for alcoholic beverages consumed outside the home, and for magazine subscriptions. In contrast, clothing prices, on average, have remained relatively stable over the past several months.

The Consumer Price Index reclassified by goods and services offers another view of the incidence of price change. Between January and February, the index for services ad-

les barres d'acier, les profilés de charpente, le caoutchouc brut, le pétrole brut, le sucre brut, les procs, le minéral de fer, la pâte au sulphite blanchie et le bois d'épinette.

Indice des prix des entrées dans l'agriculture, 1er trimestre 1975

L'indice canadien des entrées dans l'agriculture (1961 = 100) a progressé de 1.1% au cours du 1er trimestre, passant de 204.3 au 4e trimestre de 1974 à 206.6. Dans l'Est, l'indice a décliné de 0.5%, passant de 209.6 au 4e trimestre de 1974 à 208.5. Dans l'Ouest il augmentait de 3.1%, passant de 198.2 à 204.4.

Au cours de 12 derniers mois, l'indice a augmenté de 10.2% au Canada, soit de 9.0% dans l'Est de 11.6% dans l'Ouest.

La hausse de l'indice est surtout attribuable à la hausse des prix des créances hypothécaires, de la machinerie agricole, des véhicules automobiles et des graines de semences. On signale des baisses de prix pour les aliments pour animaux et bovins d'embouche.

L'indice des prix à la consommation

L'indice des prix à la consommation pour le Canada (1961 = 100) a augmenté de 0.8%, passant de 176.6 en janvier à 178.0 en février. Tous les éléments principaux de l'I.P.C. ont enregistré une hausse le mois dernier, mais l'augmentation a été moins marquée que durant la période correspondante de l'année dernière en raison surtout d'un ralentissement de la hausse du prix des aliments. Alors qu'en 1974 la hausse des prix des aliments dépassait régulièrement celle enregistrée pour les autres éléments de l'indice des prix à la consommation, jusqu'ici en 1975 l'indice des prix des aliments et celui de tous les éléments sauf les aliments ont augmenté à peu près au même rythme. De février 1974 à février 1975, l'augmentation totale de l'I.P.C. a été de 11.8%.

La raison principale de l'augmentation de 0.8% du prix des aliments au détail le mois dernier a été la hausse générale du prix des fruits et légumes frais (à l'exception des pommes de terre), du lait, du beurre et des autres produits laitiers ainsi que de la plupart des céréales et produits de boulangerie. Par contre, ces hausses ont été partiellement compensées par une baisse des prix du bœuf, qui ont diminué en moyenne de 6.5% au début de février pour se situer à un niveau équivalent à celui du milieu de 1973. Le prix du sucre a aussi continué à diminuer; bien que le prix de détail soit encore le double de ce qu'il était il y a un an, il a diminué de 23% par rapport au prix record enregistré à la fin de 1974.

L'augmentation de 0.7% de l'indice des prix de tous les éléments à l'exception des aliments est attribuable principalement à une hausse générale des primes d'assurance pour les automobiles, les biens immobiliers et les effets ménagers. Les hausses de prix d'autres articles nécessaires à l'entretien de la maison tels que les fournitures d'entretien ménager également ont contribué à la hausse de l'indice. En outre, il y a eu une hausse sensible du prix d'entrée au cinéma, des boissons alcooliques consommées à l'extérieur et des tarifs d'abonnements à des revues. Par contre, le prix des vêtements sont demeurés en moyenne au même niveau depuis plusieurs mois.

L'indice des prix à la consommation redistribué par biens et services présente un autre aspect de l'évolution des prix. Dès janvier à février, l'indice des services a progressé de 1.3%, ce qui

anced by 1.3%, the sharpest one-month rise in recent years, and more than twice the 0.6% increase in the index for goods. The durable goods index moved down for the first time in two years, dropping 0.4% mainly due to the effect of manufacturers' rebates on selected new car purchases which contributed to a 0.7% decline in the automobiles index.

On a seasonally adjusted basis, the January to February advance in the All-Items CPI was 0.7% which, with the exception of the 0.5% increase the month before, was the lowest month-to-month rise since last July. The seasonally adjusted Food index moved up 0.6% in February, about half the average monthly rate of increase of the previous year.

constitue l'augmentation mensuelle la plus considérable enregistrée ces dernières années et le double de l'augmentation de l'indice des biens; celle-ci a été de 0.6%. L'indice des biens durables a enregistré une diminution pour la première fois depuis deux ans; il a baissé de 0.4% en raison surtout des rabais offerts par les fabricants de certains modèles de voitures neuves, ce qui a contribué à faire baisser de 0.7% l'indice des prix des automobiles.

Après désaisonnalisation, la hausse de janvier à février de l'indice d'ensemble des prix à la consommation s'établit à 0.7%, augmentation qui, à l'exception de celle du mois précédent qui était de 0.5%, a été la plus faible depuis juillet dernier. L'indice désaisonnalisé des aliments a grimpé de 0.6% en février, soit à peu près la moitié de l'augmentation mensuelle moyenne de l'année précédente.

Industry selling price index manufacturing(7) — Indice de prix de vente dans l'industrie: industries manufactu- rières(7)	1971 119.4	119.8	120.3	121.2	121.2	121.7	122.3	122.4	122.5	122.6	122.7	123.2	121.6
	1972 124.5	125.3	125.9	126.5	126.7	126.9	127.4	127.8	128.5	129.0	129.7	130.9	127.4
	1973 133.1	134.6	136.6	138.2	139.5	141.0	143.0	147.9	147.7	149.0	150.4	152.9	142.7
	1974 157.4	160.1	162.2	165.5	167.9	169.9	173.1	175.9	178.0	179.7	182.6	182.7	
	1975 185.6	186.5											

(1) Indexes for 1973, 1974 and 1975 are subject to revision. — Les indices pour 1973, 1974 et 1975 sont sujets à révision.

(2) This industry was changed in commodity content, price sample and weights in accordance with significant changes within the industry. Figures are revised from January 1971 to date. — La composition en marchandises, les échantillons de prix et les mesures de poids ont changé dans cette industrie conformément à des changements importants survenus dans l'industrie même. Les chiffres sont révisés de janvier 1971 à aujourd'hui.

(3) Effective January 1973 changes have been made in the calculation of this index. For details see page 88. — A compter de janvier 1973, on a modifié le calcul de cet indice. Pour plus de détails, voir la page 88.

(4) An extensive revision of the weight and price sample (including the incorporation of goods purchased and resold in same condition as purchased) necessitated by developments in the industry's production pattern since 1961 have resulted in the introduction of new price indexes and a discontinuity in the industry price index. — Une révision approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix industriels.

	Old series — Ancienne série	New series — Nouvelle série
December — 1970 — Décembre	95.1	92.3
January — 1971 — Janvier	95.1	92.1
Average — 1971 — Moyenne	95.2	91.8

(5) This series has been revised from January 1969 forward. An expanded list of establishments and commodities has been selected and prices for these have been aggregated to a total industry index using 1971 shipments data. The price quotations are, in general, of an improved quality. Selected commodity data on a 1971 time and weight base, are available on request. — Les chiffres de cette série ont été révisés à partir de janvier 1969. Une liste augmentée des établissements et des produits a été établie, et les prix de ces produits ont été agrégés pour former un indice total de l'activité économique à partir des données sur les livraisons de 1971. De manière générale, le calcul des prix est plus fiable. Les utilisateurs peuvent obtenir sur demande des données sur certains produits utilisant les facteurs de pondération de 1971 et dont la période de référence est 1971.

(6) Motor gasoline prices are 'List' and may not be a reflection of actual transaction prices. — Les prix de l'essence sont des prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction.

(7) Gross weighted, including inter-industry shipments. For explanation see page 88. — Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication voir page 88.

TABLEAU 6. Indices des prix de gros de certains produits bruts(1)

1935-39=100

Primary commodities - Produits bruts	Months - Mois				Annual averages - Moyenne annuelle		
	Feb. 1975	Jan. 1975	Feb. 1974	Jan. 1974	1974	1973	1972
	Fév.	Janv.	Fév.	Janv.			
Coffee, green - Café vert	494.7	492.9	502.5	483.7	492.6	468.0	358.1
Copper, electrolytic - Cuivre électrolytique ...	590.9	652.6	689.9	689.9	730.3	594.4	474.3
Cotton, raw - Coton brut	395.7	398.0r	572.4	611.5	526.8	389.7	330.0
Eggs - Oeufs	200.2	208.2	218.8	217.3	217.7	196.1	136.2
Fruits, fresh - Fruits frais	243.0	257.2	299.4	269.1	284.3	263.9	223.5
Grains - Céréales	517.5	575.1	575.8	573.5	562.9	406.1	205.7
Hides and skins - Cuirs et peaux vertes	105.6	112.7	291.7	299.1	220.2	323.9	294.1
Lead, electrolytic - Plomb électrolytique	493.6	492.0	495.7	444.0	500.2	367.0	323.2
Livestock - Bétail	552.4	603.2	616.0	646.5	611.1	606.7	458.7
Onions - Oignons	263.1	260.9r	434.7	323.2r	328.7	476.7	259.8
Potatoes - Pommes de terre	251.9	315.7	606.7	518.1	626.7	485.9	219.1
Rubber, raw - Caoutchouc brut	202.1	188.9	323.2	336.4	246.8	222.7	114.0
Scrap iron and steel - Déchets de fer et d'acier	602.2	605.4r	561.3	518.5	740.6	388.8	268.1
Silver - Argent	1151.3	1132.2	1404.5	911.3	1180.8	663.3	430.6
Steers - Bouvillons	615.2	750.7	788.3	857.4	803.9	645.3	597.6
Sugar, raw - Sucre brut	1201.8	1181.6	676.3	523.3	943.5	321.0	253.9
Tin - Etain	718.3	718.3	649.8	593.0	764.4	435.6	338.8
Wool, raw domestic - Laine brute indigène	227.6	231.5	439.9	444.2	334.3	492.5	201.7
Wool, raw, imported - Laine brute importée	217.1	215.2	363.5	367.3	284.4	379.6	196.8
Zinc, prime, western - Zinc de première qualité, de l'Ouest	822.8	822.8	689.4	689.4	767.2	522.6	411.6

(1) All indexes for 1973, 1974 and 1975 are subject to revision. - Les indices pour 1973, 1974 et 1975 sont sujets à révision.

TABLE 7. Wholesale Prices of Selected Commodities
(All prices given in Canadian funds)

TABLEAU 7. Prix de gros de certains produits
(en dollars canadiens)

Commodity - Produit	Months - Mois				Annual averages - Moyenne annuelle		
	Feb. 1975 Fév.	Jan. 1975 Janv.	Feb. 1974 Fév.	Jan. 1974 Janv.	1974	1973	1972
					dollars		
<u>Vegetable products - Substances végétales:</u>							
Barley, No. 1 feed, bu. - Orge, no 1 (four- ragère), le boisseau	2.64	2.89	2.63	2.52	2.75	1.95	1.13
Oats, No. 2 C.W., bu. - Avoine, no 2 O.C., le boisseau	1.84	2.01	1.83	1.68	1.89	1.38	.76
Potatoes, No. 1 Saint John, 75-lb. bag - Pommes de terre, no 1, Saint-Jean, le sac de 75 livres	2.70	3.00	7.65	6.00	7.08	5.73	2.68
Sugar, granulated, std., Montreal, 100-lb. bag - Sucre granulé, ordinaire, Montréal, le sac de 100 livres	48.10	48.85r	28.80	22.20r	39.78	13.73	13.24
Wheat, No. 1 C.W. Red Spring 13.5% Protein, bu. - Blé 1. C.O. Rouge de printemps 13.5 % protéiné	5.16	5.72	5.71	5.81	5.58	3.99	.
<u>Animal products - Produits animaux:</u>							
Butter, prints, 1st grade, Montreal, lb. - Beurre en mottes, 1re qualité, à Montréal, la livre94	.89	.75	.75	.83	.74	.71
Eggs, grade "A", large, Toronto, doz. - Oeufs, Qualité "A", gros, à Toronto, la douzaine ..	.68	.71	.75	.75	.75	.70	.45
Hides, packer, light native steers, lb. - Peaux à l'abattoir, bouvillons légers indi- gènes, la livre17	.17	.37	.37	.27	.36	.33
Hogs, Toronto (bonus excluded) 100-lb. - Porcs, Toronto (prime exclue), les 100 livres	56.30	55.49	53.49	53.29	50.59	54.85	37.44
Steers, Aver. 1,2&3, Toronto, 100-lb. - Bou- villons, Moy. 1,2&3, Toronto, les 100 livres	40.50	48.00	49.00	53.00	50.36	36.79	..
<u>Textile products - Produits textiles:</u>							
Wool, raw, Australian, 64's, clean, lb. - Laine brute d'Australie, 64, propre, la livre	1.44	1.44	2.44	2.44	1.82	2.45	1.21
Wool, raw, Eastern, domestic, lb. - Laine brute de l'Est, indigène, la livre50	.47	.81	.81	.63	.81	.39
<u>Wood products - Produits du bois:</u>							
Shingles, asphalt, 12" x 36", 100 sq. ft. - Bardeaux d'asphalte, 12" x 36", les 100 pieds carrés	11.20	11.09	10.10	10.10	10.68	8.61	7.78
<u>Non-ferrous metals products - Produits des métaux non ferreux:</u>							
Copper, electrolytic, domestic, 100-lb. - Cuivre électrolytique, indigène, 100 livres	63.38	70.00	74.00	74.00	78.33	63.75	50.88
Zinc, high grade, electrolytic, 100-lb. - Zinc, Qualité supérieure, électrolytique, 100 livres	37.50	37.50	31.50	31.50	35.00	24.02	19.10
<u>Chemical products - Produits chimiques:</u>							
Sodium carbonate, (soda ash) 58%, 100-lb. - Carbonate de soude (cendre de soude) 58 %, les 100 livres	4.80	4.80	3.50	3.50	3.85	2.94	2.65
Sulphuric acid, 66 Baume, 2000-lb. ton - Acide sulfurique, 66 Baume, la tonne (2,000 livres)	34.00	34.00	32.00	31.00	31.92	31.00	31.00

All-items Consumer Price Index converted to 1949=100, February 1975 - L'indice des prix à la consommation de tous les éléments converti à 1949=100, février 1975 230.0

(1) Indexes prior to May 1973 incorporate 1957 expenditure weights, those for May 1973 forward are based on 1967 expenditures. The revised series is linked to its predecessor at April 1973. For further explanation, see page 96. - Avant mai 1973 les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957; à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 96.

34	Mar. - Mars						
35	Apr. - Avril						
36	May - Mai						
37	June - Juin						

- (1) Indexes prior to May 1973 incorporate 1957 expenditure weights (1964 expenditure weights for Québec and Thunder Bay); those for May 1973 forward are based on 1967 expenditures. The revised series are linked to their predecessors at April 1973. For further explanation see page 96.
- (2) As of January 1975, the separate consumer price indexes for Saskatoon, Regina, Edmonton and Calgary supersede the combined-cities series. Users of the combined series are therefore advised to switch to the separate city indexes which are available only from April 1973. (The historical data for the combined-cities series are presented in Table 11A). Should users have any questions, contact the Retail Prices Section or consult the Retail Prices and Living Costs Service Bulletin, Catalogue 62-005, Volume 3, No. 5.
- (3) Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes so that the Canada and regional city shelter indexes now contain the same elements. See also page 97.
- (4) Includes shelter and household operation. Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes, so that the Canada and regional city shelter indexes now contain the same elements. See also page 97.

(1) Avant mai 1973, les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957 (pour Québec et Thunder Bay sur les dépenses de 1964); à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 96.

(2) A partir de janvier 1975, les indices séparés des prix à la consommation pour Saskatoon, Regina, Edmonton et Calgary remplacent les séries combinées. Nous conseillons donc aux utilisateurs des séries combinées d'utiliser les séries des indices séparés qui sont disponibles depuis avril 1973. (Les données historiques pour les séries combinées sont publiées au tableau 11A). Si il y a des questions, communiquez avec la section des prix de détail ou consultez le Bulletin de service sur les prix de détail et les coûts de la vie, no 62-005 au catalogue, volume 3, no. 5.

(3) Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations urbaines; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 97.

(4) Comprend le logement et l'entretien du ménage. Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations urbaines; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 97.

- (1) Indexes prior to May 1973 incorporate 1957 expenditure weights; those for May 1973 forward are based on 1967 expenditure. The revised series are linked to their predecessors at April 1973. For further explanation see page 96. - Avant mai 1973, les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957 à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 96.
- (2) As of January 1975, the separate consumer price indexes for Saskatoon, Regina, Edmonton and Calgary supersede the combined-cities series. Users of the combined series are therefore advised to switch to the separate city indexes which are available only from April 1973. Should users have any questions, contact the Retail Prices Section or consult the Retail Prices and Living Costs Service Bulletin, Catalogue 62-005, Volume 3, No. 5. - A partir de janvier 1975, les indices séparés des prix à la consommation pour Saskatoon, Regina, Edmonton et Calgary remplacent les séries combinées. Nous conseillons donc aux utilisateurs des séries combinées d'utiliser les séries des indices séparés qui sont disponibles depuis avril 1973. Si il y a des questions, communiquez avec la section des prix de détail ou consultez le Bulletin de service sur les prix de détail et les coûts de la vie, no 62-005 au catalogue, volume 3, no 5.
- (3) Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes so that the Canada and regional city shelter indexes now contain the same elements. See also page 97. - Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 97.
- (4) Includes shelter and household operation. Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes, so that the Canada and regional city shelter indexes now contain the same elements. See also page 97. - Comprend le logement et l'entretien du ménage. Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations urbaines; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 97.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR PRICE SERIES

Industrial Price Indexes

Industry Selling Price Indexes (1961 = 100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue 62-528.

Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

"Iron & Steel Mills:" 12-2910

The principal change in the index is as follows: From January 1973 forward prices collected from the various companies are, for any given commodity, weighted together in a way that reflects the relative importance of each company's shipments of the commodity to the total shipments of that commodity by all companies in the year 1971. In addition prices for stainless products were deleted from the series bars hot rolled etc. (12-2910-082), in September 1972 and from the series sheets and strip cold rolled etc. (12-2910-084) in October 1972. Prices for stainless products, however, are included in the price index for the iron and steel mills industry.

The concept of price change measured is net return to mill.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES SÉRIES DE PRIX

Indices des prix industriels

Indices des prix de vente dans l'industrie (1961 = 100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", (n° 62-528 au catalogue).

Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

"Sidérurgie:" 12-2910

Le principal changement apporté à l'indice est le suivant: depuis janvier 1973, les prix recueillis auprès des différentes sociétés sont, pour tout produit, pondérés de manière à refléter l'importance relative des livraisons de chaque société par rapport aux livraisons totales de ce produit par toutes les sociétés en 1971. En outre, les prix des produits en acier inoxydable ont été enlevés de la série "barres, laminés à chaud, etc." (12-2910-082) en septembre 1972 et de la série "tôles et feuillards, laminés à froid etc." (12-2910-084) en octobre 1972. Ils sont toutefois compris dans l'indice des prix de l'industrie de la sidérurgie.

Le concept de la mesure de la variation des prix se fonde sur le revenu net à l'usine.

Purchase Price Indexes of Secondary Metals (1969 = 100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1935-39 = 100)

Prices for Western grains used in the index are Canadian Wheat Board buying prices for grain in store at Vancouver or Thunder Bay.

Final payments for the crop year August 1973 - July 1974 were announced on December 24, 1974 and have been incorporated into the index. Estimates for the total 1974-1975 payments are based on the initial payment plus half of the 1973-74 crop year final payment.

Indices du prix d'achat des métaux de deuxième fusion (1969 = 100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice des prix des produits agricoles canadiens (1935-39 = 100)

Les prix des céréales de l'Ouest utilisés dans l'indice sont les prix d'achat de la Commission canadienne du blé pour les céréales entreposées à Vancouver ou à Thunder Bay.

Les paiements finals pour la campagne agricole août 1973 - juillet 1974 ont été annoncés le 24 décembre 1974 et ont été incorporés à l'indice. Les estimations des paiements totaux de 1974-1975 sont basées sur le paiement initial plus la moitié du paiement final de la campagne agricole 1973-1974.

General Wholesale Index (1935-39 = 100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: *Wholesale Price Indexes 1913-50* (Reference Paper No. 24) *Prices and Price Indexes 1949-52* (Vol. 23) (Catalogue 62-501).

Thirty Industrial Materials, (1935-39 = 100)

The price index of thirty industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{\frac{p^1}{tN} \times \frac{p^2}{tN} \times \frac{p^3}{tN} \times \dots \times \frac{p^{30}}{tN}}$$

$$\sqrt[30]{\frac{p^1}{t \ 35-39} \times \frac{p^2}{t \ 35-39} \times \frac{p^3}{t \ 35-39} \times \dots \times \frac{p^{30}}{t \ 35-39}}$$

Indice général des prix de gros (1935-39 = 100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter *Wholesale Price Indexes 1913-50* (Reference Paper No. 24) et *Prices and Price Indexes 1949-52* (Vol. 23) (n° 62-501 au catalogue).

Indice des prix de trente matières industrielles (1935-39 = 100)

L'Indice des prix de trente matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

$$\sqrt[30]{\frac{p^1}{tN} \times \frac{p^2}{tN} \times \frac{p^3}{tN} \times \dots \times \frac{p^{30}}{tN}}$$

$$\sqrt[30]{\frac{p^1}{t \ 35-39} \times \frac{p^2}{t \ 35-39} \times \frac{p^3}{t \ 35-39} \times \dots \times \frac{p^{30}}{t \ 35-39}}$$

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering 5 and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyre's type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

The Consumer Price Index for Canada (1961 = 100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index may not represent closely the experience of any one specific family within the group, nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families — (a) living in cities with over 30,000 population, (b) ranging in size from two to six persons and (c) with annual incomes in 1967 ranging from \$4,000 to \$12,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In January 1969, the time base was updated to 1961 = 100 from 1949 = 100; details are contained in the January 1969 issue of the monthly publication *Prices and Price Indexes*, Catalogue 62-002.

From March 1961 to April 1973 inclusive, the weights or relative importance of the items in the Consumer Price Index were based on 1957 family expenditure patterns; details of these weights can be found in *The Consumer Price Index for Canada (1949 = 100) (Revision Based on 1957 Expenditures)*, Catalogue 62-518. A subsequent weight revision to reflect 1967 family expenditure patterns (and within the food component, 1969 detailed spending habits) was introduced in May 1973. Full details of the latest weighting pattern and other background information on the Consumer Price Index is available in the occasional paper *The Consumer Price Index for Canada (1961 = 100) (Revision Based on 1967 Expenditures)*, Catalogue 62-539.

Le choix des matières servant au prélèvement des prix se rapportant à des groupes tels que prix "stables", (12 matières), prix des aliments (5 matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérées comme intrants importants dans l'industrie.

L'indice des prix à la consommation pour le Canada (1961 = 100)

L'indice des prix à la consommation mesure le taux de variation dans le temps du coût à l'achat d'un "panier" constant de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" est constitué par des biens et des services en quantité de qualité constantes; il comprend uniquement les biens et services qui ont un prix et dont les prix peuvent être observés de façon continue.

L'indice se rapporte à un groupe vaste, mais délimité, de familles urbaines et rend compte des changements de prix auxquels ce "groupe cible" doit faire face. L'indice peut ne pas suivre de près les changements de prix touchant une famille en particulier de ce groupe, pas plus que les changements de prix touchant d'autres groupes de la population dont le revenu, la taille de familles ou les lieux de résidence diffèrent sensiblement. Le groupe cible auquel se rapporte l'indice actuel se compose de familles — a) vivant dans des villes de plus de 30,000 habitants, b) dont la taille est comprise entre deux et six personnes, et c) dont les revenus annuels en 1967 étaient compris entre \$4,000 et \$12,000. Afin de mesurer les effets de changements de prix sur le coût des biens et services achetés par ces familles, l'indice des prix à la consommation suit les mouvements de quelque 300 articles.

L'histoire des indices de prix à la consommation au Canada remonte au début des années 1900, et elle comprend des révisions périodiques des périodes de référence de base de l'indice ainsi que des schémas de pondération. En janvier 1969, on a aligné la base de temps de 1949 = 100 à 1961 = 100; d'autres renseignements figurent dans l'édition de janvier 1969 de la publication mensuelle *Prix et indices des prix* (n° 62-002 catalogue).

De mars 1961 à avril 1973 inclusivement, les poids, l'importance relative des éléments de l'indice des prix à la consommation étaient basés sur les tendances de dépense des familles pour 1957; on peut trouver le détail de ces poids dans la publication *The Consumer Price Index for Canada (1949 = 100) (Revision based on 1957 Expenditure)*, (n° 62-518 au catalogue). En mai 1973, on a introduit une nouvelle révision des poids à prendre en compte les tendances de consommation des familles en 1967 (et, dans l'élément aliments, les habitudes détaillées de dépense en 1969). Le détail complet du dernier schéma de pondération et d'autres renseignements fondamentaux sur l'indice des prix à la consommation figurent dans la publication hors série *L'indice des prix à la consommation du Canada (1961 = 100) (Révision fondée sur les dépenses de 1967)*, (n° 62-539 catalogue).

The Consumer Price Index for Canada Reclassified by Goods and Services

A revised supplementary classification system, entitled "The Consumer Price Index Reclassified by Goods and Services", was introduced in May 1973 with the revision of the weighting pattern of the Consumer Price Index to reflect 1967 expenditures.

This supplementary classification introduces an improved framework for regrouping the items which comprise the Index. In it, all items in the C.P.I. have been reclassified into two major categories — goods and services — according to their most characteristic or dominant attribute. The goods component has been sub-divided into three categories: durable, semi-durable, and non-durable goods, according to expected average useful lifetime criteria. Services, on the other hand, have been sub-divided according to broad functional categories.

Historical series conforming to the revised classification system replace the previously published supplementary indexes and are available, with explanatory notes, for the period January 1961 to April 1973 inclusive, in *Retail Prices and Living Costs Service Bulletin*, Catalogue 62-005, Vol. 2 No. 7.

Consumer Price Indexes for Regional Cities (1961 = 100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). Except for their individual weighting systems, and the fact that they are based on fewer quotations, the regional city indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada.

Prior to May 1973, the city indexes may have underestimated the degree of price movements occurring because the shelter component of the city indexes moved on the basis of changes in rents only, whereas changes in both rents and homeownership costs were, and continue to be, included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and the all-items indexes for cities tended to underestimate somewhat the rates of price increase particularly over longer periods. From May 1973 forward, however, homeownership costs are included in the regional city consumer price indexes so that the Canada and the regional city indexes are consistent in terms of their content and treatment.

Each city index is designed to measure the influence of changes in retail prices taking place in the locality specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in the particular area specified.

In using the city indexes, it should be remembered that they do not in any way indicate whether price levels are higher or lower in one city than in another. Rather, they measure, within each city, the percentage change in consumer prices from the base period to subsequent time periods.

L'indice des prix à la consommation au Canada reclassé par biens et services

Un système révisé de classification supplémentaire, intitulé "L'indice des prix à la consommation au Canada reclassé par biens et services", a été introduit en mai 1973 en même temps que la révision des schémas de pondération de l'indice des prix à la consommation afin de rendre compte des dépenses de 1967.

Cette classification supplémentaire regroupe dans un cadre amélioré les éléments de l'indice. En effet, tous les éléments de l'I.P.C. ont été reclassés dans deux grandes catégories, soit la catégorie des biens et celle des services, suivant leur caractère le plus distinctif ou dominant. La catégorie des biens présente trois sous-catégories (biens durables, biens semi-durables, biens non durables) déterminées en fonction de la vie utile moyenne prévisible. D'autre part, on a réparti les services suivant quelques grandes catégories fonctionnelles.

Les séries historiques conformes au système révisé de classification remplacent les indices supplémentaires publiés auparavant, et on peut les trouver, avec des notes explicatives, pour la période janvier 1961-avril 1973, dans la publication "Prix de détail et coût de la vie" - Bulletin de service, n° 62-005 au catalogue, vol. 2 N° 7.

Indices des prix de la consommation dans certaines agglomérations urbaines (1961 = 100)

Ces indices sont publiés tous les mois dans la présente publication (Tableau 11). À l'exception de leurs systèmes de pondération particuliers, et de ce qu'ils font appel à moins de prix, ces indices sont en général semblables par leur concept et par les éléments qui les composent à l'indice des prix à la consommation au Canada.

Avant mai 1973, les indices des agglomérations ont pu sous-estimer le degré de changement des prix, parce que l'élément logement des indices des agglomérations ne variait qu'en fonction de l'évolution des loyers, tandis que l'indice pour le Canada ne comprenait et ne comprend toujours que les changements des loyers et les coûts de propriété. Comme les coûts de propriété ont augmenté plus vite que les loyers, les indices du logement et l'ensemble pour les villes tendent à sous-estimer quelque peu les taux de croissance des prix, principalement sur des périodes plus longues. À partir de mai 1973, cependant, les coûts de propriété sont inclus dans les indices de prix à la consommation des agglomérations urbaines, de sorte que les indices pour le Canada et les agglomérations urbaines sont homogènes à la fois pour ce qui est de leur contenu et de leur traitement.

Chaque indice de ville est conçu de manière à mesurer l'effet des changements des prix de détail dans la ville en question sur les prix d'un panier constant de biens et de services représentant le niveau de consommation d'un groupe représentatif de familles dans cette ville.

Le lecteur devra toujours garder en mémoire que ces indices n'indiquent en aucune façon si les prix sont plus élevés dans une ville que dans une autre. Ils mesurent plutôt dans chaque ville le taux de variation des prix à la consommation à partir de la période de base et des périodes subséquentes.

For comparisons of retail price differentials between cities, see Table 14 of this publication and the relevant explanatory notes.

Purchasing Power of the 1961 Consumer Dollar

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases, and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

The purchasing power of the consumer dollar, in other words, bears an inverse relationship to the movement of the Consumer Price Index. For example, by January 1973, compared with their average level in 1961, consumer prices as measured by the C.P.I. were 44.5% higher, so that an equivalent basket of goods and services which could be purchased for \$100.00 in 1961 would cost the consumer \$144.50 in January 1973. Each consumer dollar in January 1973, therefore, buys less than in 1961, and the amount of its reduced value can be expressed in terms of the inverse consumer price movement. Thus, in January 1973 the purchasing power of the 1961 consumer dollar declined to approximately 69 cents ($\$1.00 \times 100.0/144.5 = \0.69).

Users of the tabulation which shows the purchasing power of the 1961 consumer dollar at different points in time (Table 12) should note that, as in the case of the Consumer Price Index from which it is derived, it may not represent closely the experience of any one specific family within the large group to which the C.P.I. relates; nor should it be expected to reflect the experience of other population groups whose income, family size and place of residence are characteristically different. It should also be noted that, like the C.P.I., it is not directly affected by changes in income tax, unemployment insurance premiums and certain other security payments.

Measuring the Purchasing Power of Wages

Changing consumer price levels affect the amounts of consumer goods and services which a dollar will buy, and average wages, insofar as they are spent on such items will, of course, be affected in the same way. A wage measurement which takes the change of consumer prices into account, can be calculated by reducing actual average wages by the percentage rise in consumer price levels, or increasing them by the amount price levels fall. Wages thus adjusted may be used to indicate the comparative purchasing power of average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. On the

Pour étudier les différences de prix de détail entre les villes, il faut consulter le tableau 14 de la présente publication et les notes explicatives qui l'accompagnent.

Pouvoir d'achat du dollar de consommation 1961

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente, et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie, et la baisse des prix est liée à la hausse du pouvoir d'achat.

Le pouvoir d'achat du dollar de consommation, en d'autres termes, évolue en raison inverse du mouvement de l'indice des prix à la consommation. Ainsi, en janvier 1973, par rapport au niveau de 1961, les prix à la consommation mesurés par l'I.P.C. avaient progressé de 44.5%, de sorte qu'un panier équivalent de biens et de services qui coûtait \$100 à l'achat en 1961 aurait coûté \$144.50 en janvier 1973 au consommateur. Par conséquent, chaque dollar de consommation en janvier 1973 achète moins qu'en 1961, et l'on peut exprimer le montant de sa valeur réduite en fonction de l'inverse du mouvement des prix à la consommation. Ainsi, en janvier 1973, le pouvoir d'achat du dollar de consommation 1961 était tombé approximativement à 69 cents ($\$1.00 \times 100.0/144.5 = \0.69).

Les utilisateurs du tableau qui indique le pouvoir d'achat du dollar de consommation de 1961 à différentes périodes (Tableau 12) doivent noter que, comme dans le cas de l'indice des prix à la consommation dont il a été tiré, il peut ne pas suivre près le cas d'une famille en particulier faisant partie du grand groupe auquel se rapporte l'I.P.C., pas plus qu'il ne rend nécessairement compte des dépenses d'autres groupes de la population dont les revenus, la taille des familles et les lieux de résidence diffèrent sensiblement. Il faut également noter que, tout comme l'I.P.C., il n'est pas touché directement par les changements de l'impôt sur le revenu, les primes d'assurance-chômage et certains autres paiements d'assistance.

Mesure du pouvoir d'achat des salaires

Les changements du niveau des prix à la consommation affectent les quantités de biens et de services de consommation qu'un dollar peut acheter, et les salaires moyens, dans la mesure où ils sont consacrés à de tels articles, seront naturellement touchés de la même façon. Une mesure des salaires qui prendrait compte les changements de prix à la consommation peut être calculée en réduisant les salaires moyens réels du taux d'accroissement des prix à la consommation, ou en les augmentant dans la proportion égale à la baisse des prix. Les salaires ainsi ajustés peuvent servir à indiquer le pouvoir d'achat comparatif des salaires moyens si les prix à la consommation et les tendances de consommation étaient restés constants. L'exemple suivant montre comment on peut procéder à un ajustement de cette nature.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B, et qu'au cours de la même période un indice des prix à la consommation passe de 100 à 110. Par suite de la hausse des prix à la consommation, \$1 n'achètera pas autant au cours

other hand, the 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$100.00 by the amount of the consumer price index increase. The adjusted average is $\$90.91 ((100.0/110.0) \times \$100)$, which may be referred to as a weekly wage average for week B expressed in the dollars of period A; or it may be said to indicate the level of real weekly wages relative to week A.

The foregoing calculation can be carried a step further to express, in index number form, the relationship between the week A average of \$80.00 and the week B adjusted figure of \$90.91. Assuming the week A average of \$80.00 as an index equal to 100, the week B index becomes 113.6 $((90.91/80.00) \times 100)$. Such an index may be called an index of average weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than they did in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the 25% rise in money wages $((\$100.00 - \$80.00 / \$80.00) \times 100)$.

In Table 13, the index numbers of average weekly wages in manufacturing in current dollar terms (1961 = 100) are calculated by dividing the weekly wages in current dollars by the 1961 average weekly wage in current dollars and multiplying the result by one hundred. For example, the weekly wage index for September 1972 in current dollars (1961 = 100) is 196.4 $((146.23/74.45) \times 100)$. The weekly wages in 1961 dollar terms are determined by dividing the weekly wage in current dollars by the consumer price index for Canada for the month following the month to which the wages relate and multiplying the result by one hundred. Thus, the September 1972 weekly wage in 1961 dollars is 102.98 $((146.23/142.0) \times 100)$. (The wage and the price data both refer to generally similar time periods: current wages for a particular month relate to the last pay periods in that month, while most prices for the consumer price index of the following month are collected in the first week of that month.)

The index numbers of weekly wages in 1961 dollar terms (1961 = 100) are determined by dividing the weekly wages in 1961 dollars by the base (1961) average weekly wage and multiplying the result by one hundred. For example, the September 1972 weekly wage index in 1961 dollar terms (1961 = 100) is 138.3 $((102.98/74.45) \times 100)$.

It should be noted that while the estimates of average wages may reflect the experiences of broad groups of workers in manufacturing fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular population group. Group spending patterns change over periods of time. To the extent that this occurs, wage data adjusted by the consumer price index (which is a "fixed" consumption pattern), will gradually be ren-

la semaine B qu'au cours de la semaine A. Par contre, la hausse de 25% (de \$80 à \$100) va surévaluer la hausse qui s'est produite dans le pouvoir d'achat des salaires hebdomadaires moyens. Cette surévaluation peut être réduite en réduisant le chiffre de \$100 du montant de l'accroissement de l'indice des prix à la consommation. La moyenne ajustée sera \$90.91 $((100.0/110.0) \times 100)$, et que l'on peut désigner comme étant la moyenne du salaire hebdomadaire pour la semaine B exprimée en dollars de la période A; on peut aussi dire qu'elle indique le niveau réel des salaires par rapport à la semaine A.

On peut pousser ce calcul plus loin, en exprimant à l'aide d'un indice, la relation entre le salaire moyen de \$80 de la semaine A, et le salaire révisé de \$90.91 de la semaine B. En supposant que la moyenne de la semaine A soit un indice égal à 100, l'indice de la semaine B devient 113.6 $((90.91/80.00) \times 100)$. On pourrait appeler un tel indice l'indice de la rémunération hebdomadaire effective. Il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6% de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10% des prix à la consommation. Cette augmentation effective de 13.6% se compare à l'augmentation de 25% des salaires $((\$100.00 - \$80.00 / \$80.00) \times 100)$.

Au Tableau 13, les nombres indices des salaires hebdomadaires moyens dans les industries manufacturières en dollars courants (1961 = 100) s'obtiennent en divisant les salaires hebdomadaires en dollars courants par le salaire hebdomadaire moyen de 1961 en dollars courants et en multipliant le résultat par cent. Ainsi, l'indice des salaires hebdomadaires pour septembre 1972 exprimés en dollars courants (1961 = 100) est 196.4 $((146.23/74.45) \times 100)$. Les salaires hebdomadaires en dollars de 1961 s'obtiennent en divisant les salaires hebdomadaires en dollars courants par l'indice des prix à la consommation pour le Canada pour le mois qui suit celui auquel se rapportent les salaires, et en multipliant le quotient par cent. Ainsi, le salaire hebdomadaire de septembre 1972 exprimé en dollars de 1961 est 102.98 $((146.23/142.0) \times 100)$. (Les données sur les salaires et les prix portent en général sur des périodes semblables: les salaires courants d'un mois donné sont généralement ceux des dernières périodes de paie du mois, alors que la plupart des prix pour l'indice des prix à la consommation du mois suivant sont recueillis au cours de la première semaine de ce mois.)

Les nombres indices des salaires hebdomadaires en dollars de 1961 (1961 = 100) s'obtiennent en divisant les salaires hebdomadaires en dollars de 1961 par les salaires hebdomadaires moyens de l'année de base (1961) et en multipliant le quotient par cent. Ainsi, l'indice des salaires hebdomadaires pour septembre 1972, exprimés en dollars de 1961 (1961 = 100), sera 138.3 $((102.98/74.45) \times 100)$.

Il convient de souligner que, même si les estimations des salaires réels moyens résument assez bien la situation d'un large éventail de travailleurs dans les industries manufacturières, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur les gains porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur les gains rajustées par l'indice des prix à la consommation (les habitudes de consom-

dered less valid; the consumer price index weighting pattern was last revised in May 1973, and prior to that, in 1961. Furthermore, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual (current dollar) and real (constant dollar) wages uses 1961 as a reference year. However, any reference period may be chosen as a base since percentage changes between any two periods will be the same regardless of the reference period selected.

Further information regarding Table 13 can be obtained from: Labour Division, Statistics Canada.

Inter-City Retail Price Comparisons

Measurements of retail price differentials prevailing between a number of Canadian urban centres previously published to reflect inter-city comparisons as of May 1965, May 1968, May 1969 and May 1971 have been revised to February 1975.

In this new series of updatings inter-city price comparisons will be drawn for goods and services comprising most of the budget on which the Consumer Price Index for Canada is currently based.

Table 14 presents the first five components of goods and services to be updated in this series. Price indexes for additional budget elements will be published on a component-by-component basis as each stage of these results becomes available. The data base for this study was the wide range of retail price quotations collected in the course of production of the national Consumer Price Index in addition to supplementary information gathered in a special program of pricing undertaken for publication of City Average Retail Prices (1).

(1) Retail Prices and Livings Costs Service Bulletin, Vol. 4, No. 2, February, 1975.

mation étant supposées "fixes") perdront graduellement de leur valeur; le schéma de pondération de l'indice des prix à la consommation a été révisé pour la dernière fois en mai 1973, avant cela, en 1961. De plus, il ne faut pas oublier qu'une part du revenu peut être épargnée et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations des gains effectifs calculées à partir de moyennes effectives peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés ou de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente les salaires tant réels (en dollars courants) qu'effectifs (en dollars constants) prend pour base l'année 1961. En fait, on peut choisir n'importe quelle période de référence comme base, puisque les taux de variation entre deux périodes seront les mêmes quelle que soit la période de référence choisie.

On peut obtenir plus de renseignements sur le tableau en s'adressant à la Division du travail, Statistique Canada.

Comparaisons entre les prix de détail d'une ville à l'autre

Les mesures de la disparité des prix de détail qu'on observe dans un certain nombre de centres urbains du Canada ont déjà été publiées afin de donner les comparaisons entre les villes de mai 1965, mai 1968, mai 1969 et mai 1971 ont été révisées en février 1975.

Les nouvelles séries de mises à jour seront faites pour la plupart des biens et services servant actuellement à établir l'indice des prix à la consommation du Canada.

On trouvera au tableau 14, les résultats de la mise à jour des cinq premières composantes. Pour ce qui est des autres éléments du budget à la consommation, on publiera des indices de prix différentiels, composante par composante, au fur et à mesure que les résultats d'enquête seront disponibles. Les données de base pour cette étude ont été constituées par l'importante collecte recueillie pour la production de l'indice national des prix à la consommation en plus de l'information supplémentaire obtenue dans le cadre d'un programme spécial de relevé des prix, dont les résultats permettent de publier les prix de détail moyens par ville (1).

(1) Bulletin de Service; Prix de détail et Coût de la Vie, Vol-4, No. 2, février 1975.

As previously, to facilitate price comparability between locations, differential price measurements are derived between separate pairs of cities in geographic proximity to each other. Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names wherever possible, and also having regard for comparability of retail outlets and merchandising practises. By means of a linking procedure, paired city indexes are initially related to a common base city and subsequently compared with a weighted average of the combined 11 cities equalling 100. This is a departure from previous such studies which were based on Winnipeg price levels equalling 100. Item price relationships are aggregated by application of the 1967 combined cities weighting diagram updated for price change to February 1975.

Further information regarding Table 14 can be obtained from: Comparative Living Costs Section, Prices Division, Statistics Canada.

Farm Input Price Indexes (1961 = 100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961 = 100 time base.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services Used by Farmers, 1935-39 = 100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-534, and is reproduced in the September 1971 issue of *Prices and Price Indexes*, Catalogue 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-004, and in the monthly publication *Prices and Price Indexes*, Catalogue 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterparts, and publication has been suspended.

Comme par le passé, afin de faciliter la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont été calculées séparément pour des paires de villes géographiquement proches. A l'intérieur de chaque paire de villes, les prix ont été assortis au niveau de l'article, c'est-à-dire en s'assurant que les spécifications étaient semblables, y compris la marque lorsque cela était possible, et aussi en tenant compte de la similitude des points de vente au détail et des méthodes de vente. En utilisant la méthode de couplage, les indices couplés des villes ont d'abord été reliés à une ville de base commune, puis comparés à une moyenne pondérée (la combinaison de 11 villes étant égale à 100). Ceci constitue une différence entre cette étude et les études précédentes qui posaient le niveau des prix de Winnipeg comme étant égal à 100. Les relations de prix des articles ont été regroupées en appliquant le schéma de la pondération de 1967 des villes combinées mis à jour en fonction des variations de prix observées en février 1975.

De plus amples renseignements concernant le tableau 14 peuvent être obtenus de: la Section des coûts comparatifs de la vie, Division des Prix, Statistique Canada.

Indices de prix des entrées dans l'agriculture (1961 = 100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961 = 100.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39 = 100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série *Farm Input Price Indexes, 1961 = 100* (N° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reprise dans *Prices and Price Indexes* de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel *Farm Input Price Indexes, 1961 = 100* (n° 62-004) et dans le bulletin annuel *Prices and Price Indexes* (n° 62-002).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de la publier.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto and Montreal stock exchanges.

The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in the investor's mining and supplementary stock indexes are Thursday's closing quotations from the exchange (Montreal, Toronto, Vancouver or Calgary) with the highest volume for a particular stock, as reported in the Daily Canadian Data Bank of the Financial Post Computer Services Department. For preferred stocks, prices are monthly weighted averages of the daily closing price in which weights are daily total volume. The price reference base for the indexes is the year 1956, and the indexes express prices as a percentage of price in 1956, arithmetically converted to the 1961 = 100 base.

Revised indexes on the base 1956 = 100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the indexes, apart from the shift in the price reference base, was the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials, 4 sub-groups (Milling and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) were replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Beverages, Textile and Clothing, Pulp and Paper, and Oils (renamed Petroleum) were continued. The major group utilities was continued but the Pipelines index was added as a sub-group and the previous Power and Traction sub-group was replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A major group Finance was composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights which were previously limited to major groups, were extended to sub-groups. Weights in the index continue to be based on shares outstanding.

A revision of the Security Price Indexes to the 1971 = 100 base is under development.

For the list of stocks currently included in the Investors Index and Preferred Index, see *Prices and Price Indexes* for March 1974.

Price Indexes of Machinery and Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières mesurent dans le temps l'incidence du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un actionnaire hypothétique (par opposition au spéculateur). Le portefeuille comprend des actions de sociétés canadiennes cotées à la Bourse de Toronto et de Montréal.

Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres miniers et les indices supplémentaires sont le cours de fermeture de jeudi (Montréal, Toronto, Vancouver ou Calgary) affichant le volume le plus élevé pour une valeur en particulier, d'après la Banque des données canadiennes quotidiennes du Service de l'informatique du *Financial Post*. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles des cours de clôture de chaque jour et les poids, le volume quotidien total. La période de référence pour les indices est l'année 1956 et les indices représentent les prix exprimés en pourcentage des prix de 1956 recalculé sur la base 1961 = 100.

Les indices révisés sur la base 1956 = 100 ont été publiés pour la première fois dans la livraison de juin 1962 de cette publication. La modification la plus importante à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice : mines industrielles, boissons, textiles et habillement, pâte à papier, et huiles (sous la désignation de pétrole). Le grand groupe de services d'utilité publique a été conservé mais l'indice de pipelines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et traction a été remplacé par deux nouveaux sous-groupes : l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

On prépare actuellement une révision des Indices des cours des valeurs mobilières sur la base 1971 = 100.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve dans *Prix et indices des prix* de Mars 1974.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des question d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

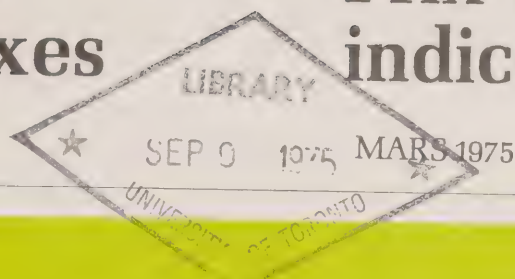

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du *U.S. Bureau of Labour Statistics* ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

NOTES ON PRICES AND PRICE INDEX NUMBERS

Industry Selling Price Index: Manufacturing (1961 = 100)

The industry selling price index (Total Manufacturing) in March was 187.0, the same as the revised February figure. It was 14.9% higher than March 1974 index of 162.7.

In terms of the relative contribution to the overall change in the total manufacturing index, the most significant increases were in the petroleum and coal products group (5.0%) with petroleum refining up (5.1%). Advances also occurred in the wood products group due mainly to higher levels in sawmills and planing mills industry (1.8%). In the chemicals group higher prices were registered for the mixed fertilizers products.

Decreases were evident in the foods and beverages group (1.7%) with the sugar refineries down (19.9%) and the slaughtering and meat packing (2.1%). Prices from feed manufacturers (2.9%) continued a decline, begun in November 1974. Slight decreases also occurred in the paper and allied products and the textile industries group.

NOTES SUR LES PRIX ET LES INDICES DE PRIX

Indice des prix de vente dans l'industrie: industries manufacturières (1961 = 100)

L'indice des prix de vente dans l'industrie (ensemble des industries manufacturières) s'est établi en mars à 187.0, soit au même niveau que le chiffre rectifié de février. Il était de 14.9% supérieur à l'indice de mars 1974 (162.7).

En ce qui concerne l'apport relatif des groupes à la variation globale de l'indice des industries manufacturières, les hausses les plus sensibles se sont produites dans le groupe des produits du pétrole et du charbon (5.0%), avec une augmentation de 5.1% dans l'industrie de raffinage du pétrole. Des hausses se sont aussi produites dans le groupe des produits du bois, à la suite surtout des augmentations enregistrées dans les scieries (1.8%). Dans le groupe des industries chimiques, on a enregistré des hausses des prix des produits d'engrais mélangés.

On a observé des baisses dans le groupe des aliments et des boissons (1.7%), les raffineries de sucre ayant enregistré une diminution (19.9%) ainsi que l'abattage et le conditionnement de la viande (2.1%). La baisse des prix des aliments pour animaux amorcée en novembre 1974 s'est poursuivie (2.9%). De légères diminutions ont aussi été enregistrées dans les groupes de l'industrie du papier et produits connexes et des textiles.

These indexes are preliminary. Ces indices sont provisoires.

General Wholesale Price Index (135-39=100)

The general wholesale price index declined 1.2% in March to 477.6 from the revised February index of 483.3. It was 7.2% higher than a year earlier. Four of the eight major groups decreased while four increased.

The vegetable products group index declined 4.2% to 480.1 from the revised February index of 501.2 due to lower prices recorded for sugar and its products 21.6%, livestock and poultry feeds 3.5%, vegetable oil products 3.5%, tea, coffee and cocoa 3.0%, and potatoes 2.5%. The animal products group index declined 1.4% to 486.6 from the revised February index of 493.5 resulting from decreases in furs 9.7%, livestock 5.6%, lard and tallow 4.9%, fresh meats 2.9% and cured meats 2.0%. The textile products group index declined 1.0% to 397.8 from the February index of 401.8 due to decreases in miscellaneous fibre products 4.7%, cotton fabrics 1.7% and raw cotton 1.5%. The iron and steel products group declined 0.3% due mainly to a decrease in scrap iron and steel. The non-metallic minerals group index rose 0.6% to 382.9 from the revised February index of 380.5 due to an increase of 5.8% in asphalt and a 1.6% increase in petroleum and its products. The wood products group index rose 0.5% with increases in matches 7.3%, spruce 3.5%, hemlock 2.5%, fir 2.0% and cedar 1.6%. The non-ferrous metals group index rose 0.4% to 413.5 from the revised February index of 411.8. The chemical products group index also rose 0.4% to 384.3 from the revised February index of 382.8.

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros a baissé de 1.2% en mars passant de 483.3 (chiffre rectifié) en février à 477.6 en mars. Il était supérieur de 7.2% à celui de mars 1974. Parmi les huit groupes principaux, quatre ont diminué et quatre ont augmenté.

L'indice du groupe des produits d'origine végétale a diminué de 4.2%, passant de 501.2 en février (chiffre rectifié) à 480.1 en mars, en raison d'une diminution des prix du sucre et ses produits (21.6%), des aliments pour le bétail et la volaille (3.5%), des produits de l'huile végétale (3.5%), du thé, du café et du cacao (3.0%), et des pommes de terre (2.5%). L'indice du groupe des produits animaux a enregistré une baisse de 1.4%, passant de 493.5 en février (chiffre rectifié) à 486.6 en mars; cette baisse est attribuable aux diminutions enregistrées par les fourrures (9.7%), le bétail (5.6%), le saindoux et le suif (4.9%), les viandes fraîches (2.9%) et les viandes salées (2.0%). L'indice du groupe des produits textiles a diminué de 1.0%, passant de 401.8 en février à 397.8 en mars, par suite de baisses dans les fibres textiles diverses (4.7%), les tissus de coton (1.7%) et le coton brut (1.5%). Le groupe des produits du fer et de l'acier a enregistré une baisse de 0.3%, surtout à cause d'une diminution des prix des déchets de fer et d'acier. Le groupe des minéraux non métalliques a connu une hausse de 0.6%, l'indice passant de 380.5 en février (chiffre rectifié) à 382.9 en mars; cette hausse est le résultat d'une augmentation de 5.8% des prix de l'asphalte et d'une augmentation de 1.6% des prix du pétrole et de ses produits. L'indice du groupe des produits du bois a augmenté de 0.5% avec des hausses pour les allumettes (7.3%), les épinettes (2.5%), les prunelles (3.5%), les sapins (2.0%) et les cèdres (1.6%). Le groupe des métaux non ferreux a aussi connu une augmentation de 0.4%, l'indice passant de 411.8 en février (chiffre rectifié) à 413.5 en mars, ainsi que le groupe des produits chimiques, dont l'indice a passé de 382.8 en février (chiffre rectifié) à 384.3 en mars, soit une augmentation de 0.4%.

* These indexes are preliminary. — Ces indices sont provisoires.

Security Price Indexes (1961=100)

During March the investors' index of common stocks fell 1.9% to 150.4. Decreases were reported for the three major groups, industrials dropped 2.3% to 152.9, utilities 1.1% to 130.9 and finance 1.2% to 166.9. The thirteen industrial sub-groups registered seven decreases and six increases. Among these, beverages suffered the greatest loss (7.1%) to 194.6 followed by petroleum (4.2%) to 217.1. Textiles and clothing reported the greatest increase (4.3%) to 120.1. For the utilities index, there were three losses and two gains, ranging from an increase of 3.1% to 88.5 for electric power to a decrease of 5.1% to 144.6 for gas distribution. In the finance group, banks slid back 1.7% to 196.7, while investment and loans rose 0.6% to 120.5.

The index of mining stock prices also reported a slight decrease (0.7%) to 123.6 this month, reflecting a 2.1% loss for golds (208.9).

Of the two supplementary indexes, uraniums fell 6.0% to 225.2, while primary oil and gas dropped 1.5% to 295.8.

The preferred stock index for March registered a loss of 2.2% to 61.2.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets declined 1.0% to 453.5 in March from 458.1 in February. The animal products index declined 1.8% to 517.3 from 527.0 due to lower prices on both markets for calves and hogs, and for lambs, steers and cheesemilk in the East. Price increases were shown for raw wool, fluid milk and eggs on both Eastern and Western markets, for poultry and butterfat in the East and for lambs and steers in the West.

The field products index rose 0.1% to 389.7 from 389.2. Higher prices were shown for corn, wheat and tobacco in the East, for flax in the West, and for hay on both markets. Price decreases were shown for barley in the East, and for rye and potatoes on both markets.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, declined 1.6% to 483.7 in March from the revised February index of 491.6. Prices were lower for thirteen commodities, higher for three and unchanged for fourteen. Principal changes included decreases for raw sugar, linseed oil, hogs, raw rubber, raw cotton, oats, steers, cottonseed oil, crude oil, iron ore, washed sulphite pulp, tin and domestic wheat while increases were recorded for beef hides, spruce lumber and raw

Indices des cours des valeurs mobilières (1961=100)

Au cours du mois de mars, l'indice des cours des actions ordinaires a baissé de 1.9%, pour se fixer à 150.4. Les trois grands groupes ont enregistré une baisse; les valeurs industrielles de 2.3%, l'indice étant passé à 152.9, les services publics de 1.1%, l'indice passant à 130.9, et les finances de 1.2%, l'indice se fixant à 166.9. Parmi les treize sous-groupes industriels, sept ont enregistré des diminutions et six des augmentations; la plus forte diminution (7.1%) s'est produite dans le sous-groupe des boissons, dont l'indice est tombé à 194.6, suivie de celui du pétrole (4.2%), dont l'indice s'est fixé à 217.1. En ce qui concerne les services publics, on signale trois baisses et deux augmentations, qui vont d'une hausse de 3.1% de l'indice de l'énergie électrique, qui est passé à 88.5, à une baisse de 5.1% de l'indice de la distribution du gaz, qui est tombé à 144.6. Dans le groupe des finances, les banques ont regagné de 1.7%, pour se fixer à 196.7, tandis que les placements et prêts ont connu une augmentation de 0.6%, pour atteindre 120.5.

L'indice des prix des titres miniers a aussi accusé une légère baisse (0.7%) et s'est fixé à 123.6 en mars, traduisant une baisse de 2.1% des aurifères dont l'indice s'est fixé à 208.9.

Pour ce qui est des deux indices de prix supplémentaires, on a observé une baisse de 6.0% dans le cas de l'uranium, qui s'est fixé à 225.2, tandis que le pétrole et le gaz ont baissé de 1.5% pour s'établir à 295.8.

L'indice des actions privilégiées a enregistré une perte de 2.2% en mars, pour passer à 61.2.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a baissé de 1.0%, pour passer de 458.1 en février à 453.5 en mars. L'indice des produits animaux a connu une baisse de 1.8%, passant de 527.0 en février à 517.3, à la suite de diminutions des prix des veaux et des porcs, sur le marché de l'Est et de l'Ouest, ainsi que des prix des agneaux, des bouvillons et du lait de fromagerie, sur le marché de l'Est. Par contre, on a enregistré des hausses de prix pour la laine brute, le lait de consommation et les oeufs, sur les deux marchés, pour la volaille, et les matières grasses dérivées du lait sur le marché de l'Est, et pour les agneaux et les bouvillons sur le marché de l'Ouest.

L'indice des produits de grande culture a augmenté de 0.1% pour passer de 389.2 à 389.7. On a enregistré une augmentation des prix du maïs, du blé et du tabac dans l'Est, du lin dans l'Ouest, et du foin sur les deux marchés. Par contre, on a enregistré des baisses des prix de l'orge dans l'Est et du seigle et des pommes de terre sur les deux marchés.

Indice des prix de trente matières industrielles (1935-39=100)

L'indice des prix de trente matières industrielles, calculé comme moyenne géométrique non pondérée, a baissé de 1.6%, pour passer de 491.6 en février (chiffre rectifié) à 483.7 en mars. Les prix de treize de ces matières ou marchandises ont connu une baisse, ceux de trois ont augmenté et quatorze n'ont pas varié. Les principales variations comprennent des baisses de prix pour le sucre brut, l'huile de lin, les porcs, le caoutchouc brut, le coton brut, l'avoine, les bouvillons, l'huile de coton, le pétrole brut, le minerai de fer, la pâte blanchie au sulphite, l'étain et le blé

wool. This is the fifth consecutive decline in the index since October 1974, that is from 513.8 to 483.7.

The Consumer Price Index

The Consumer Price Index for Canada (1961=100) rose 0.5% to 178.9 in March from 178.0 in February. Except for a similar rise two months earlier, this was the smallest month-to-month advance since the autumn of 1973. The latest increase was mainly due to higher retail prices for petroleum products, clothing, automobiles and tobacco items as well as to a rise in home ownership costs, all of which contributed to a 0.9% advance between February and March in the index for All-Items excluding Food. The Food index, in contrast, declined by 0.3% in the latest month. Between March 1974 and March 1975, the total CPI registered an advance of 11.3% with only about one-sixth of this rise occurring in the last three months.

For the first time since October 1973, the Food index moved downwards, declining 0.3% mainly as a result of a further drop of 8.6% in retail beef prices. Sugar prices also continued to decline, moving down by 12% in the latest month to a level about one-third below their peak late in 1974. Eggs and fresh vegetables also dipped in price between February and March, but fresh fruits advanced as is usual between these two months, moving up by nearly 4%. Soft drinks for home consumption climbed in price over 7% in the latest month.

Fuel oil prices, moving up for the first time since last June, as well as increased gasoline prices in most parts of the country, accounted for about one-fifth of the 0.9% rise in the index for All-Items other than Food. Higher clothing prices, some rebounding from sales in the preceding month, contributed to a similar extent. New car prices also rose between February and March with the termination of manufacturers' rebates on selected models, and higher quotations were recorded for all major and small appliances surveyed.

The Consumer Price Index reclassified by goods and services offers another view of the incidence of price change. Between February and March, both the goods and the services indexes advanced by 0.5%.

On a seasonally adjusted basis, the February to March rise in the All-Items Consumer Price Index was 0.5%, continuing to reflect the slowing down in recent months in the CPI rate of increase. In March, the *current* annual rate of CPI change, based on the seasonally adjusted movement since three months earlier, was 7.0%, having declined progressively in each successive month from a December 1974 rate of 14.6%, largely though not entirely because of sharply decelerating food prices.

canadien ainsi que des hausses de prix pour les peaux de boeuf, bois (de sciage) d'épinette et la laine brute. Cette baisse constitue la cinquième chute consécutive de cet indice des prix depuis octobre 1974; au cours de cette période, l'indice est tombé de 513.8 à 483.7.

L'indice des prix à la consommation

L'indice des prix à la consommation pour le Canada (1961=100) a augmenté de 0.5%, passant de 178.0 en février à 178.9 en mars. Si l'on exclut une augmentation semblable enregistrée il y a deux mois, il s'agit là de la plus faible hausse d'un mois sur l'autre depuis l'automne 1973. Cette augmentation est attribuable en majeure partie à la hausse des prix de détail de produits du pétrole, des vêtements, des automobiles et des produits du tabac ainsi qu'à la hausse des frais de propriété; toutes ces hausses ont entraîné un accroissement de 0.9% de l'indice d'ensemble (à l'exception de l'alimentation) entre février et mars. Par contre, l'indice de l'alimentation a enregistré une diminution de 0.3% au cours du mois dernier. Entre mars 1974 et mars 1975, l'indice d'ensemble des prix à la consommation a connu une augmentation de 11.3%; seulement, environ le sixième de cette hausse a été enregistré au cours des trois derniers mois.

Pour la première fois depuis octobre 1973 l'indice de l'alimentation a diminué; cette diminution de 0.3% provient surtout d'une nouvelle baisse (8.6%) du prix de détail du boeuf. Le prix du sucre a également continué à baisser, soit de 12% au cours du mois dernier, ce qui représente une baisse de près d'un tiers par rapport au niveau record atteint vers la fin de 1974. Les prix des oeufs et des légumes frais ont aussi diminué entre février et mars mais, ceux des fruits frais ont monté de presque 4%, contre une courante à cette période de l'année. Le prix de boissons gazeuses consommées à la maison a grimpé de plus de 7% au cours du mois observé.

La hausse du prix du mazout, la première depuis janvier dernier, et celle du prix de l'essence un peu partout au pays représentent un cinquième environ de l'augmentation de 0.9% de l'indice d'ensemble (à l'exception de l'alimentation). La hausse du prix des vêtements, qui dans certains cas faisait suite aux soldes du mois précédent, a contribué dans la même proportion à cette augmentation. Le prix des automobiles neuves a aussi monté entre février et mars lorsque les fabricants ont mis fin aux rabais accordés pour certains modèles; enfin, on a aussi enregistré une hausse des prix de tous les gros et petits appareils ménagers.

L'indice des prix à la consommation reclassé par biens et services présente un autre aspect de la variation des prix. Entre février et mars, l'indice des biens et celui des services ont tous deux augmenté de 0.5%.

Après désaisonnalisation la hausse de l'indice d'ensemble des prix à la consommation s'est établie à 0.5% entre février et mars ce qui marque une poursuite du ralentissement du taux d'augmentation de l'I.P.C. depuis quelque mois. En mars, le taux annuel *courant* de la variation de l'I.P.C., basé sur le mouvement désaisonné des trois derniers mois, était de 7.0%; il a diminué progressivement chaque mois depuis décembre 1974 (14.6%) et ce, en raison surtout de la chute du prix des aliments.

Industrial price indexes - Indices des prix dans l'industrie:							
Industry selling price index: manufacturing - 1961=100(1) - Indices des prix de vente dans l'industrie: industries manufacturières	187.0	187.0	162.7	160.1	-	1.6	1.9
General wholesale index - (1935-39=100)(2) - L'indice général de gros	477.6	483.3r	445.5r	437.8	- 1.2	1.8	1.8
Vegetable products - Substances végétales	480.1	501.2r	468.1r	459.8	- 4.2	1.8	1.8
Animal products - Produits animaux	486.6	493.5r	474.1r	487.3	- 1.4	- 2.7	1.8
Textile products - Produits textiles	397.8	401.8	421.1r	415.7	- 1.0	1.3	-
Wood products - Produits du bois	619.4	616.5r	552.4r	536.5	0.5	3.0	1.1
Iron products - Produits du fer	495.0	496.3r	426.2r	402.4	- 0.3	5.9	1.1
Non-ferrous metals - Métaux non ferreux	413.5	411.8r	413.9	401.0	0.4	3.2	-
Non-metallic minerals - Minéraux non métallique	382.9	380.5r	298.9r	298.4	0.6	0.2	2.0
Chemical products - Produits chimiques	384.3	382.8r	300.3r	293.5	0.4	2.3	2.0
Selected Price Indicators - Certains indices des prix:							
Canadian farm products - (1935-39=100)(3) - Produits agricoles canadiens	453.5	458.1	495.9	493.1	- 1.0	0.6	1.3
Eastern - Total - De l'est	434.2	439.2	471.3	466.2	- 1.1	1.1	-
Western - Total - De l'ouest	472.9	477.0	520.6	520.1	- 0.9	0.1	1.1
Field - Cultures	389.7	389.2	461.6	452.4	0.1	2.0	1.1
Animal - Animaux	517.3	527.0	530.3	533.9	- 1.8	- 0.7	-
Thirty industrial materials - (1935-39=100)(2) - Trente matériaux industriels	483.7	491.6r	484.7r	476.9	- 1.6	1.6	-
Consumer price indexes - Canada (1961=100) - Indices des prix à la consommation:							
All-items - Indice d'ensemble	178.9	178.0	160.8	159.2	0.5	1.0	1.3
Food - Aliments	203.3	204.0	180.5	177.9	- 0.3	1.4	1.6
Housing - Habitation	177.3	175.8	160.7	159.4	0.9	0.8	1.3
Clothing - Habillement	159.8	157.9	148.1	145.5	1.2	1.8	1.9
Transportation - Transports	161.5	160.2	144.2	143.8	0.8	0.3	1.0
Health and personal care - Soins personnels et hygiène	182.8	182.0	163.5	163.0	0.4	0.3	1.8
Recreation, education and reading - Loisirs, formation et lecture	169.5	168.3	150.6	149.8	0.7	0.5	1.5
Tobacco and alcohol - Tabacs et alcools	157.4	156.3	139.3	138.8	0.7	0.4	1.0
Security price indexes - (1961=100) - Indices des cours de valeurs mobilières:							
Investors Index - Total - Indices des portefeuillistes	150.4	153.3	190.6	184.4	- 1.9	3.3	- 2.1
Industrials - Total - Industriels	152.9	156.5	204.4	197.8	- 2.3	3.3	- 2.2
Industrial mines - Mines industrielles	95.2	96.4	144.5	143.8	- 1.2	0.5	- 1.1
Foods - Aliments	140.5	143.8	160.5	151.1	- 2.3	6.2	- 5.5
Beverages - Boissons	194.6	209.5	261.5	252.0	- 7.1	3.8	- 2.6
Textiles and clothing - Textiles et vêtements	120.1	115.2	178.3	164.6	4.3	8.3	- 1.7
Pulp and paper - Pâte et papier	111.3	113.8	152.2	143.6	- 2.2	6.0	- 2.9
Printing and publishing - Impression et édition	333.2	334.9	358.3	354.4	- 0.5	1.1	- 0.0
Primary metals - Métaux primaires	104.0	107.1	136.7	135.0	- 2.9	1.3	- 1.9
Metal fabricating - Fabrications des métaux	168.1	163.0	202.0	184.6	3.1	9.4	- 1.8
Non-metallic minerals - Minéraux non métalliques	149.6	143.7	183.6	173.4	4.1	5.9	- 5.5
Petroleum - Pétrole	217.1	226.7	318.2	310.0	- 4.2	2.6	- 1.8
Chemicals - Produits chimiques	105.1	104.8	122.8	114.6	0.3	7.2	- 4.4
Construction - Construction	146.7	142.2	175.5	171.5	3.2	2.3	-
Retail trade - Commerce de détail	152.6	149.7	154.3	142.7	1.9	8.1	- 1.1
Utilities - Total - Services publics	130.9	132.3	143.2	137.4	- 1.1	4.2	- 6.0
Pipeline - Pipe-line	114.2	117.9	141.0	141.7	- 3.1	- 0.5	- 0.0
Transportation - Transport	309.4	315.0	327.0	309.1	- 1.8	5.8	- 1.4
Telephone - Téléphone	95.1	94.3	90.3	85.1	0.8	6.1	- 3.4
Electric power - Énergie électrique	88.5	85.8	105.9	99.7	3.1	6.2	- 4.0
Gas distribution - Distribution du gaz	144.6	152.3	172.1	168.1	- 5.1	2.4	- 0.0
Finance - Total - Finances	166.9	168.9	190.7	185.9	- 1.2	2.6	- 5.5
Banks - Banques	196.7	200.2	227.7	222.7	- 1.7	2.3	- 6.0
Investment and loan - Placements et prêts	120.5	119.8	132.1	127.4	0.6	3.7	- 1.8
Mining - Actions minières:							
Mining Index - Total - Indices des prix des titres minières	123.6	124.5	173.1	169.9	- 0.7	1.9	- 1.6
Gold - Or	208.9	213.3	284.0	277.0	- 2.1	2.5	- 1.5
Base metals - Métaux communs	77.9	76.9	113.8	112.7	1.3	1.0	- 1.6
Supplementary indexes - Indices supplémentaires:							
Uranium - L'uranium	225.2	239.6	304.6	323.1	- 6.0	- 5.7	- 1.1
Primary oils and gas - Pétrole et gaz primaires	295.8	300.4	487.4	488.6	- 1.5	- 0.3	- 1.3

- (1) Gross weighted, including inter-industry shipments. For explanation see page 91. - Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication, voir page 91.
- (2) Indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont sujets à révision.
- (3) Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1974 are subject to revision. See notes page 92 for details of Western grain prices. - La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1974 sont sujets à révision. Voir les renvois de la page 92 pour les prix détaillés des grains de l'Ouest.

TABLE 2. Industry Selling Price Indexes by Industry and Selected Commodities

TABLEAU 2. Indices des prix de vente dans l'industrie par industrie et par certains produits

1961 = 100

Industries and selected commodities(1)

Industrie et certains produits(1)

Month - Mois

Annual

Annuel

Hardwood flooring, red oak, plain - Parquetages en bois dur, chêne rouge, débit ordinaire.

08 2542 005

Wooden box factories - Fabriques de boîtes en bois

08 2560

Soft drink and other beverage cases - Caisnes pour eaux gazeuses et autres boissons.

08 2560 013

Box shoos - Planchettes de bois

08 2560 019

FURNITURE AND FIXTURE INDUSTRIES - INDUSTRIE DU MEUBLE ET DES ARTICLES D'AMEUBLEMENT.

09

Household furniture industry - Industrie des meubles de maison.

09 2610

Wooden bedroom furniture, not upholstered - Meubles de chambre à coucher, en bois, non garnis.

09 2610 001

Wooden living-room furniture, not upholstered - Meubles de salon, en bois, non garnis.

09 2610 002

Wooden dining-room furniture - Meubles de salle à manger, en bois.

09 2610 003

Breakfast room and kitchen furniture, metal - Meubles en métal de salle à déjeuner et de cuisine.

09 2610 015

Upholstered living-room furniture, excl. dual purpose or convertible - Meubles de salon, garnis, sauf les meubles à double usage transformables.

09 2610 023

Office furniture industry - Industrie des meubles de bureau.

09 2640

Office desks, wooden - Bureau en bois

09 2640 001

Office desks, metal - Bureaux en métal

09 2640 006

Metal visible record equipment (filing cabinets, boxes, etc.) - Equipement visible en métal pour dossiers (classeurs, boîte, etc.).

09 2640 007

See footnote(s) at end of table. - Voir renvoi(s) à la fin du tableau.

TABLE 2. Industry Selling Price Indexes by Industry and Selected Commodities

TABLEAU 2. Indice des prix de vente dans l'industrie par industrie et par certains produits

1961 = 100

Industries and selected commodities(1) Industrie et certains produits(1)	Month - Mois												Annual Annuel
	J	F	M	A	M	J	J	A	S	O	N	D	Annuel
Structural steel shapes, light, less than 1/8" thick - Profils de charpente légers, en acier, moins de po. d'épaisseur.	1971 116.6	116.6	116.6	116.6	116.6	118.3	120.8	121.1	121.1	121.1	121.1	121.1	119.0
	1972 121.1	121.1	121.1	121.1	121.1	121.1	121.1	121.1	121.1	125.5	125.5	125.5	122.2
	1973 129.1	129.2	131.0	133.0	134.4	135.6	134.1	134.1	132.7	132.7	136.5	144.1	134.0
	1974 149.4	158.6	188.7	190.6	197.1	199.5	203.6	204.0	204.0	204.0	204.0	200.8	
12 2910 040	1975 212.7	209.1	200.5										
Bars, hot rolled, bolt, nut, rivet, spike, etc. carbon and alloy - Barres laminées à chaud, boulons, écrous, rivets, pointes, etc. carbone et alliage.	1971								121.9	124.9	124.9	124.9	
	1972								132.8	133.1	135.8	144.1	133.0
	1973 128.1	128.0	129.5	132.4	132.9	133.3	133.1	133.2	132.8	133.1	135.8	144.1	
	1974 147.6	149.2	158.9	160.6	173.4	176.9	177.9	178.2	178.2	178.3	178.3	178.0	
12 2910 082	1975 194.5	195.2	191.4										
Bars, concrete reinforcing, hot rolled carbon steel - Barres pour béton armé, laminées à chaud en acier.	1971 107.7	107.7	112.8	113.6	113.6	113.6	113.6	113.6	113.6	115.2	110.8	114.9	112.6
	1972 114.9	113.6	116.0	116.7	121.6	121.6	121.6	121.6	121.6	121.6	121.6	121.6	119.5
	1973 121.6	121.3	125.8	126.6	126.9	127.1	129.8	132.0	132.9	136.7	144.9	129.4	
	1974 146.6	155.0	172.5	189.1	199.8	201.6	206.9	207.9	207.9	207.9	208.0	204.6	
12 2910 042	1975 217.8	215.5	213.6										
Plates, 100" and under in width - Tôle forte de 100 po. ou moins en largeur.	1971 116.8	116.8	116.8	116.8	116.8	116.8	116.9	116.9	116.9	116.9	123.6	123.6	118.0
	1972 123.6	123.5	123.5	123.5	123.5	123.5	123.5	123.5	123.5	129.6	129.6	129.6	125.0
	1973 129.6	129.6	129.6	129.6	129.6	134.9	133.5	135.5	135.5	135.5	135.5	135.5	133.0
	1974 145.4	145.4	145.4	145.4	156.2	161.0	161.0	162.4	162.4	162.4	162.4	162.4	
12 2910 052	1975 162.4	188.2	188.2										
Hot rolled sheets and strip - Tôle mince et feuillard laminés à chaud.	1971 116.0	116.0	116.2	116.2	116.2	116.2	123.1	123.1	123.1	123.1	123.1	123.1	119.6
	1972 122.1	122.1	122.1	122.1	122.1	122.1	122.1	122.0	122.0	122.0	122.0	122.0	122.1
	1973 127.5	127.5	127.5	127.5	127.5	127.6	133.5	133.5	133.5	133.5	133.5	133.5	130.5
	1974 133.3	133.3	146.2	146.3	147.8	147.8	147.9	147.9	148.0	156.5	156.5	161.5	
12 2910 048	1975 163.3	168.1	168.1										
Sheets and strip, cold reduced and cold rolled Carbon and Silicon - Tôle mince et feuillard, laminés à froid carbone et silicium.	1971									121.5	121.5	130.0	
	1972									134.2	134.2	134.2	132.0
	1973 129.8	129.8	129.8	129.8	129.8	130.1	134.2	134.2	134.2	152.9	157.4	157.4	
	1974 134.2	144.8	146.5	146.9	147.2	147.3	147.7	147.7	152.9	157.4	157.4	162.6	
12 2910 084	1975 161.9	165.0	165.0										
Steel pipe and tube mills - Fabriques de tubes et tuyaux d'acier.	1971 100.6	102.8	102.5	102.0	102.3	102.3	102.7	102.8	102.5	104.8	105.3	105.3	103.0
	1972 105.5	105.5	105.5	105.5	105.5	105.4	105.4	105.4	105.4	111.2	111.2	111.2	106.9
	1973 111.3	114.3	114.3	114.6	115.1	115.7	116.7	118.8	119.1	121.2	121.2	121.2	116.9
	1974 134.5	136.5	137.8	138.7	139.6	139.6	139.6	139.6	140.7	154.2	154.2	154.2	
12 2920	1975 159.8	165.9	165.5										
Mechanical tubing, carbon steel - Tubes de structure en acier.	1971 100.3	102.7	102.7	102.7	102.7	102.7	100.8	101.4	101.4	101.4	101.4	101.4	101.8
	1972 101.4	101.4	101.4	101.1	101.1	100.6	100.6	100.6	100.6	100.6	101.8	101.8	101.1
	1973 101.8	101.8	101.8	101.8	101.8	103.0	103.0	107.0	107.0	107.0	107.0	107.0	104.2
	1974 111.6	114.2	116.2	118.3	119.5	119.5	119.5	119.5	119.5	122.5	122.6	122.6	
12 2920 003	1975 125.1	129.3	129.3										
Pipe and tubes, steel line pipe - Tuyaux et tubes, tuyaux pour canalisation en acier.	1971 98.1	101.5	101.1	100.0	100.5	100.5	101.4	101.4	100.9	103.7	103.7	103.9	101.4
	1972 103.9	103.9	103.9	103.9	103.9	103.9	103.9	103.9	103.9	110.2	110.2	110.2	105.5
	1973 110.2	113.4	113.4	113.4	113.4	113.4	113.4	113.9	113.9	117.3	117.3	117.3	114.2
	1974 135.3	135.3	135.3	135.3	135.3	135.3	135.3	135.3	135.3	158.2	158.2	158.2	
12 2920 007	1975 160.7	166.7	164.0										
Iron foundries - Fonderie de fer	1971 128.3	129.3	130.3	130.7	130.7	131.5	132.5	132.2	132.3	132.0	132.1	135.3	131.4
	1972 135.8	135.8	136.0	135.9	135.6	135.2	135.5	135.6	135.6	135.7	137.0	138.8	136.3
	1973 138.6	139.2	139.1	141.0	140.9	141.2	142.4	143.1	143.6	143.9	151.8	152.3	143.0
	1974 153.6	163.1	167.7	174.2	175.7	181.9	182.5	189.3	213.4	203.5	207.3	213.0	
12 2940	1975 214.5	214.5	214.6										
Commercial castings grey iron alloy (incl. all grades of alloy) - Moulages commerciaux, fonte grise (y compris toutes qualités d'alliage).	1971 125.8	128.1	128.0	128.1	128.2	130.1	129.9	129.0	129.2	128.5	128.4	135.7	129.1

TABLE 2. Industry Selling Price Indexes by Industry and Selected Commodities

TABLEAU 2. Indice des prix de vente dans l'industrie par industrie et par certains produits

Industries and selected commodities(1)		1961 = 100													Annual Annuel
		Month - Mois													
Industrie et certains produits(1)		J	F	M	A	M	J	J	A	S	O	N	D		
Clay products manufacturers (from domestic clay) - Fabricants de produits de l'argile (domestique).	17 3511	1971	122.6	122.8	122.8	123.1	123.1	123.8	126.1	126.2	126.2	126.4	126.5	124.6	
		1972	128.5	129.2	129.1	129.3	129.2	129.3	129.4	129.8	130.1	131.7	132.6	129.9	
		1973	135.0	135.9	136.5	139.0	139.0	139.3	140.0	141.4	141.9	146.0	148.7	140.2	
		1974	154.6	156.3	157.5	161.4	160.2	164.4	167.2	167.7	168.6	169.8	170.0		
		1975	178.2	188.4	188.7										
Brick, stiff mud (wire cut) process, face - Brique, procédé pâte ferme, de parement.	17 3511 011	1971	123.0	123.0	123.0	123.2	123.2	123.2	126.0	126.0	126.0	126.0	126.0	124.6	
		1972	128.5	128.9	128.9	128.9	128.9	128.9	128.9	129.4	129.4	132.3	133.1	129.6	
		1973	135.8	135.8	135.8	135.8	135.8	135.8	136.9	136.9	137.6	138.8	144.5	146.1	
		1974	152.4	152.4	153.6	157.9	155.7	158.6	160.6	160.6	161.6	161.4	161.7	163.6	
		1975	170.3	184.2	184.9										
Brick, dry press, face - Brique, procédé à sec de parement.	17 3511 013	1971	109.6	109.6	109.6	109.6	109.6	109.6	109.5	109.1	109.2	108.8	108.5	109.3	
		1972	109.6	109.6	109.4	109.3	109.0	108.4	108.7	108.7	110.8	110.8	110.9	111.4	
		1973	113.9	113.5	113.7	113.8	113.9	113.9	113.8	114.1	114.3	113.9	117.2	117.3	
		1974	116.9	120.1	123.7	123.6	123.2	125.2	129.1	129.2	129.7	137.1	137.4	137.4	
		1975	137.8	152.8	152.3										
Structural tile, hollow blocks (incl. fireproofing and load-bearing tile) - Tuile de construction, blocs creux (y compris murs de refend et coupe-feu).	17 3511 018	1971	133.7	136.1	136.1	137.1	137.1	137.1	145.5	145.5	145.5	145.5	145.5	140.8	
		1972	149.4	149.4	149.4	149.4	149.4	149.4	150.9	150.9	150.9	150.9	150.9	150.0	
		1973	153.8	158.8	158.8	158.8	158.8	158.8	158.8	158.8	158.8	161.3	161.3	158.8	
		1974	179.8	179.8	179.8	186.2	186.2	186.2	196.1	196.1	199.3	199.3	199.3		
		1975	216.5	216.5	216.5										
Drain tile - Tuyaux à drainage	17 3511 022	1971	129.3	129.3	129.3	129.3	129.3	135.3	135.3	136.5	136.5	136.5	138.5	133.6	
		1972	139.6	139.6	139.6	140.7	140.7	140.7	140.7	140.7	140.7	140.7	140.7	140.4	
		1973	140.8	140.5	145.7	145.7	145.7	148.2	148.2	148.2	155.7	155.7	155.7	149.7	
		1974	172.3	172.3	172.3	180.7	180.7	194.4	196.6	196.6	196.6	198.7	201.9		
		1975	201.9	201.9	201.9										
Sewer pipe - Tuyaux d'égouts	17 3511 023	1971	120.1	120.1	120.1	120.1	120.1	120.1	120.1	120.1	120.1	120.1	121.7	120.2	
		1972	121.7	125.9	125.9	125.9	125.9	128.1	128.1	128.1	128.1	128.1	128.1	126.8

	1975 185.6	187.0	187.0											

(1) Indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont
sujets à révision

(2) This industry was changed in commodity content, price sample and weights in accordance with
significant changes within the industry. Figures are revised from January 1971 to date. - La composition
en marchandises, les échantillons de prix et les mesures de poids ont changé dans cette industrie
conformément à des changements importants survenus dans l'industrie même. Les chiffres sont révisés
de janvier 1971 à aujourd'hui.

(3) Effective January 1973 changes have been made in the calculation of this index. For details see page 91. - A
compter de janvier 1973, on a modifié le calcul de cet indice. Pour plus de détails, voir la page 91. - A

(4) An extensive revision of the weight and price sample (including the incorporation of goods purchased and resold in
same condition as purchased) necessitated by developments in the industry's production pattern since 1961 have
resulted in the introduction of new price indexes and a discontinuity in the industry price index. - Une révision
approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus
sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a
amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix
industriels.

	Old series - Ancienne série	New series - Nouvelle série
December - 1970 - Décembre	95.1	92.3
January - 1971 - Janvier	95.1	92.1
Average - 1971 - Moyenne	95.2	91.8

(5) This series has been revised from January 1969 forward. An expanded list of establishments and commodities has been
selected and prices for these have been aggregated to a total industry index using 1971 shipments data. The price
quotations are, in general, of an improved quality. Selected commodity data on a 1971 time and weight base, are
available on request. - Les chiffres de cette série ont été révisés à partir de janvier 1969. Une liste
augmentée des établissements et des produits a été établie, et les prix de ces produits ont été agrégés pour
former un indice total de l'activité économique à partir des données sur les livraisons de 1971. De manière
générale, le calcul des prix est plus fiable. Les utilisateurs peuvent obtenir sur demande des données sur
certain produits utilisant les facteurs de pondération de 1971 et dont la période de référence est 1971.

(6) Motor gasoline prices are 'List' and may not be a reflection of actual transaction prices. - Les prix
de l'essence sont des prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction.

(7) Gross weighted, including inter-industry shipments. For explanation see page 91. - Indice pondéré brut
comprenant les livraisons inter-industrielles. Pour toute explication voir page 91.

- (1) All indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont sujets à révision.
- (2) Includes gold. - Y compris l'or.
- (3) Consists of iron products and non-ferrous metals groups above but excluding gold. - Se compose des groupes élémentaires des produits du fer et des produits des métaux non ferreux moins l'or.
- (4) These two series comprise the General Wholesale Index. - Ces deux séries comprennent l'indice général de gros.
- (5) Excludes gold. - Sauf l'or.
- (6) See page 93 for additional information. - Pour des informations additionnelles voir page 93.
- (7) Final to July 1974. See page 92 for details on Western grain prices and specific publications wherein final indexes or earlier years may be found. - Indices définitifs jusqu'en juillet 1974. Pour des données détaillées sur le prix des céréales de l'Ouest, voir page 92 ainsi que les publications spéciales qui contiennent les derniers indices ou ceux des années précédentes.
- (8) All indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont sujets à révision.

TABLE 6. Wholesale Price Indexes of Selected Primary Commodities(1)

TABLEAU 6. Indices des prix de gros de certains produits bruts(1)

1935-39=100

Primary commodities - Produits bruts	Months - Mois				Annual averages - Moyenne annuelle		
	Mar. 1975 Mars	Feb. 1975 Fév.	Mar. 1974 Mars	Feb. 1974 Fév.	1974	1973	1972
Coffee, green - Café vert	472.8	494.7	505.2	502.5	492.6	468.0	358.1
Copper, electrolytic - Cuivre électrolytique ...	590.9	590.9	722.5	689.9	730.3	594.4	474.3
Cotton, raw - Coton brut	389.1	395.7	571.9	572.4	526.8	389.7	330.0
Eggs - Oeufs	201.3	200.2	224.5	218.8	217.7	196.1	136.2
Fruits, fresh - Fruits frais	303.0	243.0	251.9	299.4	284.3	263.9	223.5
Grains - Céréales	516.7	517.5	586.6	575.8	562.9	406.1	205.7
Hides and skins - Cuirs et peaux vertes	139.3	105.6	260.3	291.7	220.2	323.9	294.1
Lead, electrolytic - Plomb électrolytique	493.6	493.6	500.4	495.7	500.2	367.0	323.2
Livestock - Bétail	521.2	552.4	587.9	616.0	611.1	606.7	458.7
Onions - Oignons	294.3	263.1	356.3	434.7	328.7	476.7	259.8
Potatoes - Pommes de terre	245.5	251.9	703.0	606.7	626.7	485.9	219.1
Rubber, raw - Caoutchouc brut	190.8	202.1	305.0	323.2	246.8	222.7	114.0
Scrap iron and steel - Déchets de fer et d'acier	589.2	602.2	783.7	561.3	740.6	388.8	268.1
Silver - Argent	1147.3	1151.3	1278.4	1404.5	1180.8	663.3	430.6
Steers - Bouvillons	608.5	615.2	761.8	788.3	803.9	645.3	597.6
Sugar, raw - Sucre brut	912.0	1201.8	697.7	676.3	943.5	321.0	253.9
Tin - Etain	726.8	718.3	762.4	649.8	764.4	435.6	338.8
Wool, raw domestic - Laine brute indigène	236.9	227.6	407.8	439.9	334.3	492.5	201.7
Wool, raw, imported - Laine brute importée	226.3	217.1	338.8	363.5	284.4	379.6	196.8
Zinc, prime, western - Zinc de première qualité, de l'Ouest	822.8	822.8	689.4	689.4	767.2	522.6	411.6

(1) All indexes for 1973, 1974 and 1975 are subject to revision. - Les indices pour 1973, 1974 et 1975 sont sujets à révision.

TABLE 7. Wholesale Prices of Selected Commodities
(All prices given in Canadian funds)

TABLEAU 7. Prix de gros de certains produits
(en dollars canadiens)

Commodity - Produit	Months - Mois				Annual averages - Moyenne annuelle

All-items Consumer Price Index converted to 1949=100, March 1975 - L'indice des prix à la consommation de tous les éléments converti à 1949=100, mars 1975 231.1

(1) Indexes prior to May 1973 incorporate 1957 expenditure weights, those for May 1973 forward are based on 1967 expenditures. The revised series is linked to its predecessor at April 1973. For further explanation, see page 94. - Avant mai 1973 les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957; à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 94.

Recreation, education, and communication services - Loisirs, formation et communications	168.3	167.3	155.4	154.5	159.0	151.2	144.7
Transportation services - Transports	212.8	212.6	186.7	186.5	194.5	179.2	174.8

(1) Indexes prior to May 1973 incorporate 1957 expenditures weights, those for May 1973 forward are based on 1967 expenditures. The revised series is linked to its predecessor at April 1973. For further explanation see page 94. - Avant mai 1973 les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957; à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 94.

(2) Excludes accessories and notions. - Ne comprend pas les accessoires et menus articles.

(3) Includes clothing accessories and notions. - Comprend les accessoires et menus articles vestimentaires.

(4) Includes constant weighted food component. - Comprend l'élément aliments calculé à l'aide de pondérations constantes.

TABLE 11. Consumer Price Indexes, Regional Cities(1)

Note: (i) These indexes measure within each city the percentage change in consumer prices from the base period to the subsequent time periods. They cannot be used to compare levels of prices between cities. (ii) For inter-city indexes of retail price differentials refer to Table 14.

TABLEAU 11. Indices des prix à la consommation, agglomérations urbaines(1)

Nota: (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subséquentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au tableau 14.

37	June - Juin					

- (1) Indexes prior to May 1973 incorporate 1957 expenditure weights (1964 expenditure weights for Québec and Thunder Bay); those for May 1973 forward are based on 1967 expenditures. The revised series are linked to their predecessors at April 1973. For further explanation see page 94.
- (2) As of January 1975, the separate consumer price indexes for Saskatoon, Regina, Edmonton and Calgary supersede the combined-cities series. Users of the combined series are therefore advised to switch to the separate city indexes which are available only from April 1973. (The historical data for the combined-cities series are presented in Table 11A). Should users have any questions, contact the Retail Prices Section or consult the Retail Prices and Living Costs Service Bulletin, Catalogue 62-005, Volume 3, No. 5.
- (3) Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes so that the Canada and regional city shelter indexes now contain the same elements. See also page 95.
- (4) Includes shelter and household operation. Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes, so that the Canada and regional city shelter indexes now contain the same elements. See also page 95.

- (1) Avant mai 1973, les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957 (pour Québec et Thunder Bay sur les dépenses de 1964); à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 94.
- (2) A partir de janvier 1975, les indices séparés des prix à la consommation pour Saskatoon, Regina, Edmonton et Calgary remplacent les séries combinées. Nous conseillons donc aux utilisateurs des séries combinées d'utiliser les séries des indices séparés qui sont disponibles depuis avril 1973. (Les données historiques pour les séries combinées sont publiées au tableau 11A). Si il y a des questions, communiquez avec la section des prix de détail ou consultez le Bulletin de service sur les prix de détail et les coûts de la vie, no 62-005 au catalogue, volume 3, no 5.
- (3) Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 95.
- (4) Comprend le logement et l'entretien du ménage. Jusqu'en avril 1963, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations urbaines; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 95.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR PRICE SERIES

Industrial Price Indexes

Industry Selling Price Indexes (1961 = 100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue 12-528.

Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

"Iron & Steel Mills:" 12-2910

The principal change in the index is as follows: From January 1973 forward prices collected from the various companies are, for any given commodity, weighted together in a way that reflects the relative importance of each company's shipments of the commodity to the total shipments of that commodity by all companies in the year 1971. In addition prices for stainless products were deleted from the series bars hot rolled etc. (12-2910-082), in September 1972 and from the series sheets and strip cold rolled etc. (12-2910-084) in October 1972. Prices for stainless products, however, are included in the price index for the iron and steel mills industry.

The concept of price change measured is net return to mill.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES SÉRIES DE PRIX

Indices des prix industriels

Indices des prix de vente dans l'industrie (1961 = 100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", (n° 62-528 au catalogue).

Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

"Sidérurgie:" 12-2910

Le principal changement apporté à l'indice est le suivant: depuis janvier 1973, les prix recueillis auprès des différentes sociétés sont, pour tout produit, pondérés de manière à refléter l'importance relative des livraisons de chaque société par rapport aux livraisons totales de ce produit par toutes les sociétés en 1971. En outre, les prix des produits en acier inoxydable ont été enlevés de la série "barres, laminés à chaud, etc." (12-2910-082) en septembre 1972 et de la série "tôles et feuillards, laminés à froid etc." (12-2910-084) en octobre 1972. Ils sont toutefois compris dans l'indice des prix de l'industrie de la sidérurgie.

Le concept de la mesure de la variation des prix se fonde sur le revenu net à l'usine.

Purchase Price Indexes of Secondary Metals (1969=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1935-39=100)

Prices for Western grains used in the index are Canadian Wheat Board buying prices for grain in store at Vancouver or Thunder Bay.

Final payments for the crop year August 1973 - July 1974 were announced on December 24, 1974 and have been incorporated into the index. Estimates for the total 1974-75 payments are based on the initial payment plus half of the 1973-74 crop year final payment.

Indices du prix d'achat des métaux de deuxième fusion (1969=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice des prix des produits agricoles canadiens (1935-39=100)

Les prix des céréales de l'Ouest utilisés dans l'indice sont les prix d'achat de la Commission canadienne du blé pour les céréales entreposées à Vancouver ou à Thunder Bay.

Les paiements finals pour la campagne agricole août 1973 - juillet 1974 ont été annoncés le 24 décembre 1974 et ont été incorporés à l'indice. Les estimations des paiements totaux de 1974-75 sont basées sur le paiement initial plus la moitié du paiement final de la campagne agricole 1973-74.

General Wholesale Index (1935-39 = 100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: *Wholesale Price Indexes 1913-50* (Reference Paper No. 24) *Prices and Price Indexes 1949-52* (Vol. 23) (Catalogue 62-501).

Thirty Industrial Materials, (1935-39 = 100)

The price index of thirty industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{\frac{P^1_{tN} \times P^2_{tN} \times P^3_{tN} \times \dots \times P^{30}_{tN}}{P^1_{t \text{ 35-39}} \times P^2_{t \text{ 35-39}} \times P^3_{t \text{ 35-39}} \times \dots \times P^{30}_{t \text{ 35-39}}}}$$

Indice général des prix de gros (1935-39 = 100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter *Wholesale Price Indexes 1913-50* (Reference Paper No. 24) et *Prices and Price Indexes 1949-52* (Vol. 23) (n° 62-501 au catalogue).

Indice des prix de trente matières industrielles (1935-39 = 100)

L'Indice des prix de trente matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

$$\sqrt[30]{\frac{P^1_{tN} \times P^2_{tN} \times P^3_{tN} \times \dots \times P^{30}_{tN}}{P^1_{t \text{ 35-39}} \times P^2_{t \text{ 35-39}} \times P^3_{t \text{ 35-39}} \times \dots \times P^{30}_{t \text{ 35-39}}}}$$

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering 5 and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyre's type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

The Consumer Price Index for Canada (1961=100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index may not represent closely the experience of any one specific family within the group, nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families — (a) living in cities with over 30,000 population, (b) ranging in size from two to six persons and (c) with annual incomes in 1967 ranging from \$4,000 to \$12,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In January 1969, the time base was updated to 1961=100 from 1949=100; details are contained in the January 1969 issue of the monthly publication *Prices and Price Indexes*, Catalogue 62-002.

From March 1961 to April 1973 inclusive, the weights or relative importance of the items in the Consumer Price Index were based on 1957 family expenditure patterns; details of these weights can be found in *The Consumer Price Index for Canada (1949=100) (Revision Based on 1957 Expenditures)*, Catalogue 62-518. A subsequent weight revision to reflect 1967 family expenditure patterns (and within the food component, 1969 detailed spending habits) was introduced in May 1973. Full details of the latest weighting pattern and other background information on the Consumer Price Index is available in the occasional paper *The Consumer Price Index for Canada (1961=100) (Revision based on 1967 Expenditures)*, Catalogue 62-539.

Le choix des matières servant au prélèvement des prix se rapportant à des groupes tels que prix "stables", (12 matières prix des aliments (5 matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérées comme intrants importants dans l'industrie.

L'indice des prix à la consommation pour le Canada (1961=100)

L'indice des prix à la consommation mesure le taux de variation dans le temps du coût à l'achat d'un "panier" constant de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" est constitué par des biens et des services en quantité de qualité constantes; il comprend uniquement les biens et services qui ont un prix et dont les prix peuvent être observés de façon continue.

L'indice se rapporte à un groupe vaste, mais délimité, de familles urbaines et rend compte des changements de prix auxquels ce "groupe cible" doit faire face. L'indice peut ne pas suivre de près les changements de prix touchant une famille en particulier de ce groupe, pas plus que les changements de prix touchant d'autres groupes de la population dont le revenu, la taille des familles ou les lieux de résidence diffèrent sensiblement. Le groupe cible auquel se rapporte l'indice actuel se compose de familles vivant dans des villes de plus de 30,000 habitants, b) dont la taille est comprise entre deux et six personnes, et c) dont les revenus annuels en 1967 étaient compris entre \$4,000 et \$12,000. Afin de mesurer les effets de changements de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation suit les mouvements de quelque 300 articles.

L'histoire des indices de prix à la consommation au Canada remonte au début des années 1900, et elle comprend des révisions périodiques des périodes de référence de base de l'indice ainsi que des schémas de pondération. En janvier 1969, on a aligné la base de temps de 1949=100 à 1961=100; d'autres renseignements figurent dans l'édition de janvier 1969 de la publication mensuelle *Prix et indices des prix* (n° 62-002 au catalogue).

De mars 1961 à avril 1973 inclusivement, les poids, ou l'importance relative des éléments de l'indice des prix à la consommation étaient basés sur les tendances de dépense des familles pour 1957; on peut trouver le détail de ces poids dans la publication *The Consumer Price Index for Canada (1949=100) (Revision based on 1957 Expenditure)*, (n° 62-518 au catalogue). En mai 1973, on a introduit une nouvelle révision des poids et de prendre en compte les tendances de consommation des familles en 1967 (et, dans l'élément aliments, les habitudes détaillées de dépense en 1969). Le détail complet du dernier schéma de pondération et d'autres renseignements fondamentaux sur l'indice des prix à la consommation figurent dans la publication hors série *L'indice des prix à la consommation du Canada (1961=100) (Révision fondée sur les dépenses de 1967)*, (n° 62-539 au catalogue).

The Consumer Price Index for Canada Reclassified by Goods and Services

A revised supplementary classification system, entitled "The Consumer Price Index reclassified by Goods and Services", was introduced in May 1973 with the revision of the weighting pattern of the Consumer Price Index to reflect 1967 expenditures.

This supplementary classification introduces an improved framework for regrouping the items which comprise the Index. In it, all items in the C.P.I. have been reclassified into two major categories — goods and services — according to their most characteristic or dominant attribute. The goods component has been sub-divided into three categories: durable, semi-durable, and non-durable goods, according to expected average useful lifetime criteria. Services, on the other hand, have been sub-divided according to broad functional categories.

Historical series conforming to the revised classification system replace the previously published supplementary indexes and are available, with explanatory notes, for the period January 1961 to April 1973 inclusive, in *Retail Prices and Living Costs Service Bulletin*, Catalogue 62-005, Vol. 2 No. 7.

Consumer Price Indexes for Regional Cities (1961 = 100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). Except for their individual weighting systems, and the fact that they are based on fewer quotations, the regional city indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada.

Prior to May 1973, the city indexes may have underestimated the degree of price movements occurring because the shelter component of the city indexes moved on the basis of changes in rents only, whereas changes in both rents and homeownership costs were, and continue to be, included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and the all-items indexes for cities tended to underestimate somewhat the rates of price increase particularly over longer periods. From May 1973 forward, however, homeownership costs are included in the regional city consumer price indexes so that the Canada and the regional city indexes are consistent in terms of their content and treatment.

Each city index is designed to measure the influence of changes in retail prices taking place in the locality specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in the particular area specified.

In using the city indexes, it should be remembered that they do not in any way indicate whether price levels are higher or lower in one city than in another. Rather, they measure, within each city, the percentage change in consumer prices from the base period to subsequent time periods.

L'indice des prix à la consommation au Canada reclassé par biens et services

Un système révisé de classification supplémentaire, intitulé "L'indice des prix à la consommation au Canada reclassé par biens et services", a été introduit en mai 1973 en même temps que la révision des schémas de pondération de l'indice des prix à la consommation afin de rendre compte des dépenses de 1967.

Cette classification supplémentaire regroupe dans un cadre amélioré les éléments de l'indice. En effet, tous les éléments de l'I.P.C. ont été reclassés dans deux grandes catégories, soit la catégorie des biens et celle des services, suivant leur caractère le plus distinctif ou dominant. La catégorie des biens présente trois sous-catégories (biens durables, biens semi-durables, biens non durables) déterminées en fonction de la vie utile moyenne prévisible. D'autre part, on a réparti les services suivant quelques grandes catégories fonctionnelles.

Les séries historiques conformes au système révisé de classification remplacent les indices supplémentaires publiés auparavant, et on peut les trouver, avec des notes explicatives, pour la période janvier 1961 - avril 1973, dans la publication "Prix de détail et coût de la vie" - Bulletin de service, n° 62-005 au catalogue, vol. 2 n° 7.

Indices des prix de la consommation dans certaines agglomérations urbaines (1961 = 100)

Ces indices sont publiés tous les mois dans la présente publication (tableau 11). À l'exception de leurs systèmes de pondération particuliers, et de ce qu'ils font appel à moins de prix, ces indices sont en général semblables par leur concept et par les éléments qui les composent à l'indice des prix à la consommation au Canada.

Avant mai 1973, les indices des agglomérations ont pu sous-estimer le degré de changement des prix, parce que l'élément logement des indices des agglomérations ne variait qu'en fonction de l'évolution des loyers, tandis que l'indice pour le Canada ne comprenait et ne comprend toujours que les changements des loyers et les coûts de propriété. Comme les coûts de propriété ont augmenté plus vite que les loyers, les indices du logement et l'ensemble pour les villes tendent à sous-estimer quelque peu les taux de croissance des prix, principalement sur des périodes plus longues. À partir de mai 1973, cependant, les coûts de propriété sont inclus dans les indices de prix à la consommation des agglomérations urbaines, de sorte que les indices pour le Canada et les agglomérations urbaines sont homogènes à la fois pour ce qui est de leur contenu et de leur traitement.

Chaque indice de ville est conçu de manière à mesurer l'effet des changements des prix de détail dans la ville en question sur les prix d'un panier constant de biens et de services représentant le niveau de consommation d'un groupe représentatif de familles dans cette ville.

Le lecteur devra toujours garder en mémoire que ces indices n'indiquent en aucune façon si les prix sont plus élevés dans une ville que dans une autre. Ils mesurent plutôt dans chaque ville le taux de variation des prix à la consommation à partir de la période de base et des périodes subséquentes.

For comparisons of retail price differentials between cities, see Table 14 of this publication and the relevant explanatory notes.

Purchasing Power of the 1961 Consumer Dollar

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases, and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

The purchasing power of the consumer dollar, in other words, bears an inverse relationship to the movement of the Consumer Price Index. For example, by January 1973, compared with their average level in 1961, consumer prices as measured by the C.P.I. were 44.5% higher, so that an equivalent basket of goods and services which could be purchased for \$100.00 in 1961 would cost the consumer \$144.50 in January 1973. Each consumer dollar in January 1973, therefore, buys less than in 1961, and the amount of its reduced value can be expressed in terms of the inverse consumer price movement. Thus, in January 1973 the purchasing power of the 1961 consumer dollar declined to approximately 69 cents ($\$1.00 \times 100.0 / 144.5 = \0.69).

Users of the tabulation which shows the purchasing power of the 1961 consumer dollar at different points in time (Table 12) should note that, as in the case of the Consumer Price Index from which it is derived, it may not represent closely the experience of any one specific family within the large group to which the C.P.I. relates; nor should it be expected to reflect the experience of other population groups whose income, family size and place of residence are characteristically different. It should also be noted that, like the C.P.I., it is not directly affected by changes in income tax, unemployment insurance premiums and certain other security payments.

Measuring the Purchasing Power of Wages

Changing consumer price levels affect the amounts of consumer goods and services which a dollar will buy, and average wages, insofar as they are spent on such items will, of course, be affected in the same way. A wage measurement which takes the change of consumer prices into account, can be calculated by reducing actual average wages by the percentage rise in consumer price levels, or increasing them by the amount price levels fall. Wages thus adjusted may be used to indicate the comparative purchasing power of average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. On the

Pour étudier les différences de prix de détail entre les villes, il faut consulter le tableau 14 de la présente publication et les notes explicatives qui l'accompagnent.

Pouvoir d'achat du dollar de consommation 1961

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente, et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie, et la baisse des prix est liée à la hausse du pouvoir d'achat.

Le pouvoir d'achat du dollar de consommation, en d'autres termes, évolue en raison inverse du mouvement de l'indice de prix à la consommation. Ainsi, en janvier 1973, par rapport au niveau de 1961, les prix à la consommation mesurés par l'I.P.C. avaient progressé de 44.5%, de sorte qu'un panier équivalent de biens et de services qui coûtait \$100 à l'achat en 1961 aurait coûté \$144.50 en janvier 1973 au consommateur. Par conséquent, chaque dollar de consommation en janvier 1973 achète moins qu'en 1961, et l'on peut exprimer le montant de sa valeur réduite en fonction de l'inverse du mouvement des prix à la consommation. Ainsi, en janvier 1973, le pouvoir d'achat du dollar de consommation 1961 était tombé approximativement à 69 cent ($\$1.00 \times 100.0 / 144.5 = \0.69).

Les utilisateurs du tableau qui indique le pouvoir d'achat du dollar de consommation de 1961 à différentes périodes (tableau 12) doivent noter que, comme dans le cas de l'indice de prix à la consommation dont il a été tiré, il peut ne pas suivre de près le cas d'une famille en particulier faisant partie du grand groupe auquel se rapporte l'I.P.C., pas plus qu'il ne rend nécessairement compte des dépenses d'autres groupes de la population dont les revenus, la taille des familles et les lieux de résidence diffèrent sensiblement. Il faut également noter que, tout comme l'I.P.C., il n'est pas touché directement par les changements de l'impôt sur le revenu, les primes d'assurance-chômage et certains autres paiements d'assistance.

Mesure du pouvoir d'achat des salaires

Les changements du niveau des prix à la consommation affectent les quantités de biens et de services de consommation qu'un dollar peut acheter, et les salaires moyens, dans la mesure où ils sont consacrés à de tels articles, seront naturellement touchés de la même façon. Une mesure des salaires qui prendrait en compte les changements de prix à la consommation peut être calculée en réduisant les salaires moyens réels du taux d'accroissement des prix à la consommation, ou en les augmentant dans une proportion égale à la baisse des prix. Les salaires ainsi ajustés peuvent servir à indiquer le pouvoir d'achat comparatif des gains moyens si les prix à la consommation et les tendances de consommation étaient restés constants. L'exemple suivant montre comment on peut procéder à un ajustement de cette nature.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B, et qu'au cours de la même période un indice des prix à la consommation passe de 100 à 110. Par suite de la hausse de 10% des prix à la consommation, \$1 n'achètera pas autant au cours

her hand, the 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$100.00 by the amount of the consumer price index increase. The adjusted average is \$90.91 $((100.0/110.0) \times \$100)$, which may be referred to as the weekly wage average for week B expressed in the dollars of period A; or it may be said to indicate the level of real weekly wages relative to week A.

The foregoing calculation can be carried a step further to express, in index number form, the relationship between the week A average of \$80.00 and the week B adjusted figure of \$90.91. Assuming the week A average of \$80.00 as an index equal to 100, the week B index becomes 113.6 $((90.91/80.00) \times 100)$. Such an index may be called an index of average weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than they did in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the 10% rise in money wages $((\$100.00 - \$80.00 / \$80.00) \times 100)$.

In Table 13, the index numbers of average weekly wages in manufacturing in current dollar terms (1961 = 100) are calculated by dividing the weekly wages in current dollars by the 1961 average weekly wage in current dollars and multiplying the result by one hundred. For example, the weekly wage index for September 1972 in current dollars (1961 = 100) is 196.4 $((146.23/74.45) \times 100)$. The weekly wages in 1961 dollar terms are determined by dividing the weekly wage in current dollars by the consumer price index for Canada for the month following the month to which the wages relate and multiplying the result by one hundred. Thus, the September 1972 weekly wage in 1961 dollars is \$102.98 $((146.23/142.0) \times 100)$. (The wage and the price index both refer to generally similar time periods: current wages for a particular month relate to the last pay periods in that month, while most prices for the consumer price index of the following month are collected in the first week of that month.)

The index numbers of weekly wages in 1961 dollar terms (1961 = 100) are determined by dividing the weekly wages in 1961 dollars by the base (1961) average weekly wage and multiplying the result by one hundred. For example, the September 1972 weekly wage index in 1961 dollar terms (1961 = 100) is 138.3 $((102.98/74.45) \times 100)$.

It should be noted that while the estimates of average wages may reflect the experiences of broad groups of workers in manufacturing fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular population group. Group spending patterns change over periods of time. To the extent that this occurs, wage data adjusted by the consumer price index (which is a "fixed" consumption pattern), will gradually be ren-

la semaine B qu'au cours de la semaine A. Par contre, la hausse de 25% (de \$80 à \$100) va surévaluer la hausse qui s'est produite dans le pouvoir d'achat des salaires hebdomadaires moyens. Cette surévaluation peut être réduite en réduisant le chiffre de \$100 du montant de l'accroissement de l'indice des prix à la consommation. La moyenne ajustée sera \$90.91 $((100.0/110.0) \times 100)$, et que l'on peut désigner comme étant la moyenne du salaire hebdomadaire pour la semaine B exprimée en dollars de la période A; on peut aussi dire qu'elle indique le niveau réel des salaires par rapport à la semaine A.

On peut pousser ce calcul plus loin, en exprimant à l'aide d'un indice, la relation entre le salaire moyen de \$80 de la semaine A, et le salaire révisé de \$90.91 de la semaine B. En supposant que la moyenne de la semaine A soit un indice égal à 100, l'indice de la semaine B devient 113.6 $((90.91/80.00) \times 100)$. On pourrait appeler un tel indice l'indice de la rémunération hebdomadaire effective. Il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6% de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10% des prix à la consommation. Cette augmentation effective de 13.6% se compare à l'augmentation de 25% des salaires $((\$100.00 - \$80.00 / \$80.00) \times 100)$.

Au Tableau 13, les nombres indices des salaires hebdomadaires moyens dans les industries manufacturières en dollars courants (1961 = 100) s'obtiennent en divisant les salaires hebdomadaires en dollars courants par le salaire hebdomadaire moyen de 1961 en dollars courants et en multipliant le résultat par cent. Ainsi, l'indice des salaires hebdomadaires pour septembre 1972 exprimés en dollars courants (1961 = 100) est 196.4 $((146.23/74.45) \times 100)$. Les salaires hebdomadaires en dollars de 1961 s'obtiennent en divisant les salaires hebdomadaires en dollars courants par l'indice des prix à la consommation pour le Canada pour le mois qui suit celui auquel se rapportent les salaires, et en multipliant le quotient par cent. Ainsi, le salaire hebdomadaire de septembre 1972 exprimé en dollars de 1961 est \$102.98 $((146.23/142.0) \times 100)$. (Les données sur les salaires et les prix portent en général sur des périodes semblables: les salaires courants d'un mois donné sont généralement ceux des dernières périodes de paie du mois, alors que la plupart des prix pour l'indice des prix à la consommation du mois suivant sont recueillis au cours de la première semaine de ce mois.)

Les nombres indices des salaires hebdomadaires en dollars de 1961 (1961 = 100) s'obtiennent en divisant les salaires hebdomadaires en dollars de 1961 par les salaires hebdomadaires moyens de l'année de base (1961) et en multipliant le quotient par cent. Ainsi, l'indice des salaires hebdomadaires pour septembre 1972, exprimés en dollars de 1961 (1961 = 100), sera 138.3 $((102.98/74.45) \times 100)$.

Il convient de souligner que, même si les estimations des salaires réels moyens résument assez bien la situation d'un large éventail de travailleurs dans les industries manufacturières, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur les gains porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur les gains rajustées par l'indice des prix à la consommation (les habitudes de consom-

dered less valid; the consumer price index weighting pattern was last revised in May 1973, and prior to that, in 1961. Furthermore, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual (current dollar) and real (constant dollar) wages uses 1961 as a reference year. However, any reference period may be chosen as a base since percentage changes between any two periods will be the same regardless of the reference period selected.

Further information regarding Table 13 can be obtained from: Labour Division, Statistics Canada.

Inter-City Retail Price Comparisons

Measurements of retail price differentials prevailing between a number of Canadian urban centres previously published to reflect inter-city comparisons as of May 1965, May 1968, May 1969 and May 1971 have been revised to February 1975.

In this new series of updatings inter-city price comparisons will be drawn for goods and services comprising most of the budget on which the Consumer Price Index for Canada is currently based.

Table 14 presents the first five components of goods and services to be updated in this series. Price indexes for additional budget elements will be published on a component-by-component basis as each stage of these results becomes available. The data base for this study was the wide range of retail price quotations collected in the course of production of the national Consumer Price Index in addition to supplementary information gathered in a special program of pricing undertaken for publication of City Average Retail Prices(1).

As previously, to facilitate price comparability between locations, differential price measurements are derived between separate pairs of cities in geographic proximity

mation étant supposées "fixes") perdront graduellement de leur valeur; le schéma de pondération de l'indice des prix à la consommation a été révisé pour la dernière fois en mai 1973, et avant cela, en 1961. De plus, il ne faut pas oublier qu'une partie du revenu peut être épargnée et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations des gains effectifs calculées à partir de moyennes effectives peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés ou de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente les salaires tant réels (en dollars courants) qu'effectifs (en dollars constants) prend pour base l'année 1961. En fait, on peut choisir n'importe quelle période de référence comme base, puisque les taux de variation entre deux périodes seront les mêmes quelle que soit la période de référence choisie.

On peut obtenir plus de renseignements sur le tableau 13 en s'adressant à la Division du travail, Statistique Canada.

Comparaisons entre les prix de détail d'une ville à l'autre

Les mesures de la disparité des prix de détail qu'on observe dans un certain nombre de centres urbains du Canada déjà publiées afin de donner les comparaisons entre les villes au mois de mai 1965, mai 1968, mai 1969 et mai 1971 ont été révisées en février 1975.

Les nouvelles séries de mises à jour seront faites pour la plupart des biens et services servant actuellement à établir l'indice des prix à la consommation du Canada.

On trouvera au tableau 14, les résultats de la mise à jour des cinq premières composantes. Pour ce qui est des autres éléments du budget à la consommation, on publiera des indices de prix différentiels, composante par composante, au fur et à mesure que les résultats d'enquête seront disponibles. Les données de base pour cette étude ont été constituées par l'importante collection recueillie pour la production de l'indice national des prix à la consommation en plus de l'information supplémentaire obtenue dans le cadre d'un programme spécial de relevé des prix, dont les résultats permettent de publier les prix de détail moyens par ville(1).

Comme par le passé, afin de faciliter la comparaison de prix entre les différents endroits, les mesures différentielles de prix ont été calculées séparément pour des paires de villes géographiquement proches.

(1) Retail Prices and Living Costs Service Bulletin, Vol. 4, No. 2, February, 1975.

(1) Bulletin de Service; Prix de détail et Coût de la Vie, Vol. 4, N° 2, février 1975.

each other. Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names wherever possible, and also giving regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, paired city indexes are initially related to a common base city and subsequently compared with a weighted average of the combined 11 cities equalling 100. This is a departure from previous such studies which were based on Winnipeg price levels equalling 100. Item price relationships are aggregated by application of the 1967 combined cities weighting diagram updated for price change to February 1975.

Further information regarding Table 14 can be obtained from: Comparative Living Costs Section, Prices Division, Statistics Canada.

Farm Input Price Indexes (1961 = 100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961 = 100 time base.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services used by Farmers, 1935-39 = 100. The latter index was composed of the Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replace the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-534, and is reproduced in the September 1971 issue of *Prices and Price Indexes*, Catalogue 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-004, and in the monthly publication, *Prices and Price Indexes*, Catalogue 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterpart, and publication has been suspended.

quement proches. A l'intérieur de chaque paire de villes, les prix ont été assortis au niveau de l'article, c'est-à-dire en s'assurant que les spécifications étaient semblables, y compris la marque lorsque cela était possible, et aussi en tenant compte de la similitude des points de vente au détail et des méthodes de vente. En utilisant la méthode de couplage, les indices couplés des villes ont d'abord été reliés à une ville de base commune, puis comparés à une moyenne pondérée (la combinaison de 11 villes étant égale à 100). Ceci constitue une différence entre cette étude et les études précédentes qui posaient le niveau des prix de Winnipeg comme étant égal à 100. Les relations de prix des articles ont été regroupées en appliquant le schéma de la pondération de 1967 des villes combinées mis à jour en fonction des variations de prix observées en février 1975.

De plus amples renseignements, concernant le tableau 14 peuvent être obtenus de: la Section des coûts comparatifs de la vie, Division des Prix, Statistique Canada.

Indices de prix des entrées dans l'agriculture (1961 = 100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961 = 100.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39 = 100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série *Farm Input Price Indexes, 1961 = 100* (n° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reprise dans *Prices and Price Indexes* de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel *Farm Input Price Indexes, 1961 = 100* (n° 62-004 au catalogue) et dans le bulletin annuel *Prices and Price Indexes* (n° 62-002 au catalogue).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de la publier.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto and Montreal stock exchanges.

The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in the investor's mining and supplementary stock indexes are Thursday's closing quotations from the exchange (Montreal, Toronto, Vancouver or Calgary) with the highest volume for a particular stock, as reported in the Daily Canadian Data Bank of the Financial Post Computer Services Department. For preferred stocks, prices are monthly weighted averages of the daily closing price in which weights are daily total volume. The price reference base for the indexes is the year 1956, and the indexes express prices as a percentage of price in 1956, arithmetically converted to the 1961 = 100 base.

Revised indexes on the base 1956 = 100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the indexes, apart from the shift in the price reference base, was the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials, 4 sub-groups (Milling and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) were replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Beverages, Textile and Clothing, Pulp and Paper, and Oils (renamed Petroleum) were continued. The major group utilities was continued but the Pipelines index was added as a sub-group and the previous Power and Traction sub-group was replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A major group Finance was composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights which were previously limited to major groups, were extended to sub-groups. Weights in the index continue to be based on shares outstanding.

A revision of the Security Price Indexes to the 1971 = 100 base is under development.

For the list of stocks currently included in the Investors Index and Preferred Index, see *Prices and Price Indexes* for March 1974.

Price Indexes of Machinery and Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières mesurent dans le temps l'incidence du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un actionnaire hypothétique (par opposition au spéculateur). Le portefeuille comprend des actions de sociétés canadiennes cotées à la Bourse de Toronto et de Montréal.

Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres miniers et les indices supplémentaires sont les cours de fermeture de jeudi (Montréal, Toronto, Vancouver et Calgary) affichant le volume le plus élevé pour une valeur en particulier, d'après la Banque des données canadiennes quotidiennes du Service de l'informatique du *Financial Post*. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles des cours de clôture de chaque jour et les poids, le volume quotidien total. La période de référence pour les indices est l'année 1956 et les indices représentent les prix exprimés en pourcentage des prix de 1956 recalculé sur la base 1961 = 100.

Les indices révisés sur la base 1956 = 100 ont été publiés pour la première fois dans la livraison de juin 1962 de cette publication. La modification la plus importante à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice : mines industrielles, boissons, textiles et habillement, pâte et papiers, et huiles (sous la désignation de pétrole). Le grand groupe de services d'utilité publique a été conservé mais l'indice de pipelines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et traction a été remplacé par deux nouveaux sous-groupes : l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements et prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

On prépare actuellement une révision des Indices des cours des valeurs mobilières sur la base 1971 = 100.

La liste des titres repris actuellement dans les indices de valeurs de placements et dans les indices des valeurs privilégiées se trouve dans *Prix et indices des prix* de mars 1974.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel et fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968 = 100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968 = 100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

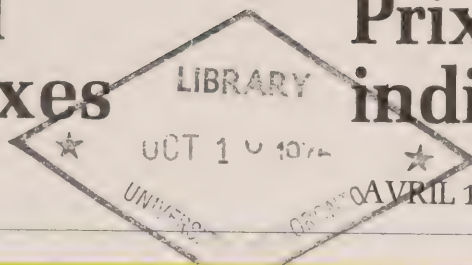

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du *U.S. Bureau of Labour Statistics* ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- — amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- — nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTES ON PRICES AND PRICE INDEX NUMBERS

NOTES SUR LES PRIX ET SUR LES NOMBRES-INDICES DES PRIX

Industry Selling Price Index: Manufacturing (1961=100)

The industry selling price index (Total Manufacturing) moved 1.0% higher in April to 188.9 from March index of 187.1. It was 14.0% higher than the April 1974 index of 165.7.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes were increases recorded in the food and beverage group (1.8%) particularly in butter and cheese Plants (0.2%) and slaughtering and meat packing (1.7%). Increases also occurred in the wood products group (4.8%) reflecting higher prices in the sawmills and planing mills (6.5%). Price increases recorded in pulp and paper mills (0.8%) were mainly responsible for advances in paper and allied products (0.7%). Decreases for the period were relatively insignificant.

Indice des prix de vente dans l'industrie: Industries manufacturières (1961=100)

L'indice des prix de vente dans l'industrie, pour l'ensemble des industries manufacturières, a augmenté de 1.0% en avril, pour passer de 187.1 (en mars) à 188.9. Il était de 14.0% supérieur à l'indice d'avril 1974 (165.7).

En ce qui concerne l'apport relatif des groupes à la variation globale de l'indice des industries manufacturières, les hausses les plus sensibles se sont produites dans le groupe des aliments et boissons (1.8%), en particulier dans le sous-groupe des beurrieres et fromageries (10.2%) et dans l'abattage et le conditionnement de la viande (1.7%). Des hausses ont aussi été enregistrées dans le groupe des produits du bois (4.8%), à la suite des augmentations des prix dans les scieries et ateliers de rabotage (6.5%). Les augmentations de prix survenues dans le sous-groupe des usines de pâtes et papiers (0.8%) expliquent en grande partie l'augmentation de l'indice du groupe du papier et des activités connexes (0.7%). Les baisses enregistrées au cours de cette période ont été relativement peu importantes.

General Wholesale Price Index (1935-39=100)

The general wholesale price index increased 1.1% in April to 483.0 from the revised March index of 477.8. It was 6.4% higher than a year earlier. Four of the eight major groups increased while four decreased.

The iron products group index increased 3.2% to 510.4 from the revised March index of 494.8 due to higher prices recorded for pig iron 49.3%, tinplate and galvanized sheets 5.6%, and iron foundries and steel pipe and tubing 1.1%. The animal products group index rose 2.6% to 499.3 from the revised March index of 486.5 due to increases in the price of hides and skins 37.3%, leather 6.1%, dressed fowl 6.1%, milk and its products 5.4%, livestock 3.2%, fresh meats 2.5%, and furs 2.3%. The wood products group index increased 2.5% to 635.4 from the revised March index of 620.0 due to a 17.7% increase in spruce, a 5.1% increase in fir, a 4.2% increase in hemlock and a 3.7% increase in cedar. The non-metallic minerals group index rose 0.7% due mainly to increases in natural gas 12.7%, sulphur 6.4% and sand and gravel 5.4%.

The vegetable products group index decreased 1.1% to 474.8 from the revised March index of 480.0 due to decreases in tobacco 11.4%, potatoes 9.2%, miscellaneous vegetable products 3.7%, and sugar and its products 2.5%. The non-ferrous metals group index declined 0.9% to 412.2 from the revised March index of 415.9 due to decreases in silver 7.1%, lead and its products 4.4%, gold 4.4% and tin 2.7%. The chemical products group index declined 0.3% and textile products group 0.1%.

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros a enregistré une hausse de 1.1% en avril, pour passer de 477.8 (chiffre rectifié) en mars à 483.0. Il était de 6.4% supérieur à celui d'avril 1974. Parmi les huit groupes principaux, quatre ont augmenté et quatre ont diminué.

L'indice du groupe des produits du fer a augmenté de 3.2%, passant de 494.8 (chiffre rectifié) en mars à 510.4, en raison de la hausse des prix du fer en gueuse (49.3%), du fer-blanc et des feuilles galvanisées (5.6%) et des fonderies de fer et tuyaux et tubes d'acier (1.1%). Dans le groupe des produits animaux, on a observé une hausse de 2.6% de l'indice qui est passé de 486.5 (chiffre rectifié) en mars à 499.3, à la suite de hausses des prix de peaux vertes et des peaux (37.3%), du cuir (6.1%), de la volaille habillée (6.1%), du lait et de ses produits (5.4%), du bétail (3.2%), de la viande fraîche (2.5%), et des fourrures (2.3%). En ce qui concerne l'indice du groupe des produits du bois, il a aussi enregistré une augmentation, qui a été de 2.5%, pour passer de 620.0 (chiffre rectifié) en mars à 635.4, en raison de l'augmentation des prix de l'épinette (17.7%), du sapin (5.1%), de la pruche (4.2%) et du cèdre (3.7%). L'indice du groupe des minéraux non métalliques a aussi progressé (de 0.7%), en raison surtout de hausses des prix du gaz naturel (12.7%), du soufre (6.4%) ainsi que du sable et du gravier (5.4%).

L'indice du groupe des produits d'origine végétale a diminué de 1.1%, passant de 480.0 (chiffre rectifié) en mars à 474.8; cette baisse était attribuable aux diminutions des prix du tabac (-11.4%), des pommes de terre (-9.2%), des produits végétaux divers (-3.7%) et du sucre et de ses produits (-2.5%). Le groupe des métaux non ferreux a connu une baisse de 0.9%, l'indice passant de 415.9 (chiffre rectifié) en mars à 412.2, à la suite de baisses des prix de l'argent (-7.1%), du plomb et de ses produits (-4.4%), de l'or (-4.4%) et de l'étain (-2.7%). Quant à l'indice du groupe des produits chimiques, il a régressé de 0.3% même que celui du groupe des produits textiles (-0.1%).

Security Price Indexes (1961=100)

The investors' index of common stock prices rose 3% from 150.4 in March to 152.3 in April. Of the three major groups, only industrials reported a gain, moving up 4% to 156.6. Utilities and finance dropped 1.8% and 0.5% to 128.6 and 166.0 respectively. Among the industrials there were seven increases and six decreases. The greatest increase was registered by industrial mines, climbing 9.9% to 104.6. Averages showed the greatest loss, falling 8.8% to 177.5. In utilities all five sub-groups declined. Electric power and gas distribution both dropped 2.6% to 86.2 and 140.9 respectively. In finance, banks advanced slightly (0.1%) to 196.9 while investment and loans reflected losses of 2.5% (117.5).

In April, the index of mining stock prices remained almost unchanged, gaining 0.2% to 123.8. Golds fell 4.9% to 86.6 while base metals jumped 7.8% to 84.0.

The two supplementary price indexes reported gains, uranium rose 4.4% to 235.2 and primary oil and gas increased 2.5% to 303.3.

The preferred stock index declined 0.7% to 60.8 in April from 61.2 in March.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets rose 1.9% in April to 462.1 from the revised March index of 453.6. The animal products index increased 3% to 536.4 from the revised index of 517.6 due to higher prices on both markets, for butterfat, steers, hogs and fluid milk, and for lambs in the East and calves, cheesemilk and raw wool in the West. Price decreases were shown for eggs, calves, cheesemilk and poultry in the East, and for lambs in the West.

The field products index declined 0.5% to 387.8 from 389.7 reflecting lower prices for tobacco, potatoes and corn in the East and for hay in the West. Higher prices were shown for hay, oats, barley and wheat in the East, and for flax in the West. Higher prices were shown for rye on both markets.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, rose 0.1% to 484.7 in April from the revised March index of 484.1. Prices were

Indices des cours des valeurs mobilières (1961=100)

L'indice des cours des actions ordinaires a augmenté de 1.3% en avril, pour passer de 150.4 en mars à 152.3. Des trois grands groupes, celui des valeurs industrielles a été le seul à connaître une hausse (2.4%) son indice s'établissant à 156.6. Les services publics et les finances ont accusé une baisse de 1.8% et 0.5% respectivement, pour passer à 128.6 et 166.0. Dans le groupe des valeurs industrielles il y a eu sept augmentations et six baisses. La plus forte hausse s'est produite dans le sous-groupe des mines industrielles dont l'indice a atteint 104.6 (9.9%); tandis que la plus forte baisse a été enregistrée dans le sous-groupe des boissons dont l'indice est tombé à 177.5 (-8.8%). Les cinq sous-groupes du groupe des services publics ont tous accusé une baisse; l'énergie électrique et la distribution de gaz ont tous les deux fait une chute de 2.6%, leur indice s'établissant à 86.2 et 140.9 respectivement. En ce qui concerne le groupe des finances, l'indice des banques a légèrement progressé (0.1%) pour s'établir à 196.9 tandis que celui des placements et prêts a enregistré des pertes de 2.5% pour se fixer à 117.5.

En avril, l'indice des prix des titres miniers n'a presque pas varié, enregistrant une hausse de 0.2% pour s'établir à 123.8. Par contre l'indice des aurifères a baissé de 4.9% pour s'établir à 198.6 et celui des métaux communs a grimpé de 7.8% pour atteindre 84.0.

Pour ce qui est des deux indices de prix supplémentaires, ils ont enregistré des hausses, de 4.4% dans le cas de l'uranium (pour atteindre 235.2) et de 2.5% dans le cas du pétrole et du gaz primaires (pour se fixer à 303.3).

L'indice des actions privilégiées a régressé de 0.7% en avril, passant de 61.2 en mars à 60.8.

Indice des prix des produits agricoles canadiens (1935=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a progressé de 1.9% en avril pour passer de 453.6 (chiffre rectifié) en mars à 462.1. L'indice des prix des produits d'origine animale a connu une hausse de 3.6%, passant de 517.6 (chiffre rectifié) à 536.4, à la suite de l'augmentation des prix du gras de beurre, des bouvillons, des porcs et du lait de consommation sur les deux marchés, de la hausse des prix des agneaux sur les marchés de l'Est et de la hausse des prix des veaux, du lait de fromagerie et de la laine brute sur les marchés de l'Ouest.

L'indice des prix des produits de grande culture a baissé de 0.5%, passant de 389.7 à 387.8; cette baisse était attribuable à la diminution des prix du tabac, des pommes de terre et du maïs sur les marchés de l'Est et des prix du foin sur les marchés de l'Ouest. On a observé une hausse des prix du foin, de l'avoine, de l'orge et du blé sur les marchés de l'Est et des prix du lin sur les marchés de l'Ouest. On a aussi enregistré une augmentation des prix du seigle sur les deux marchés.

Indice des prix de trente matières industrielles (1935-39=100)

L'indice des prix de trente matières industrielles, calculé comme une moyenne géométrique non pondérée, a augmenté de 0.1%, pour passer de 484.1 (chiffre rectifié) en mars à 484.7 en

higher for ten commodities, lower for seven and unchanged for thirteen. Principal changes included increases for beef hides, spruce lumber, steers, hogs, raw wool, iron ore, bleached sulphite pulp, oats and domestic wheat. The most notable decreases were domestic lead, rosin, cottonseed oil and raw rubber, followed by sisal, raw sugar and raw cotton.

The Consumer Price Index

The Consumer Price Index for Canada (1961 = 100) rose 0.5% to 179.8 in April from 178.9 in March, extending the trend of relatively low monthly rates of increase which has been experienced since the beginning of this calendar year. Nearly two-fifths of the overall advance in the latest month was attributable to higher prices for private and public transportation, while an increase of 0.5% in the Food index accounted for another one-quarter. The index for All-Items excluding Food likewise moved up by 0.5%, registering its smallest monthly increase since February 1974, partly because of the effect of the Ontario sales tax reduction. In the twelve-month period between April 1974 and April 1975, the total CPI registered an increase of 11.1%.

Reversing its decline of the preceding month, the Food index between March and April increased 0.5%, mainly as a result of higher prices for dairy products, fresh milk and butter in particular. Prices were also higher for cereal and bakery products as well as for fresh fruit. At the beginning of April, meat prices on average, registered a 1.6% decline compared with a month earlier with beef quotations moving down for the fourth consecutive month. Pork prices, decreasing for the first time since last November, also contributed to the decline in the meat index. Sugar prices continued their downward movement reaching a level some 40% below their late-1974 peak.

The 0.5% increase in the index for All-Items other than Food was attributable to such factors as higher automobile repair charges, rises in local transit fares, increased dental fees, and advances in shelter costs for both owned and rented accommodation. Fuel oil prices and electricity rates also moved up. In contrast, clothing which edged down by 0.1%, was the only major component of the Consumer Price Index to register a decrease in the latest month.

Another perspective of price movements is provided when the Consumer Price Index is viewed according to goods and services. Between March and April, the goods component advanced 0.3% while the services segment increased 0.9%.

On a seasonally adjusted basis, the March to April rise in the All-Items Consumer Price Index was 0.6%, comprising a 0.3% increase for Food and a 0.6% rise in the index for All-Items excluding Food. In April, the **current** annual rate of change in the CPI(1), based on the seasonally adjusted movement since three months earlier, was 7.4%, up slightly from the March rate of 7.0% but still well below the rates recorded throughout 1974.

avril. Les prix de dix marchandises ont augmenté, ceux de sept ont baissé et ceux de dix n'ont pas varié. Les principales variations comprennent des hausses de prix pour les peaux de boeuf, le bois de sciage d'épinette, les bouvillons, les porcs, la laine brute, le minerai de fer, la pâte blanchie au sulphite, l'avoine et le blé canadien. Les baisses les plus importantes se sont produites dans le cas du plomb canadien, de la résine, de l'huile de coton et du caoutchouc brut; viennent ensuite le sisal, et le sucre et le coton bruts.

L'indice des prix à la consommation

L'indice des prix à la consommation pour le Canada (1961 = 100) a enregistré une augmentation de 0.5%, pour passer de 178.9 en mars à 179.8 en avril, poursuivant ainsi la tendance à une hausse relativement faible des taux d'augmentation mensuelle que l'on observe depuis le début de l'année civile. Près de deux-cinquièmes de la hausse globale enregistrée le mois dernier proviennent de la hausse des frais de transport public et privé; une augmentation de 0.5% enregistrée par l'indice de l'alimentation est responsable en outre d'un quart de la hausse globale de l'indice. L'indice d'ensemble, sans les aliments a aussi augmenté de 0.5%; il s'agit là de la plus faible augmentation d'un mois depuis février 1974, et qui s'explique en partie par la réduction de la taxe de vente en Ontario. Entre avril 1974 et avril 1975, l'indice d'ensemble des prix à la consommation a augmenté de 11.1%.

Après avoir baissé en mars, l'indice de l'alimentation a augmenté de 0.5% en avril, en raison, surtout de la hausse des prix des produits laitiers, en particulier du lait frais et du beurre. Le prix des céréales, des produits de boulangerie et des fruits frais ont aussi monté. Au début d'avril, le prix moyen de la viande a baissé de 1.6% par rapport au mois précédent; le prix du boeuf enregistrait une diminution pour le quatrième mois consécutif. La baisse du prix du porc, la première que l'on enregistrait depuis novembre, a aussi contribué à la diminution de l'indice du prix des viandes. Le prix du sucre a continué à baisser; il se situait en avril à un niveau inférieur d'environ 40% au sommet atteint vers la fin de 1974.

La hausse de 0.5% de l'indice d'ensemble, sans les aliments, est attribuable à des facteurs tels la hausse des frais de réparation d'autobomiles, des tarifs de transports locaux et des honoraires de dentiste, et ainsi que la hausse de l'élément logement, aussi bien en ce qui concerne les frais de propriété que les loyers. Le prix du mazout et les tarifs d'électricité ont aussi monté. Par contre, l'indice de l'habillement est la seule composante qui ait diminué au cours du mois dernier (-0.1%).

L'indice des prix à la consommation reclassés par biens et services présente un autre aspect de la variation des prix. Entre mars et avril, les biens ont augmenté de 0.3% et les services ont enregistré une hausse de 0.9%.

Après désaisonnalisation, l'indice d'ensemble des prix à la consommation a augmenté de 0.6%, entre mars et avril soit une hausse de 0.3% pour les aliments et de 0.6% pour l'indice d'ensemble sans les aliments. En avril, le taux annuel **courant** de variation de l'I.P.C., basé sur le mouvement désaisonnalisé des trois derniers mois, était de 7.4%, soit un peu supérieur à celui de mars (7.0%) mais encore bien inférieur aux taux enregistrés en 1974.

Consumer price indexes - Canada (1961=100) - Indices des prix à la consommation:							
All-items - Indice d'ensemble	179.8	178.9	161.9	160.8	0.5	0.7	11.1
Food - Aliments	204.3	203.3	180.8	180.5	0.5	0.1	13.0
Housing - Habitation	177.8	177.3	161.4	160.7	0.3	0.4	10.2
Clothing - Habillement	159.6	159.8	149.5	148.1	- 0.1	0.9	6.8
Transportation - Transports	163.7	161.5	145.9	144.2	1.4	1.2	12.2
Health and personal care - Soins personnels et hygiène	185.7	182.8	166.8	163.5	1.6	2.0	11.3
Recreation, education and reading - Loisirs, formation et lecture	170.4	169.5	152.9	150.6	0.5	1.5	11.4
Tobacco and alcohol - Tabacs et alcools	158.1	157.4	141.5	139.3	0.4	1.6	11.7
Security price indexes - (1961=100) - Indices des cours de valeurs mobilières:							
Investors index - Total - Indices des portefeuillistes	152.3	150.4	178.2	190.6	1.3	- 6.5	- 14.6
Industrials - Total - Industriels	156.6	152.9	191.4	204.4	2.4	- 6.3	- 18.2
Industrial mines - Mines industrielles	104.6	95.2	129.1	144.5	9.9	- 10.7	- 19.0
Foods - Aliments	138.4	140.5	156.0	160.5	- 1.5	- 2.8	- 11.3
Beverages - Boissons	177.5	194.6	237.5	261.5	- 8.8	- 9.2	- 25.3
Textiles and clothing - Textiles et vêtements	126.1	120.1	174.7	178.3	5.0	- 2.0	- 27.8
Pulp and paper - Pâte et papier	116.7	111.3	140.6	152.2	4.9	- 7.6	- 17.0
Printing and publishing - Impression et édition	332.5	333.2	335.6	358.3	- 0.2	- 6.3	- 0.9
Primary metals - Métaux primaires	108.2	104.0	132.9	136.7	4.0	- 2.8	- 18.6
Metal fabricating - Fabrications des métaux	174.4	168.1	195.1	202.0	3.7	- 3.5	- 10.6
Non-metallic minerals - Minéraux non métalliques	148.4	149.6	177.6	183.6	- 0.8	- 3.3	- 16.4
Petroleum - Pétrole	222.9	217.1	302.1	318.2	2.7	- 5.1	- 26.2
Chemicals - Produits chimiques	111.9	105.1	119.3	122.8	6.5	- 2.9	- 6.2
Construction - Construction	144.6	146.7	170.3	175.5	- 1.4	- 2.9	- 15.1
Retail trade - Commerce de détail	152.1	152.6	144.9	154.3	- 0.3	- 6.1	- 5.0
Utilities - Total - Services publics	128.6	130.9	133.7	143.2	- 1.8	- 6.6	- 3.8
Pipeline - Pipe-line	112.7	114.2	129.5	141.0	- 1.3	- 8.2	- 13.0
Transportation - Transport	305.0	309.4	297.9	327.0	- 1.4	- 8.9	- 2.4
Telephone - Téléphone	93.6	95.1	87.3	90.3	- 1.6	- 3.3	- 7.2
Electric power - Énergie électrique	86.2	88.5	101.8	105.9	- 2.6	- 3.9	- 15.3
Gas distribution - Distribution du gaz	140.9	144.6	157.7	172.1	- 2.6	- 8.4	- 10.6
Finance - Total - Finances	166.0	166.9	177.0	190.7	- 0.5	- 7.2	- 6.2
Banks - Banques	196.9	196.7	214.3	227.7	0.1	- 5.9	- 8.1
Investment and loan - Placements et prêts	117.5	120.5	116.9	132.1	- 2.5	- 11.5	0.5
Mining - Actions minières:							
Mining Index - Total - Indices des prix des titres minières	123.8	123.6	161.6	173.1	0.2	- 6.6	- 23.4
Gold - Or	198.6	208.9	267.3	284.0	- 4.9	- 5.9	- 25.7
Base metals - Métaux communs	84.0	77.9	105.1	113.8	7.8	- 7.7	- 20.1
Supplementary indexes - Indices supplémentaires:							
Uranium - L'uranium	235.2	225.2	272.1	304.6	4.4	- 10.7	- 13.6
Primary oils and gas - Pétrole et gaz primaires	303.3	295.8	431.8	487.4	2.5	- 11.4	- 29.8

- (1) Gross weighted, including inter-industry shipments. For explanation see page 91. - Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication, voir page 91.
- (2) Indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont sujets à révision.
- (3) Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1974 are subject to revision. See notes page 92 for details of Western grain prices. - La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1974 sont sujets à révision. Voir les renvois de la page 92 pour les prix détaillés des grains de l'Ouest.

Annuel

Milk sold to householders, stores, etc. - Lait vendu aux ménages, aux magasins, etc.

01 1053 013

Cream sold to householders, stores, etc. - Crème vendue aux ménages, aux magasins, etc.

01 1053 018

Ice cream (not made from purchased mix) - Crème glacée (sauf à base de mélange acheté).

01 1053 020

Chocolate drink - Boisson au chocolat

01 1053 065

Condenseries - Industries des produits condensés

01 1055

Evaporated milk, case goods - Lait évaporé, sous emballage.

01 1055 030

Whole milk powder, spray process - Lait entier en poudre, obtenu par vaporisation.

01 1055 032

Skim milk powder, spray process - Poudre de lait écrémé, par vaporisation.

01 1055 039

Ice cream manufacturers - Fabricants de crème glacée

01 1056

Ice cream (excl. of that made from purchased mix) - Crème glacée (sauf à base de mélange acheté).

01 1056 020

Ice cream mix, made and sold as mix - Mélange pour crème glacée, fabriqué et vendu comme tel.

01 1056 023

Process cheese manufacturers - Fabricants de fromage fondu.

01 1070

Process cheese (from cheddar cheese base) - Fromage fondu (à base de cheddar).

01 1070 001

Fish products industry - Industrie du poisson

01 1110

Pacific halibut, frozen, round or dressed - Flétan congelé, entier ou habillé (Pacifique).

01 1110 017

 TABLEAU 2. Indice des prix de vente dans l'industrie par industrie et par certains produits

		1961 = 100												Annual
Industries and selected commodities(1)		Month - Mois												
Industrie et certains produits(1)		J	F	M	A	M	J	J	A	S	O	N	D	Annuel
Kettles, electric, domestic - Bouilloires électriques, de ménage.	1971	99.4	99.4	101.9	102.6	102.6	102.6	106.4	106.4	106.4	106.4	106.4	106.4	103.9
	1972	107.5	107.5	107.5	107.4	107.4	107.4	109.0	109.0	109.0	109.0	109.0	109.0	108.2
	1973	109.0	109.0	109.0	109.0	109.0	110.5	111.3	111.3	113.8	115.8	114.8	111.6	
	1974	119.0	121.6	121.6	124.1	124.1	131.8	131.8	131.8	137.1	137.1	141.8		
	1975	145.1	145.1	145.1	145.1									
16 3310 031														
Toaster, electric, domestic, automatic - Grille-pain, électriques, de ménage, automatiques	1971													
	1972													
	1973	119.2	119.2	120.3	120.3	120.3	120.3	120.3	123.3	123.3	123.3	123.3	123.3	121.4
	1974	126.3	127.5	127.5	130.6	130.6	131.2	131.2	131.2	142.7	142.7	142.7	142.7	
	1975	145.7	149.1	149.1	149.1									
16 3310 061														
Vacuum cleaners, electric, domestic, upright floor models - Aspirateurs, électriques, de ménage, verticaux	1971													
	1972													
	1973	112.7	112.9	112.9	113.4	113.4	113.4	113.4	113.4	113.4	113.4	113.4	113.4	113.3
	1974	114.6	114.6	114.6	118.7	120.8	120.8	120.8	120.8	125.4	127.0	127.0	127.0	
	1975	131.0	131.0	131.0	132.2									
16 3310 065														
Vacuum cleaners, electric, domestic, cylinder type - Aspirateurs électriques, ménagers, genre traîneau.	1971	94.9	94.9	94.9	94.9	94.9	95.4	95.4	95.4	95.4	95.4	95.4	95.4	95.2
	1972	94.4	94.4	95.5	95.5	95.5	95.5	95.5	95.5	95.2	95.2	95.2	95.8	95.3
	1973	96.1	96.1	96.1	97.4	97.4	97.4	97.4	97.4	97.4	97.4	98.8	98.8	97.3
	1974	102.5	100.7	100.7	103.8	103.8	103.8	103.8	103.8	104.7	104.7	108.5	108.5	
	1975	114.5	114.5	116.9	116.9									
16 3310 066														
Foodmixers, juicers, blenders, electric, domestic - Robots ménagers, électriques, de ménage.	1971	104.3	104.3	104.3	104.3	104.3	104.3	104.3	104.3	104.3	104.3	104.3	104.3	104.3
	1972	107.8	107.8	107.8	107.8	107.8	107.8	107.8	107.8	107.8	107.8	107.8	107.8	107.8
	1973	108.5	108.5	108.5	108.5	108.5	103.7	105.0	105.0	105.0	105.0	105.0	105.0	106.4
	1974	105.0	106.0	107.0	109.5	109.5	115.2	118.2	118.2	118.2	118.2	126.0	126.0	
	1975	129.2	129.2	130.7	130.7									
16 3310 140														
Baseboard heaters - Radiateurs de plinthes	1971													
	1972													
	1973	72.1	72.1	70.6	63.7	63.7	63.7	63.7	63.7	63.7	63.7	63.7	63.7	65.7
	1974	64.7	74.1	74.1	74.3	74.3	75.4	75.4	75.4	76.1	76.1	75.8	75.8	
	1975	77.3	77.6	77.6	77.6									
16 3310 141														
Water tank heaters, domestic, electric, automatic complete - Chauffe-eau électriques: à usage domestique automatiques, équipés.	1971													
	1972													
	1973	113.9	113.9	113.9	114.3	114.3	114.3	116.0	116.0	121.0	122.0	122.0	127.1	117.4
	1974	127.1	127.1	135.8	138.2	138.2	138.2	145.7	147.1	147.1	147.1	147.1	149.0	
	1975	152.0	154.7	154.7	154.7									
16 3310 143														
Manufacturers of major appliances - Fabricants de gros appareils ménagers.	1971	98.9	99.3	99.2	99.8	100.1	100.2	100.2	100.7	100.8	101.0	101.0	101.1	100.2
	1972	101.6	101.8	101.9	102.1	102.1	102.1	102.1	102.0	101.9	101.9	101.9	101.9	101.9
	1973	102.5	102.8	102.5	102.8	102.9	103.5	103.5	104.2	104.8	105.3	106.3	107.3	104.0
	1974	109.4	112.7	113.3	116.5	114.9	116.4	119.3	122.5	127.5	129.4	125.8	126.0	
	1975	133.9	134.9	136.1	138.2									
16 3320														
Dryers, mechanical, electric - Sécheuses mécaniques, électriques.	1971	101.0	101.0	101.0	101.8	102.0	102.0	102.0	103.1	103.1	103.4	103.4	103.4	102.3
	1972	104.3	104.3	104.3	104.3	104.3	104.3	104.3	104.3	103.8	103.8	103.8	102.8	104.0
	1973	102.6	102.6	102.6	102.6	102.6	102.6	101.3	103.3	104.0	104.4	104.9	105.8	103.3
	1974	108.9	110.1	110.1	109.7	110.5	112.2	113.1	113.1	121.1	123.0	124.8	124.8	
	1975	125.8	126.7	126.7	125.7									
16 3320 016														
Washing machines, domestic, electric, automatic type - Machines à laver, de ménage électriques, automatiques.	1971	103.3	103.3	103.3	104.3	104.5	104.5	104.5	105.2	105.2	105.4	105.4	105.4	104.5
	1972	106.4	106.4	106.4	107.3	107.3	107.3	107.3	107.3	106.4	106.6	106.6	105.8	106.8
	1973	105.6	105.9	104.2	104.2	105.0	105.0	105.0	106.8	107.5	107.9	108.8	111.9	105.8
	1974	112.8	114.5	114.5	116.8	116.4	118.0	118.5	118.5	125.6	126.7	128.5	128.5	
	1975	130.3	130.5	131.6	130.0									
16 3320 020														
Home and farm freezers, chest - Congélateurs ménagers et agricoles, horizontaux.	1971	79.7	80.1	80.2	80.5	80.8	80.2	80.7	80.7	80.7	80.7	80.7	80.7	80.4
	1972	80.4	80.4	80.4	80.5	80.5	80.5	80.5	79.8	79.8	79.8	79.8	79.8	80.2
	1973	80.0	80.0	80.0	80.0	80.0	80.0	80.0	80.5	80.5	80.9	80.9	82.0	80.4
	1974	85.0	85.0	87.0	90.1	90.9	92.0	92.0	97.4	98.5	101.6	105.3	105.3	
	1975	107.3	107.5	111.1	109.5									
16 3320 028														
Household refrigerators, electric - Réfrigérateurs électriques, de ménage.	1971	93.2	93.2	93.2	93.2	93.2	93.2	93.2	93.2	93.2	93.5	93.5	93.5	93.3
	1972	94.4	94.9	94.9	94.9	94.9	94.9	94.9	94.9	94.9	95.0	95.0	95.2	94.9

		1975	185.6	187.0	187.1	188.9									

(1) Indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont
sujets à révision.

(2) This industry was changed in commodity content, price sample and weights in accordance with
significant changes within the industry. Figures are revised from January 1971 to date. - La composition
en marchandises, les échantillons de prix et les mesures de poids ont changé dans cette industrie
conformément à des changements importants survenus dans l'industrie même. Les chiffres sont révisés
de janvier 1971 à aujourd'hui.

(3) Effective January 1973 changes have been made in the calculation of this index. For details see page 91. - À
compter de janvier 1973, on a modifié le calcul de cet indice. Pour plus de détails, voir la page 91.

(4) An extensive revision of the weight and price sample (including the incorporation of goods purchased and resold in
same condition as purchased) necessitated by developments in the industry's production pattern since 1961 have
resulted in the introduction of new price indexes and a discontinuity in the industry price index. - Une révision
approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus
sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a
amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix
industriels.

	Old series - Ancienne série	New series - Nouvelle série
December - 1970 - Décembre	95.1	92.3
January - 1971 - Janvier	95.1	92.1
Average - 1971 - Moyenne	95.2	91.8

(5) This series has been revised from January 1969 forward. An expanded list of establishments and commodities has been
selected and prices for these have been aggregated to a total industry index using 1971 shipments data. The price
quotations are, in general, of an improved quality. Selected commodity data on a 1971 time and weight base, are
available on request. - Les chiffres de cette série ont été révisés à partir de janvier 1969. Une liste
augmentée des établissements et des produits a été établie, et les prix de ces produits ont été agrégés pour
former un indice total de l'activité économique à partir des données sur les livraisons de 1971. De manière
générale, le calcul des prix est plus fiable. Les utilisateurs peuvent obtenir sur demande des données sur
certains produits utilisant les facteurs de pondération de 1971 et dont la période de référence est 1971.

(6) Motor gasoline prices are 'List' and may not be a reflection of actual transaction prices. - Les prix
de l'essence sont des prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction.

(7) Gross weighted, including inter-industry shipments. For explanation see page 91. - Indice pondéré brut
comprenant les livraisons inter-industrielles. Pour toute explication voir page 91.

- (1) All indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont sujets à révision.
- (2) Includes gold. - Y compris l'or.
- (3) Consists of iron products and non-ferrous metals groups above but excluding gold. - Se compose des groupes élémentaires des produits du fer et des produits des métaux non ferreux moins l'or.
- (4) These two series comprise the General Wholesale Index. - Ces deux séries comprennent l'indice général de gros.
- (5) Excludes gold. - Sauf l'or.
- (6) See page 93 for additional information. - Pour des informations additionnelles voir page 93.
- (7) Final to July 1974. See page 92 for details on Western grain prices and specific publications wherein final indexes or earlier years may be found. - Indices définitifs jusqu'en juillet 1974. Pour des données détaillées sur le prix des céréales de l'Ouest, voir page 92 ainsi que les publications spéciales qui contiennent les derniers indices ou ceux des années précédentes.
- (8) All indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont sujets à révision.

TABLE 6. Wholesale Price Indexes of Selected Primary Commodities(1)

TABLEAU 6. Indices des prix de gros de certains produits bruts(1)

1935-39=100

Primary commodities Produits bruts	Months - Mois				Annual averages Moyenne annuelle		
	Apr. 1975 Avr.	Mar. 1975 Mars	Apr. 1974 Avr.	Mar. 1974 Mars	1974	1973	1972
Coffee, green - Café vert	463.6	472.8	511.7	505.2	492.6	468.0	358.1
Copper, electrolytic - Cuivre électrolytique ...	590.9	590.9	722.5	722.5	730.3	594.4	474.3
Cotton, raw - Coton brut	399.9	389.1	565.0	571.9	526.8	389.7	330.0
Eggs - Oeufs	187.2	201.3	225.4	224.5	217.7	196.1	136.2
Fruits, fresh - Fruits frais	313.1	303.0	291.0	251.9	284.3	263.9	223.5
Grains - Céréales	520.0	516.7	575.1	586.6	562.9	406.1	205.7
Hides and skins - Cuirs et peaux vertes	192.2	139.3	262.3	260.3	220.2	323.9	294.1
Lead, electrolytic - Plomb électrolytique	471.6	493.6	512.6	500.4	500.2	367.0	323.2
Livestock - Bétail	537.8	521.2	565.4	587.9	611.1	606.7	458.7
Onions - Oignons	433.4	294.3	312.2	356.3	328.7	476.7	259.8
Potatoes - Pommes de terre	222.8	245.5	807.3	703.0	626.7	485.9	219.1
Rubber, raw - Caoutchouc brut	185.1	190.8	269.2	305.0	246.8	222.7	114.0
Scrap iron and steel - Déchets de fer et d'acier	578.7	589.2	817.4	783.7	740.6	388.8	268.1
Silver - Argent	1065.4	1147.3	1131.2	1278.4	1180.8	663.3	430.6
Steers - Bouvillons	635.1	608.5	742.4	761.8	803.9	645.3	597.6
Sugar, raw - Sucre brut	843.0	912.0	731.3	697.7	943.5	321.0	253.9
Tin - Etain	707.5	726.8	843.1	762.4	764.4	435.6	338.8
Wool, raw domestic - Laine brute indigène	239.0	236.9	375.4	407.8	334.3	492.5	201.7
Wool, raw, imported - Laine brute importée	237.0	226.3	318.7	338.8	284.4	379.6	196.8
Zinc, prime, western - Zinc de première qualité, de l'Ouest	822.8	822.8	756.1	689.4	767.2	522.6	411.6

(1) All indexes for 1973, 1974 and 1975 are subject to revision. - Les indices pour 1973, 1974 et 1975 sont sujets à révision.

TABLE 7. Wholesale Prices of Selected Commodities
(All prices given in Canadian funds)

TABLEAU 7. Prix de gros de certains produits
(en dollars canadiens)

Commodity - Produit	Months - Mois				Annual averages - Moyenne annuelle		
	Apr. 1975	Mar. 1975	Apr. 1974	Mar. 1974	1974	1973	1972
	Avr.	Mars	Avr.	Mars	dollars		
<u>Vegetable products - Substances végétales:</u>							
Barley, No. 1 feed, bu. - Orge, no 1 (four- ragère), le boisseau	2.46	2.50	2.70	2.66	2.75	1.95	1.13
Oats, No. 2 C.W., bu. - Avoine, no 2 O.C., le boisseau	1.77	1.75	1.84	1.84	1.89	1.38	.76
Potatoes, No. 1 Saint John, 75-lb. bag - Pommes de terre, no 1, Saint-Jean, le sac de 75 livres	1.99	2.55	9.41	8.66	7.08	5.73	2.68
Sugar, granulated, std., Montreal, 100-lb. bag - Sucre granulé, ordinaire, Montréal, le sac de 100 livres	36.10	36.20	32.40	29.65	39.78	13.73	13.24
Wheat, No. 1 C.W. Red Spring 13.5% Protein, bu. - Blé 1. C.O. Rouge de printemps 13.5 % protéiné	5.18	5.15	5.79	5.84	5.58	3.99	..
<u>Animal products - Produits animaux:</u>							
Butter, prints, 1st grade, Montreal, lb. - Beurre en mottes, 1re qualité, à Montréal, la livre	1.07	.94	.81	.75	.83	.74	.71
Eggs, grade "A", large, Toronto, doz. - Oeufs, Qualité "A", gros, à Toronto, la douzaine ..	.59	.68	.78	.78	.75	.70	.45
Hides, packer, light native steers, lb. - Peaux à l'abattoir, bouvillons légers indi- gènes, la livre24	.20	.31	.33	.27	.36	.33
Hogs, Toronto (bonus excluded) 100-lb. - Porcs, Toronto (prime exclue), les 100 livres	52.96	51.29	42.74	45.45	50.59	54.85	37.44
Steers, Aver. 1,2&3, Toronto, 100-lb. - Bou- villons, Moy. 1,2&3, Toronto, les 100 livres	41.25	39.00	46.75	47.50	50.36	36.79	..
<u>Textile products - Produits textiles:</u>							
Wool, raw, Australian, 64's, clean, lb. - Laine brute d'Australie, 64, propre, la livre	1.59	1.49	2.09	2.19	1.82	2.45	1.21
Wool, raw, Eastern, domestic, lb. - Laine brute de l'Est, indigène, la livre52	.52	.70	.75	.63	.81	.39
<u>Wood products - Produits du bois:</u>							
Shingles, asphalt, 12" x 36", 100 sq. ft. - Bardeaux d'asphalte, 12" x 36", les 100 pieds carrés	10.85	10.85	10.26	10.10	10.68;	8.61	7.78
<u>Non-ferrous metals products - Produits des métaux non ferreux:</u>							
Copper, electrolytic, domestic, 100-lb. - Cuivre électrolytique, indigène, 100 livres	63.38	63.38	77.50	77.50	78.33	63.75	50.88
Zinc, high grade, electrolytic, 100-lb. - Zinc, Qualité supérieure, électrolytique, 100 livres	37.50	37.50	34.00	31.00	35.00	24.02	19.10
<u>Chemical products - Produits chimiques:</u>							
Sodium carbonate, (soda ash) 58%, 100-lb. - Carbonate de soude (cendre de soude) 58 %, les 100 livres	4.80	4.80	3.50	3.50	3.85	2.94	2.65
Sulphuric acid, 66 Baume, 2000-lb. ton - Acide sulfurique, 66 Baume, la tonne (2,000 livres)	34.00	34.00	32.00	32.00	31.92	31.00	31.00

All-items Consumer Price Index converted to 1949=100, April 1975 - L'indice des prix à la consommation de tous les éléments converti à 1949=100, avril 1975 232.3

(1) Indexes prior to May 1973 incorporate 1957 expenditure weights, those for May 1973 forward are based on 1967 expenditures. The revised series is linked to its predecessor at April 1973. For further explanation, see page 94. - Avant mai 1973 les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957; à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 94.

TABLE 9. Consumer Price Indexes for Canada - Main Groups and Selected Components and Items(1)

TABLEAU 9. Indices des prix à la consommation, Canada - Groupes principaux, éléments et articles choisis(1)

1961=100

	Apr. 1975 Avr.	Mar. 1975 Mars	Apr. 1974 Avr.	Mar. 1974 Mars	1974	1973	1972
All-items - Indice d'ensemble	179.8	178.9	161.9	160.8	166.8	150.4	139.8
Food - Aliments	204.3	203.3	180.8	180.5	188.4	162.0	141.4

TABLEAU 11. Indices des prix à la consommation, agglomérations urbaines(1)

Nota: (i) Les indices mesurent dans chaque ville le pourcentage de variation des prix à la consommation depuis la période de base jusqu'à des périodes subséquentes. Ils ne peuvent servir à comparer les niveaux des prix d'une ville à l'autre. (ii) Pour les indices comparatifs des prix de détail, se reporter au tableau 14.

36	May - Mai							
37	June - Juin							

- (1) Indexes prior to May 1973 incorporate 1957 expenditure weights (1964 expenditure weights for Québec and Thunder Bay); those for May 1973 forward are based on 1967 expenditures. The revised series are linked to their predecessors at April 1973. For further explanation see page 94.
- (2) As of January 1975, the separate consumer price indexes for Saskatoon, Regina, Edmonton and Calgary supersede the combined-cities series. Users of the combined series are therefore advised to switch to the separate city indexes which are available only from April 1973. (The historical data for the combined-cities series are presented in Table 11A). Should users have any questions, contact the Retail Prices Section or consult the Retail Prices and Living Costs Service Bulletin, Catalogue 62-005, Volume 3, No. 5.
- (3) Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes so that the Canada and regional city shelter indexes now contain the same elements. See also page 95.
- (4) Includes shelter and household operation. Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes, so that the Canada and regional city shelter indexes now contain the same elements. See also page 95.

- (1) Avant mai 1973, les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957 (pour Québec et Thunder Bay sur les dépenses de 1964); à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 94.
- (2) A partir de janvier 1975, les indices séparés des prix à la consommation pour Saskatoon, Regina, Edmonton et Calgary remplacent les séries combinées. Nous conseillons donc aux utilisateurs des séries combinées d'utiliser les séries des indices séparés qui sont disponibles depuis avril 1973. (Les données historiques pour les séries combinées sont publiées au tableau 11A). Si il y a des questions, communiquez avec la section des prix de détail ou consultez le Bulletin de service sur les prix de détail et les coûts de la vie, no 62-005 au catalogue, volume 3, no 5.
- (3) Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 95.
- (4) Comprend le logement et l'entretien du ménage. Jusqu'en avril 1963, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations urbaines; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 95.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR PRICE SERIES

Industrial Price Indexes

Industry Selling Price Indexes (1961 = 100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 5th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract calculations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68, Catalogue 62-528.

Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

"Iron & Steel Mills:" 12-2910

The principal change in the index is as follows: From January 1973 forward prices collected from the various companies are, for any given commodity, weighted together in a way that reflects the relative importance of each company's shipments of the commodity to the total shipments of that commodity by all companies in the year 1971. In addition prices for stainless products were deleted from the series bars hot rolled etc. (12-2910-082), in September 1972 and from the series sheets and strip cold rolled etc. (12-2910-084) in October 1972. Prices for stainless products, however, are included in the price index for the iron and steel industry.

The concept of price change measured is net return to

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES SÉRIES DE PRIX

Indices des prix industriels

Indices des prix de vente dans l'industrie (1961 = 100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices des prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", (n° 62-528 au catalogue).

Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

"Sidérurgie:" 12-2910

Le principal changement apporté à l'indice est le suivant: depuis janvier 1973, les prix recueillis auprès des différentes sociétés sont, pour tout produit, pondérés de manière à refléter l'importance relative des livraisons de chaque société par rapport aux livraisons totales de ce produit par toutes les sociétés en 1971. En outre, les prix des produits en acier inoxydable ont été enlevés de la série "barres, laminés à chaud, etc." (12-2910-082) en septembre 1972 et de la série "tôles et feuillards, laminés à froid etc." (12-2910-084) en octobre 1972. Ils sont toutefois compris dans l'indice des prix de l'industrie de la sidérurgie.

Le concept de la mesure de la variation des prix se fonde sur le revenu net à l'usine.

Purchase Price Indexes of Secondary Metals (1969=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1935-39=100)

Prices for Western grains used in the index are Canadian Wheat Board buying prices for grain in store at Vancouver or Thunder Bay.

Final payments for the crop year August 1973 - July 1974 were announced on December 24, 1974 and have been incorporated into the index. Estimates for the total 1974-75 payments are based on the initial payment plus half of the 1973-74 crop year final payment.

Indices du prix d'achat des métaux de deuxième fusion (1969=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice des prix des produits agricoles canadiens (1935-39=100)

Les prix des céréales de l'Ouest utilisés dans l'indice sont les prix d'achat de la Commission canadienne du blé pour les céréales entreposées à Vancouver ou à Thunder Bay.

Les paiements finals pour la campagne agricole août 1973 - juillet 1974 ont été annoncés le 24 décembre 1974 et ont été incorporés à l'indice. Les estimations des paiements totaux 1974-75 sont basées sur le paiement initial plus la moitié du paiement final de la campagne agricole 1973-74.

General Wholesale Index (1935-39 = 100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: *Wholesale Price Indexes 1913-50* (Reference Paper No. 24) *Prices and Price Indexes 1949-52* (Vol. 23) (Catalogue 62-501).

Thirty Industrial Materials, (1935-39 = 100)

The price index of thirty industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{\frac{P^1_{tN} \times P^2_{tN} \times P^3_{tN} \times \dots \times P^{30}_{tN}}{P^1_{t\ 35-39} \times P^2_{t\ 35-39} \times P^3_{t\ 35-39} \times \dots \times P^{30}_{t\ 35-39}}}$$

Indice général des prix de gros (1935-39 = 100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité, l'expression "de gros" fait penser plus au commerce de gros qu'au niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix des produits. En tant que chiffre représentatif classique, on a eu tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros, consulter *Wholesale Price Indexes 1913-50* (Reference Paper No. 24) et *Prices and Price Indexes 1949-52* (Vol. 23) (n° 62-501 au catalogue).

Indice des prix de trente matières industrielles (1935-39 = 100)

L'Indice des prix de trente matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

$$\sqrt[30]{\frac{P^1_{tN} \times P^2_{tN} \times P^3_{tN} \times \dots \times P^{30}_{tN}}{P^1_{t\ 35-39} \times P^2_{t\ 35-39} \times P^3_{t\ 35-39} \times \dots \times P^{30}_{t\ 35-39}}}$$

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering 5 and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyre's type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

The Consumer Price Index for Canada (1961=100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index may not represent closely the experience of any one specific family within the group, nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families — (a) living in cities with over 30,000 population, (b) ranging in size from two to six persons and (c) with annual incomes in 1967 ranging from \$4,000 to \$12,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In January 1969, the time base was updated to 1961=100 from 1949=100; details are contained in the January 1969 issue of the monthly publication *Prices and Price Indexes*, Catalogue 62-002.

From March 1961 to April 1973 inclusive, the weights or relative importance of the items in the Consumer Price Index were based on 1957 family expenditure patterns; details of these weights can be found in *The Consumer Price Index for Canada (1949=100) (Revision Based on 1957 Expenditures)*, Catalogue 62-518. A subsequent weight revision to reflect 1967 family expenditure patterns (and within the food component, 1969 detailed spending habits) was introduced in May 1973. Full details of the latest weighting pattern and other background information on the Consumer Price Index is available in the occasional paper *The Consumer Price Index for Canada (1961=100) (Revision based on 1967 Expenditures)*, Catalogue 62-539.

Le choix des matières servant au prélèvement des prix se rapportant à des groupes tels que prix "stables", (12 matières prix des aliments (5 matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérées comme intrants importants dans l'industrie.

L'indice des prix à la consommation pour le Canada (1961=100)

L'indice des prix à la consommation mesure le taux de variation dans le temps du coût à l'achat d'un "panier" constant de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" est constitué par des biens et des services en quantité de qualité constantes; il comprend uniquement les biens et services qui ont un prix et dont les prix peuvent être observés de façon continue.

L'indice se rapporte à un groupe vaste, mais délimité, de familles urbaines et rend compte des changements de prix auxquels ce "groupe cible" doit faire face. L'indice peut ne pas suivre de près les changements de prix touchant une famille en particulier de ce groupe, pas plus que les changements de prix touchant d'autres groupes de la population dont le revenu, la taille des familles ou les lieux de résidence diffèrent sensiblement. Le groupe cible auquel se rapporte l'indice actuel se compose de familles vivant dans des villes de plus de 30,000 habitants, b) dont la taille est comprise entre deux et six personnes, et c) dont les revenus annuels en 1967 étaient compris entre \$4,000 et \$12,000. Afin de mesurer les effets de changements de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation suit les mouvements de quelque 300 articles.

L'histoire des indices de prix à la consommation au Canada remonte au début des années 1900, et elle comprend des révisions périodiques des périodes de référence de base de l'indice ainsi que des schémas de pondération. En janvier 1969, on a aligné la base de temps de 1949=100 à 1961=100; d'autres renseignements figurent dans l'édition de janvier 1969 de la publication mensuelle *Prix et indices des prix* (n° 62-002 au catalogue).

De mars 1961 à avril 1973 inclusivement, les poids, ou l'importance relative des éléments de l'indice des prix à la consommation étaient basés sur les tendances de dépense des familles pour 1957; on peut trouver le détail de ces poids dans la publication *The Consumer Price Index for Canada (1949=100) (Revision based on 1957 Expenditure)*, (n° 62-518 au catalogue). En mai 1973, on a introduit une nouvelle révision des poids afin de prendre en compte les tendances de consommation des familles en 1967 (et, dans l'élément aliments, les habitudes détaillées de dépense en 1969). Le détail complet du dernier schéma de pondération et d'autres renseignements fondamentaux sur l'indice des prix à la consommation figurent dans la publication hors série *L'indice des prix à la consommation du Canada (1961=100) (Révision fondée sur les dépenses de 1967)*, (n° 62-539 au catalogue).

The Consumer Price Index for Canada Reclassified by Goods and Services

A revised supplementary classification system, entitled "The Consumer Price Index reclassified by Goods and Services", was introduced in May 1973 with the revision of the weighting pattern of the Consumer Price Index to reflect 1967 expenditures.

This supplementary classification introduces an improved framework for regrouping the items which comprise the Index. In it, all items in the C.P.I. have been reclassified to two major categories — goods and services — according to their most characteristic or dominant attribute. The goods component has been sub-divided into three categories: durable, semi-durable, and non-durable goods, according to expected average useful lifetime criteria. Services, on the other hand, have been sub-divided according to broad functional categories.

Historical series conforming to the revised classification system replace the previously published supplementary indexes and are available, with explanatory notes, for the period January 1961 to April 1973 inclusive, in *Retail Prices and Living Costs Service Bulletin*, Catalogue 62-005, Vol. 2 no. 7.

Consumer Price Indexes for Regional Cities (1961 = 100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). Except for their individual weighting systems, and the fact that they are based on fewer quotations, the regional city indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada.

Prior to May 1973, the city indexes may have underestimated the degree of price movements occurring because the shelter component of the city indexes moved on the basis of changes in rents only, whereas changes in both rents and homeownership costs were, and continue to be, included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and the items indexes for cities tended to underestimate somewhat the rates of price increase particularly over longer periods. From May 1973 forward, however, homeownership costs are included in the regional city consumer price indexes so that the Canada and the regional city indexes are consistent in terms of their content and treatment.

Each city index is designed to measure the influence of changes in retail prices taking place in the locality specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in the particular area specified.

In using the city indexes, it should be remembered that they do not in any way indicate whether price levels are higher or lower in one city than in another. Rather, they measure, within each city, the percentage change in consumer prices from the base period to subsequent time periods.

L'indice des prix à la consommation au Canada reclassé par biens et services

Un système révisé de classification supplémentaire, intitulé "L'indice des prix à la consommation au Canada reclassé par biens et services", a été introduit en mai 1973 en même temps que la révision des schémas de pondération de l'indice des prix à la consommation afin de rendre compte des dépenses de 1967.

Cette classification supplémentaire regroupe dans un cadre amélioré les éléments de l'indice. En effet, tous les éléments de l'I.P.C. ont été reclassés dans deux grandes catégories, soit la catégorie des biens et celle des services, suivant leur caractère le plus distinctif ou dominant. La catégorie des biens présente trois sous-catégories (biens durables, biens semi-durables, biens non durables) déterminées en fonction de la vie utile moyenne prévisible. D'autre part, on a réparti les services suivant quelques grandes catégories fonctionnelles.

Les séries historiques conformes au système révisé de classification remplacent les indices supplémentaires publiés auparavant, et on peut les trouver, avec des notes explicatives, pour la période janvier 1961 - avril 1973, dans la publication "Prix de détail et coût de la vie" - Bulletin de service, n° 62-005 au catalogue, vol. 2 n° 7.

Indices des prix de la consommation dans certaines agglomérations urbaines (1961 = 100)

Ces indices sont publiés tous les mois dans la présente publication (tableau 11). À l'exception de leurs systèmes de pondération particuliers, et de ce qu'ils font appel à moins de prix, ces indices sont en général semblables par leur concept et par les éléments qui les composent à l'indice des prix à la consommation au Canada.

Avant mai 1973, les indices des agglomérations ont pu sous-estimer le degré de changement des prix, parce que l'élément logement des indices des agglomérations ne variait qu'en fonction de l'évolution des loyers, tandis que l'indice pour le Canada ne comprenait et ne comprend toujours que les changements des loyers et les coûts de propriété. Comme les coûts de propriété ont augmenté plus vite que les loyers, les indices du logement et l'ensemble pour les villes tendent à sous-estimer quelque peu les taux de croissance des prix, principalement sur des périodes plus longues. À partir de mai 1973, cependant, les coûts de propriété sont inclus dans les indices de prix à la consommation des agglomérations urbaines, de sorte que les indices pour le Canada et les agglomérations urbaines sont homogènes à la fois pour ce qui est de leur contenu et de leur traitement.

Chaque indice de ville est conçu de manière à mesurer l'effet des changements des prix de détail dans la ville en question sur les prix d'un panier constant de biens et de services représentant le niveau de consommation d'un groupe représentatif de familles dans cette ville.

Le lecteur devra toujours garder en mémoire que ces indices n'indiquent en aucune façon si les prix sont plus élevés dans une ville que dans une autre. Ils mesurent plutôt dans chaque ville le taux de variation des prix à la consommation à partir de la période de base et des périodes subséquentes.

For comparisons of retail price differentials between cities, see Table 14 of this publication and the relevant explanatory notes.

Purchasing Power of the 1961 Consumer Dollar

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases, and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with its increasing purchasing power.

The purchasing power of the consumer dollar, in other words, bears an inverse relationship to the movement of the Consumer Price Index. For example, by January 1973, compared with their average level in 1961, consumer prices as measured by the C.P.I. were 44.5% higher, so that an equivalent basket of goods and services which could be purchased for \$100.00 in 1961 would cost the consumer \$144.50 in January 1973. Each consumer dollar in January 1973, therefore, buys less than in 1961, and the amount of its reduced value can be expressed in terms of the inverse consumer price movement. Thus, in January 1973 the purchasing power of the 1961 consumer dollar declined to approximately 69 cents ($\$1.00 \times 100.0/144.5 = \0.69).

Users of the tabulation which shows the purchasing power of the 1961 consumer dollar at different points in time (Table 12) should note that, as in the case of the Consumer Price Index from which it is derived, it may not represent closely the experience of any one specific family within the large group to which the C.P.I. relates; nor should it be expected to reflect the experience of other population groups whose income, family size and place of residence are characteristically different. It should also be noted that, like the C.P.I., it is not directly affected by changes in income tax, unemployment insurance premiums and certain other security payments.

Measuring the Purchasing Power of Wages

Changing consumer price levels affect the amounts of consumer goods and services which a dollar will buy, and average wages, insofar as they are spent on such items will, of course, be affected in the same way. A wage measurement which takes the change of consumer prices into account, can be calculated by reducing actual average wages by the percentage rise in consumer price levels, or increasing them by the amount price levels fall. Wages thus adjusted may be used to indicate the comparative purchasing power of average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. On the

Pour étudier les différences de prix de détail entre les villes, il faut consulter le tableau 14 de la présente publication et les notes explicatives qui l'accompagnent.

Pouvoir d'achat du dollar de consommation 1961

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente, et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie, et la baisse des prix est liée à la hausse du pouvoir d'achat.

Le pouvoir d'achat du dollar de consommation, en d'autres termes, évolue en raison inverse du mouvement de l'indice des prix à la consommation. Ainsi, en janvier 1973, par rapport au niveau de 1961, les prix à la consommation mesurés par l'I.P.C. avaient progressé de 44.5%, de sorte qu'un panier équivalent de biens et de services qui coûtait \$100 à l'achat en 1961 aurait coûté \$144.50 en janvier 1973 au consommateur. Par conséquent, chaque dollar de consommation en janvier 1973 achète moins qu'en 1961, et l'on peut exprimer le montant de sa valeur réduite en fonction de l'inverse du mouvement des prix à la consommation. Ainsi, en janvier 1973, le pouvoir d'achat du dollar de consommation 1961 était tombé approximativement à 69 cent ($\$1.00 \times 100.0/144.5 = \0.69).

Les utilisateurs du tableau qui indique le pouvoir d'achat du dollar de consommation de 1961 à différentes périodes (Tableau 12) doivent noter que, comme dans le cas de l'indice des prix à la consommation dont il a été tiré, il peut ne pas suivre de près le cas d'une famille en particulier faisant partie du grand groupe auquel se rapporte l'I.P.C., pas plus qu'il ne rend nécessairement compte des dépenses d'autres groupes de la population dont les revenus, la taille des familles et les lieux de résidence diffèrent sensiblement. Il faut également noter que, tout comme l'I.P.C., il n'est pas touché directement par les changements de l'impôt sur le revenu, les primes d'assurance-chômage et certains autres paiements d'assistance.

Mesure du pouvoir d'achat des salaires

Les changements du niveau des prix à la consommation affectent les quantités de biens et de services de consommation qu'un dollar peut acheter, et les salaires moyens, dans la mesure où ils sont consacrés à de tels articles, seront naturellement touchés de la même façon. Une mesure des salaires qui prendrait compte les changements de prix à la consommation peut calculer en réduisant les salaires moyens réels du taux d'accroissement des prix à la consommation, ou en les augmentant dans une proportion égale à la baisse des prix. Les salaires ainsi ajustés peuvent servir à indiquer le pouvoir d'achat comparatif des gains moyens si les prix à la consommation et les tendances de consommation étaient restés constants. L'exemple suivant montre comment on peut procéder à un ajustement de cette nature.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B, et qu'au cours de la même période un indice des prix à la consommation passe de 100 à 110. Par suite de la hausse de 10% des prix à la consommation, \$1 n'achètera pas autant au cours

her hand, the 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$100.00 by the amount of the consumer price index increase. The adjusted average is \$90.91 $((100.0/110.0) \times \$100)$, which may be referred to as the average weekly wage for week B expressed in the dollars of period A; or it may be said to indicate the level of real weekly wages relative to week A.

The foregoing calculation can be carried a step further to express, in index number form, the relationship between the week A average of \$80.00 and the week B adjusted figure of \$90.91. Assuming the week A average of \$80.00 as an index equal to 100, the week B index becomes 113.6 $((90.91/80.00) \times 100)$. Such an index may be called an index of average weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than they did in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the 25% rise in money wages $((\$100.00 - \$80.00 / \$80.00) \times 100)$.

In Table 13, the index numbers of average weekly wages in manufacturing in current dollar terms (1961 = 100) are calculated by dividing the weekly wages in current dollars by the 1961 average weekly wage in current dollars and multiplying the result by one hundred. For example, the weekly wage index for September 1972 in current dollars (1961 = 100) is 196.4 $((146.23/74.45) \times 100)$. The weekly wages in 1961 dollar terms are determined by dividing the weekly wage in current dollars by the consumer price index for Canada for the month following the month to which the wages relate and multiplying the result by one hundred. Thus, the September 1972 weekly wage in 1961 dollars is \$102.98 $((146.23/142.0) \times 100)$. (The wage and the price index both refer to generally similar time periods: current wages for a particular month relate to the last pay periods in that month, while most prices for the consumer price index of the following month are collected in the first week of that month.)

The index numbers of weekly wages in 1961 dollar terms (1961 = 100) are determined by dividing the weekly wages in 1961 dollars by the base (1961) average weekly wage and multiplying the result by one hundred. For example, the September 1972 weekly wage index in 1961 dollar terms (1961 = 100) is 138.3 $((102.98/74.45) \times 100)$.

It should be noted that while the estimates of average wages may reflect the experiences of broad groups of workers in manufacturing fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings refers only to the average consumption pattern of a particular population group. Group spending patterns change over periods of time. To the extent that this occurs, wage data adjusted by the consumer price index (which assumes a "fixed" consumption pattern), will gradually be ren-

la semaine B qu'au cours de la semaine A. Par contre, la hausse de 25% (de \$80 à \$100) va surévaluer la hausse qui s'est produite dans le pouvoir d'achat des salaires hebdomadaires moyens. Cette surévaluation peut être réduite en réduisant le chiffre de \$100 du montant de l'accroissement de l'indice des prix à la consommation. La moyenne ajustée sera \$90.91 $((100.0/110.0) \times 100)$, et que l'on peut désigner comme étant la moyenne du salaire hebdomadaire pour la semaine B exprimée en dollars de la période A; on peut aussi dire qu'elle indique le niveau réel des salaires par rapport à la semaine A.

On peut pousser ce calcul plus loin, en exprimant à l'aide d'un indice, la relation entre le salaire moyen de \$80 de la semaine A, et le salaire révisé de \$90.91 de la semaine B. En supposant que la moyenne de la semaine A soit un indice égal à 100, l'indice de la semaine B devient 113.6 $((90.91/80.00) \times 100)$. On pourrait appeler un tel indice l'indice de la rémunération hebdomadaire effective. Il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6% de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10% des prix à la consommation. Cette augmentation effective de 13.6% se compare à l'augmentation de 25% des salaires $((\$100.00 - \$80.00 / \$80.00) \times 100)$.

Au Tableau 13, les nombres indices des salaires hebdomadaires moyens dans les industries manufacturières en dollars courants (1961 = 100) s'obtiennent en divisant les salaires hebdomadaires en dollars courants par le salaire hebdomadaire moyen de 1961 en dollars courants et en multipliant le résultat par cent. Ainsi, l'indice des salaires hebdomadaires pour septembre 1972 exprimés en dollars courants (1961 = 100) est 196.4 $((146.23/74.45) \times 100)$. Les salaires hebdomadaires en dollars de 1961 s'obtiennent en divisant les salaires hebdomadaires en dollars courants par l'indice des prix à la consommation pour le Canada pour le mois qui suit celui auquel se rapportent les salaires, et en multipliant le quotient par cent. Ainsi, le salaire hebdomadaire de septembre 1972 exprimé en dollars de 1961 est \$102.98 $((146.23/142.0) \times 100)$. (Les données sur les salaires et les prix portent en général sur des périodes semblables: les salaires courants d'un mois donné sont généralement ceux des dernières périodes de paie du mois, alors que la plupart des prix pour l'indice des prix à la consommation du mois suivant sont recueillis au cours de la première semaine de ce mois.)

Les nombres indices des salaires hebdomadaires en dollars de 1961 (1961 = 100) s'obtiennent en divisant les salaires hebdomadaires en dollars de 1961 par les salaires hebdomadaires moyens de l'année de base (1961) et en multipliant le quotient par cent. Ainsi, l'indice des salaires hebdomadaires pour septembre 1972, exprimés en dollars de 1961 (1961 = 100), sera 138.3 $((102.98/74.45) \times 100)$.

Il convient de souligner que, même si les estimations des salaires réels moyens résument assez bien la situation d'un large éventail de travailleurs dans les industries manufacturières, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur les gains porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur les gains rajustées par l'indice des prix à la consommation (les habitudes de consom-

dered less valid; the consumer price index weighting pattern was last revised in May 1973, and prior to that, in 1961. Furthermore, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual (current dollar) and real (constant dollar) wages uses 1961 as a reference year. However, any reference period may be chosen as a base since percentage changes between any two periods will be the same regardless of the reference period selected.

Further information regarding Table 13 can be obtained from: Labour Division, Statistics Canada.

Inter-City Retail Price Comparisons

Measurements of retail price differentials prevailing between a number of Canadian urban centres previously published to reflect inter-city comparisons as of May 1965, May 1968, May 1969 and May 1971 have been revised to February 1975.

In this new series of updatings inter-city price comparisons will be drawn for goods and services comprising most of the budget on which the Consumer Price Index for Canada is currently based.

Table 14 presents the first five components of goods and services to be updated in this series. Price indexes for additional budget elements will be published on a component-by-component basis as each stage of these results becomes available. The data base for this study was the wide range of retail price quotations collected in the course of production of the national Consumer Price Index in addition to supplementary information gathered in a special program of pricing undertaken for publication of City Average Retail Prices(1).

(1) Retail Prices and Livings Costs Service Bulletin, Vol. 4, No. 2, February, 1975.

mation étant supposées "fixes") perdront graduellement de leur valeur; le schéma de pondération de l'indice des prix à la consommation a été révisé pour la dernière fois en mai 1973, et avant cela, en 1961. De plus, il ne faut pas oublier qu'une partie du revenu peut être épargnée et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations des gains effectifs calculées à partir de moyennes effectives peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés ou de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente les salaires tant réels (en dollars courants) qu'effectifs (en dollars constants) prend pour base l'année 1961. En fait, on peut choisir n'importe quelle période de référence comme base, puisque les taux de variation entre deux périodes seront les mêmes quelle que soit la période de référence choisie.

On peut obtenir plus de renseignements sur le tableau en s'adressant à la Division du travail, Statistique Canada.

Comparaisons entre les prix de détail d'une ville à l'autre

Les mesures de la disparité des prix de détail qu'on observe dans un certain nombre de centres urbains du Canada déjà publiées afin de donner les comparaisons entre les villes au mois de mai 1965, mai 1968, mai 1969 et mai 1971 ont été révisées en février 1975.

Les nouvelles séries de mises à jour seront faites pour la plupart des biens et services servant actuellement à établir l'indice des prix à la consommation du Canada.

On trouvera au tableau 14, les résultats de la mise à jour des cinq premières composantes. Pour ce qui est des autres éléments du budget à la consommation, on publiera des indices de prix différentiels, composante par composante, au fur et à mesure que les résultats d'enquête seront disponibles. Les données de base pour cette étude ont été constituées par l'importante collecte recueillie pour la production de l'indice national des prix à la consommation en plus de l'information supplémentaire obtenue dans le cadre d'un programme spécial de relevé des prix, dont les résultats permettent de publier les prix de détail moyens par ville(1).

(1) Bulletin de Service; Prix de détail et Coût de la Vie, Vol. 4, No. 2, février 1975.

As previously, to facilitate price comparability between locations, differential price measurements are derived between separate pairs of cities in geographic proximity of each other. Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names wherever possible, and also having regard for comparability of retail outlets and merchandising practises. By means of a linking procedure, paired city indexes are initially related to a common base city and subsequently compared with a weighted average of the combined 11 cities equalling 100. This is a departure from previous such studies which were based on Winnipeg price levels equalling 100. Item price relationships are aggregated by application of the 1967 combined cities weighting diagram updated for price change to February 1975.

Further information regarding Table 14 can be obtained from: Comparative Living Costs Section, Prices Division, Statistics Canada.

Farm Input Price Indexes (1961 = 100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961 = 100 time base.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services used by Farmers, 1935-39 = 100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replace the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-534, and is reproduced in the September 1971 issue of *Prices and Price Indexes*, Catalogue 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-004, and in the monthly publication, *Prices and Price Indexes*, Catalogue 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterpart, and publication has been suspended.

Comme par le passé, afin de faciliter la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont été calculées séparément pour des paires de villes géographiquement proches. A l'intérieur de chaque paire de villes, les prix ont été assortis au niveau de l'article, c'est-à-dire en s'assurant que les spécifications étaient semblables, y compris la marque lorsque cela était possible, et aussi en tenant compte de la similitude des points de vente au détail et des méthodes de vente. En utilisant la méthode de couplage, les indices couplés des villes ont d'abord été reliés à une ville de base commune, puis comparés à une moyenne pondérée (la combinaison de 11 villes étant égale à 100). Ceci constitue une différence entre cette étude et les études précédentes qui posaient le niveau des prix de Winnipeg comme étant égal à 100. Les relations de prix des articles ont été regroupées en appliquant le schéma de la pondération de 1967 des villes combinées mis à jour en fonction des variations de prix observées en février 1975.

De plus amples renseignements concernant le tableau 14 peuvent être obtenus de: la Section des coûts comparatifs de la vie, Division des Prix, Statistique Canada.

Indices de prix des entrées dans l'agriculture (1961 = 100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui y sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961 = 100.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39 = 100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série *Farm Input Price Indexes, 1961 = 100* (n° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reprise dans *Prices and Price Indexes* de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel *Farm Input Price Indexes, 1961 = 100* (n° 62-004 au catalogue) et dans le bulletin annuel *Prices and Price Indexes* (n° 62-002 au catalogue).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de la publier.

Security Price Indexes

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held by a hypothetical investor (as opposed to the more speculative trader). The portfolio represents stocks of Canadian companies listed on Toronto and Montreal stock exchanges.

The number of shares held for each issue is in proportion to the total number of shares outstanding. Prices in the investor's mining and supplementary stock indexes are Thursday's closing quotations from the exchange (Montreal, Toronto, Vancouver or Calgary) with the highest volume for a particular stock, as reported in the Daily Canadian Data Bank of the Financial Post Computer Services Department. For preferred stocks, prices are monthly weighted averages of the daily closing price in which weights are daily total volume. The price reference base for the indexes is the year 1956, and the indexes express prices as a percentage of price in 1956, arithmetically converted to the 1961 = 100 base.

Revised indexes on the base 1956 = 100 were first presented in the June 1962 issue of this publication. The most important change in the revision of the indexes, apart from the shift in the price reference base, was the classification of stocks according to the Standard Industrial Classification. In the continuing major group Industrials, 4 sub-groups (Milling and Grains, Food and Allied Products, Machinery and Equipment, and Building Materials) were replaced by 8 new sub-groups (Foods, Printing and Publishing, Primary Metals, Metal Fabricating, Non-metallic Minerals, Chemicals, Construction and Retail Trade). The remaining 5 sub-groups of the former index, viz., Industrial Mines, Beverages, Textile and Clothing, Pulp and Paper, and Oils (renamed Petroleum) were continued. The major group utilities was continued but the Pipelines index was added as a sub-group and the previous Power and Traction sub-group was replaced by two new sub-groups, viz., Electric Power and Gas Distribution. A major group Finance was composed of the former major group Banks and the former supplementary index Investment and Loan. Constant weights which were previously limited to major groups, were extended to sub-groups. Weights in the index continue to be based on shares outstanding.

A revision of the Security Price Indexes to the 1971 = 100 base is under development.

For the list of stocks currently included in the Investors Index and Preferred Index, see *Prices and Price Indexes* for March 1974.

Price Indexes of Machinery and Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

Indices des cours des valeurs mobilières

Les indices des cours des valeurs mobilières mesurent dans le temps l'incidence du mouvement des prix sur la valeur d'un portefeuille de titres achetés et détenus par un actionnaire hypothétique (par opposition au spéculateur). Le portefeuille comprend des actions de sociétés canadiennes cotées à la Bourse de Toronto et de Montréal.

Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation. Les indices des prix des titres miniers et les indices supplémentaires sont le cours de fermeture de jeudi (Montréal, Toronto, Vancouver ou Calgary) affichant le volume le plus élevé pour une valeur en particulier, d'après la Banque des données canadiennes quotidiennes du Service de l'informatique du *Financial Post*. Pour les actions privilégiées, les prix sont les moyennes pondérées mensuelles des cours de clôture de chaque jour et les poids, le volume quotidien total. La période de référence pour les indices est l'année 1956 et les indices représentent les prix exprimés en pourcentage des prix de 1956 recalculé sur la base 1961 = 100.

Les indices révisés sur la base 1956 = 100 ont été publiés pour la première fois dans la livraison de juin 1962 de cette publication. La modification la plus importante à la révision de l'indice, à part le changement de la période de référence, a été le classement des actions d'après la Classification des activités économiques. Dans le cas du grand groupe des valeurs industrielles, 4 sous-groupes (minoterie et céréales, aliments et produits connexes, machines et matériel et matériaux de construction) ont été remplacés par 8 nouveaux sous-groupes (aliments, imprimerie et édition, métaux primaires, produits métalliques, minéraux non métalliques, produits chimiques, construction et commerce de détail). On a conservé les 5 autres sous-groupes de l'ancien indice : mines industrielles, boissons, textiles et habillement, pâte à papier, et huiles (sous la désignation de pétrole). Le grand groupe de services d'utilité publique a été conservé mais l'indice des pipelines a été ajouté comme sous-groupe et l'ancien sous-groupe d'énergie et traction a été remplacé par deux nouveaux sous-groupes : l'énergie électrique et la distribution du gaz. Le nouveau grand groupe "Finances" est composé de l'ancien grand groupe banques et de l'ancien indice supplémentaire investissements prêts. Les facteurs constants de pondération qui étaient autrefois limités aux grands groupes s'appliquent maintenant aux sous-groupes. Les facteurs de pondération de l'indice continuent à être basés sur les actions en circulation.

On prépare actuellement une révision des Indices des cours des valeurs mobilières sur la base 1971 = 100.

La liste des titres repris actuellement dans les indices des valeurs de placements et dans les indices des valeurs privilégiées se trouve dans *Prix et indices des prix* de mars 1974.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel et fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968=100 and most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in such indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices were then corrected as relevant for duty, exchange and federal sales tax.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968=100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des question d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du *U.S. Bureau of Labour Statistics* ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre, à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.

NOTES ON PRICES AND PRICE INDEX NUMBERS

Industry Selling Price Index: Manufacturing (1961 = 100)

The industry selling price index (Total Manufacturing) rose 0.8% in May 1975 to 190.6 from the revised April 1975 index of 189.1. It was 13.1% higher than the May 1974 index of 168.5.

In terms of the relative contribution to the overall change in the total manufacturing index, the more notable changes were increases recorded in the food and beverages group (1.0%) with advances in slaughtering and meat packing industry (10.7%). Upward movement in the sawmills and planing mills industry (5.9%), moved the wood products group higher (4.0%). Notable increases to a lesser degree were registered in paper and allied products (1.3%).

Decreases for the period were relatively insignificant.

NOTES SUR LES PRIX ET LES NOMBRES INDICES DES PRIX

Indice des prix de vente dans l'industrie: industries manufacturières (1961 = 100)

L'indice des prix de vente dans l'industrie (pour toutes les industries manufacturières) a augmenté de 0.8% pour passer de 189.1 en avril 1975 (indice rectifié) à 190.6 en mai. L'indice était de 13.1% supérieur à celui de mai 1974 (168.5).

Pour ce qui est de la contribution relative à la hausse générale de l'indice de toutes les industries manufacturières, c'est dans le groupe des industries des aliments et des boissons que l'on a enregistré les changements les plus appréciables (progression de 1.0%), en raison des augmentations notées dans le cas de l'abattage et du conditionnement de la viande (10.7%). On a enregistré une augmentation de 5.9% dans le secteur des scieries ce qui a fait progresser le groupe des produits du bois de 4.0%. Des augmentations appréciables, mais dans une moindre mesure, ont été enregistrées dans le cas du groupe de l'industrie du papier et activités annexes (1.3%).

Les baisses enregistrées ce mois-ci ont été relativement peu importantes.

General Wholesale Price Index (1935-39=100)

The general wholesale index rose 0.4% to 484.8 in May 1975 from the revised April index of 482.9. It was 6.7% higher than a year earlier. Five of the eight major groups increased while three decreased.

The animal products group index jumped 7.0% in May to 534.5 from the revised April index of 499.4 due mainly to higher prices recorded for livestock 19.8%, fresh meats 16.8%, eggs 7.2%, dressed fowl 4.8% and cured meats 2.7%. The wood products group index increased 3.4% to 657.5 from the revised April index of 636.0, with increases in spruce 8.6%, fir 7.8%, cedar 7.7%, hemlock 5.8% and newsprint and wrapping paper 2.0%. The non-ferrous metals group index increased 0.9% due to a 8.9% increase in silver and a 1.2% increase in nickel. The textile products showed an increase of 0.8% due to a rise in the price of raw wool (imported) 9.3%, raw wool (domestic) 5.2% and raw cotton 3.3%. The non-metallic minerals group index rose 0.5%.

The vegetable products group showed a decline of 6.9% in May to 439.9 from the revised April index of 472.5, due to lower prices recorded for sugar and its products 24.6%, grains 10.8% and fresh fruits 10.1%. The iron products group index decreased 0.4%.

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros a augmenté de 0.4%, passant de 482.9 en avril (indice rectifié) à 484.8 en mai. Il a augmenté de 6.7% en un an. Cinq des huit principaux groupes ont progressé, les trois autres ont baissé.

L'indice des produits d'origine animale a augmenté de 7.0%, passant de 499.4 en avril (indice rectifié) à 534.5 en mai. Cette augmentation est attribuable en grande partie à la hausse du prix du bétail (19.8%), des viandes fraîches (16.8%), des oeufs (7.2%), de la volaille habillée (4.8%) et des viandes traitées (2.7%). L'indice du groupe des produits du bois est passé de 636.0 en avril (indice rectifié) à 657.5 en mai, ce qui représente une augmentation de 3.4%. Cette augmentation est attribuable à la hausse du prix de l'épinette (8.6%), du sapin (7.8%), du cèdre (7.7%), de la pruche (5.8%), du papier journal et du papier d'emballage (2.0%). L'indice du groupe des métaux non ferreux a augmenté de 0.9% en raison d'une hausse de 8.9% du prix de l'argent et de 1.2% du prix du nickel. En ce qui concerne le groupe des textiles, la progression a été de 0.8% en raison d'une hausse du prix de la laine brute (importée) (9.3%), de la laine brute (domestique) (5.2%) et du coton brut (3.3%). L'indice du groupe des métaux non métalliques a augmenté de 0.5%.

L'indice du groupe des produits d'origine végétale a diminué de 6.9%, passant de 472.5 en avril (indice rectifié) à 439.9 en mai. Cette diminution est attribuable à la baisse du prix du sucre et de ses dérivés (24.6%), des céréales (10.8%) et des fruits frais (10.1%). L'indice des produits du fer a diminué de 0.4%.

* These indexes are preliminary. Ces indices sont provisoires.

Security Price Indexes (1971=100)(1)

The investors index of common stocks rose 2.2% to 105.6 in May from 103.3 in April. Among the three major groups, industrials and finances registered gains of 3.5% to 108.9 and 1.4% to 120.0 respectively while utilities fell 2.1% to 85.0. The increase in industrials reflected substantial rises in petroleum, chemicals, industrial mines and printing and publishing. The six sub-groups within utilities all reported slight declines. A gain of 2.2% to 125.3 in banks accounted for the increase in the finance group.

During May the index of mining stocks remained practically unchanged, gaining only 0.1% to 118.7. Golds declined 0.5% to 220.4 while base metals gained 0.9% to 100.0.

The two supplementary indexes showed increases. Uranium rose 6.5% to 165.6 and primary oil and gas gained 16.1% to 82.0.

The preferred stock index fell 1.3% from 86.0 in April to 84.9 in May.

Canadian Farm Products Price Index (1935-39=100)

The price index of Canadian farm products at terminal markets advanced 7.2% to 495.4 in May from 462.1 in April. The animal products index moved up 12.2% to 602.1 from 536.4 on price increases for lambs, steers, hogs and raw wool on both Eastern and Western markets, for eggs, cheese and fluid milk in the East, and for butterfat in the West. Lower prices were shown for calves in the West.

An increase of 0.2% to 388.6 from 387.8 in the field crops index, reflected higher prices for barley and wheat in the East, and for potatoes and hay in the West. Lower prices were shown for rye on both markets, for corn, oats and flax in the East, and for flax in the West.

Thirty Industrial Materials Price Index (1935-39=100)

The price index of thirty industrial materials, calculated as an unweighted geometric average, eased down 0.2% to 483.7 in May from the revised April index of 484.8. Prices were lower for nine commodities, higher for nine and unchanged for twelve. Principal changes included decreases for sugar, domestic wheat, steel scrap, beef hides, cottonseed oil, oats, domestic lead, tin and linseed oil while increases were recorded for hogs, steers, raw cotton, raw wool, spruce lumber, iron ore, raw rubber, bleached sulphite pulp and crude oil.

Revised indexes on the base 1971=100. See special supplement for details.

Indices des cours des valeurs mobilières (1971=100)(1)

L'indice des cours des actions ordinaires a augmenté de 2.2%, passant de 103.3 en avril à 105.6 en mai. Parmi les trois grands groupes, les valeurs industrielles et les finances ont augmenté respectivement de 3.5% (à 108.9) et 1.4% (à 120.0). Cependant, les services publics ont diminué de 2.1% pour s'établir à 85.0. La hausse des valeurs industrielles est en grande partie attribuable aux augmentations enregistrées dans le pétrole, les produits chimiques, les mines industrielles et l'impression et l'édition. Les six sous-groupes des services publics ont enregistré de légères diminutions. L'augmentation du groupe des finances est imputable à l'augmentation de 2.2% des banques (125.3).

En mai, l'indice des prix des titres miniers est demeuré presque inchangé, enregistrant une augmentation de 0.1% pour se fixer à 118.7. Les aurifères ont diminué de 0.5% pour s'établir à 220.4 tandis que les métaux primaires ont augmenté de 0.9% pour atteindre 100.0.

En ce qui concerne les deux indices de prix supplémentaires, on a observé une augmentation de 6.5% de l'uranium (à 165.6) et de 16.1% du pétrole et du gaz (à 82.0).

L'indice des actions privilégiées a diminué de 1.3%, passant de 86.0 en avril à 84.9 en mai.

Indice des prix des produits agricoles canadiens (1935-39=100)

L'indice des prix des produits agricoles canadiens sur les marchés terminaux a augmenté de 14.5%, passant de 573.5 en avril à 656.7 en mai. L'indice des produits d'origine animale a augmenté de 12.2% pour passer de 536.4 à 602.1 en raison de l'augmentation du prix des agneaux, des bouvillons, des porcs et de la laine brute sur les marchés de l'Est et de l'Ouest, des oeufs, du lait à fromage et du lait naturel dans l'Est, et du gras du beurre dans l'Ouest. On a enregistré une diminution du prix des veaux dans l'Ouest.

L'indice des produits de grande culture a augmenté de 0.2%, passant de 387.8 à 388.6 par suite de l'augmentation du prix de l'orge et du blé dans l'Est, des pommes de terre et du foin dans l'Ouest. On a enregistré des diminutions de prix pour le seigle sur les deux marchés, pour le maïs, l'avoine et le foin dans l'Est, et le lin dans l'Ouest.

Indice des trente matières industrielles (1935-39=100)

L'indice des prix des trente matières industrielles, calculé comme moyenne géométrique non pondérée, a diminué de 0.2% pour passer de 484.8 en avril (indice rectifié) à 483.7 en mai. On a enregistré des baisses de prix pour neuf marchandises, des augmentations pour neuf, tandis que les prix de douze autres n'ont pas changé. Les principales variations ont été les baisses observées pour le sucre brut, le blé canadien, les déchets d'acier, les peaux de boeuf, l'huile de coton, l'avoine, le plomb canadien, l'étain, et l'huile de lin, ainsi que les hausses de prix des porcs, des bouvillons, de la laine et du coton bruts, des sciages d'épinette, du minerai de fer, du caoutchouc brut, de la pâte de bois blanchie au sulphite et du pétrole brut.

(1) Indices révisés sur la base 1971=100. Voir le supplément spécial pour plus de renseignements.

Consumer Price Index

The Consumer Price Index for Canada (1961=100) advanced 0.8% to 181.3 in May from 179.8 in April. The latest rise, though somewhat greater than the increase in the preceding month, was less than half that registered between April and May in 1974. Nearly two-fifths of the monthly overall advance was attributable to higher food prices which rose by 1.1%; Housing accounted for another one-quarter. The index for All-Items excluding Food moved up by 0.8%, which is about the same rate of change experienced over the five months since the beginning of the year. Between May 1974 and May 1975, the total CPI advanced 10.1%.

Although the 1.1% rise in the Food index between April and May was the largest monthly increase since the beginning of the year, it was well below the 3.0% increase reported in the corresponding period in 1974. Seasonally higher prices for fresh produce, along with generally increased quotations for meat, provided the main impetus behind the latest monthly rise in the general food price level. Fresh fruits and fresh vegetables moved up in price by 7.5% and 5.7%, respectively. Beef prices, which had steadily decreased a total of 17.6% in the previous four months, advanced 1.4% in early May. Pork and poultry also retailed higher, moving up by 2.0% and 1.2%, respectively. In contrast, eggs declined in price by 4.6% and margarine retailed lower for the third consecutive month.

The advance of 0.8% in the index for All-Items other than Food was mainly due to increased shelter costs for both owned and rented accommodation, to price rises for cigarettes and other tobacco products, and to higher quotations for recreational equipment as well as widespread advances in movie admissions.

Viewed in terms of relative price change between goods and services, from April to May goods increased by 0.9% while services moved up 0.6%. Over the latest twelve-month period, both goods and services registered identical price rises of 10.1%.

On a seasonally adjusted basis, the April to May rise in the All-Items Consumer Price Index was 0.7%, comprising a 1.1% increase for Food and a 0.6% advance in the index for All-Items excluding Food. In May, the *current* annual rate of change in the CPI, based on the seasonally adjusted movement since three months earlier, was 7.1%, consistently remaining at about the same level since March.

L'indice des prix à la consommation

L'indice des prix à la consommation pour le Canada (1961=100) a enregistré une augmentation de 0.8%, pour passer de 179.8 en avril à 181.3 en mai. Cette augmentation, quoiqu sensiblement supérieure à celle du mois précédent, représentait moins de la moitié de celle enregistrée entre avril et mai 1974. Près des deux-cinquièmes de l'augmentation globale au cours de ce mois proviennent de la hausse du prix des aliments (1.1%). Le logement, pour sa part, en a représenté un quart. L'indice d'ensemble, sans les aliments, a augmenté de 0.8%, soit à peu près le même taux de variation que celui observé au cours des cinq premiers mois de l'année. Entre mai 1974 et mai 1975, l'indice d'ensemble des prix à la consommation a augmenté de 10.1%.

Même si l'augmentation de 1.1% enregistrée par l'indice des aliments entre avril et mai est la plus importante augmentation mensuelle depuis le début de l'année, elle se situe bien en deçà de l'augmentation de 3.0% survenue pendant la période correspondante en 1974. Une hausse saisonnière du prix des produits frais, ainsi qu'une augmentation générale du prix de la viande sont à la base de cette dernière augmentation mensuelle au niveau du prix global des aliments. Les prix des fruits et des légumes frais ont monté de 7.5% et de 5.7% respectivement. Le prix du boeuf, qui avait baissé régulièrement au cours des quatre mois précédents (baisse totale atteignant 17.6%), a monté de 1.4% au début de mai. Les prix de détail du porc et de la volaille ont aussi monté, soit de 2.0% et de 1.2% respectivement. Par contre, le prix des oeufs a baissé de 4.6% et celui de la margarine avait baissé au détail, pour le troisième mois consécutif.

L'augmentation de 0.8% de l'indice d'ensemble, sans les aliments, est attribuable surtout aux coûts accrus du logement aussi bien en ce qui concerne les frais de propriété que les loyers, à la hausse du prix des cigarettes et autres produits du tabac, ainsi qu'à celle du prix de l'équipement de sport et à l'augmentation générale des prix d'entrée dans les cinémas.

En ce qui concerne la variation relative des prix des biens par rapport aux services, entre avril et mai, les biens ont augmenté de 0.9% alors que les services ont enregistré une hausse de 0.6%. Au cours des douze derniers mois, les biens et les services ont enregistré une hausse de prix identique, soit de 10.1%.

Après désaisonnalisation, l'indice d'ensemble des prix à la consommation a augmenté de 0.7% entre avril et mai, suite à une hausse de 1.1% pour les aliments et de 0.6% pour l'indice d'ensemble sans les aliments. En mai, le taux annuel *courant* de variation de l'I.P.C., basé sur le mouvement désaisonnalisé des trois derniers mois, était de 7.1%, soit sensiblement au même niveau qu'en mars.

Industry selling price index: manufacturing - 1961=100(1) - Indices des prix de vente dans l'industrie: industries manufacturières	190.6	189.1	168.5	165.7	0.8	1.7	13.1
General wholesale index - (1935-39=100)(2) - L'indice général de gros	484.8	482.9r	454.4r	454.0	0.4	0.1	6.7
Vegetable products - Substances végétales	439.9	472.5r	465.6r	468.8	- 6.9	- 0.7	- 5.5
Animal products - Produits animaux	534.5	499.4r	474.9r	479.0	7.0	- 0.9	12.6
Textile products - Produits textiles	400.7	397.6	426.0	429.4	0.8	- 0.8	- 5.9
Wood products - Produits du bois	657.5	636.0r	563.5r	571.7	3.4	- 1.4	16.7
Iron products - Produits du fer	509.8	511.9r	445.9r	435.3	- 0.4	2.4	14.3
Non-ferrous metals - Métaux non ferreux	416.8	413.0r	432.8	422.9	0.9	2.3	- 3.7
Non-metallic minerals - Minéraux non métallique	387.2	385.4r	327.2r	316.3	0.5	3.4	18.3
Chemical products - Produits chimiques	383.3	383.6r	308.7r	308.1	- 0.1	0.2	24.2
Selected Price Indicators - Certains indices des prix:							
Canadian farm products - (1935-39=100)(3) - Produits agricoles canadiens	495.4	462.1	502.6	503.1	7.2	- 0.1	(3)
Eastern - Total - De l'est	485.2	446.2	485.2r	487.1	8.7	- 0.4	-
Western - Total - De l'ouest	505.6	478.1	520.1	519.3	5.8	0.2	(3)
Field - Cultures	388.6	387.8	467.5	464.2	0.2	0.7	(3)
Animal - Animaux	602.1	536.4	537.6	542.1	12.2	- 0.8	12.0
Thirty industrial materials - (1935-39=100)(2) - Trente matériaux industriels	483.7	484.8r	490.6	491.6	- 0.2	- 0.2	- 1.4
Consumer price indexes - Canada (1961=100) - Indices des prix à la consommation:							
All-items - Indice d'ensemble	181.3	179.8	164.6	161.9	0.8	1.7	10.1
Food - Aliments	206.5	204.3	186.1	180.8	1.1	3.0	11.0
Housing - Habitation	178.8	177.8	163.4	161.4	0.6	1.2	9.4
Clothing - Habillement	159.6	159.6	150.5	149.5	-	0.7	6.0
Transportation - Transports	164.2	163.7	148.4	145.9	0.3	1.7	10.6
Health and personal care - Soins personnels et hygiène	188.3	185.7	168.3	166.8	1.4	0.9	11.9
Recreation, education and reading - Loisirs, formation et lecture	172.9	170.4	154.6	152.9	1.5	1.1	11.8
Tobacco and alcohol - Tabacs et alcools	161.7	158.1	142.8	141.5	2.3	0.9	13.2
Security price indexes - (1971=100) - Indices des cours de valeurs mobilières:							
Investors index - Indice des placements	105.6	103.3	108.6	119.0	2.2	- 8.7	- 2.8
Industrials - Industrielles	108.9	105.2	114.4	126.6	3.5	- 9.6	- 4.8
Food - Aliments	96.0	96.1	98.9	108.5	- 0.1	- 8.8	- 2.9
Alcoholic beverages - Boissons alcooliques	91.9	95.5	120.8	126.0	- 3.8	- 4.1	- 23.9
Textiles and clothing - Textiles et vêtements	121.6	121.5	159.5	169.0	0.1	- 5.6	- 23.8
Pulp and paper - Pâtes et papiers	134.8	132.4	149.1	157.3	1.8	- 5.2	- 9.6
Printing and publishing - Impression et édition	141.4	134.7	139.9	137.4	5.0	1.8	1.1
Primary metals - Métaux primaires	122.0	122.8	128.0	130.6	- 0.7	- 2.0	- 4.7
Industrial mines - Mines industrielles	86.5	82.3	93.6	105.7	5.1	- 11.4	- 7.6
Metal fabricating - Fabrication des métaux	155.6	149.4	151.5	162.1	4.1	- 6.5	- 2.7
Non-metallic minerals - Minéraux non métalliques	104.2	106.7	117.0	125.6	- 2.3	- 6.8	- 10.9
Petroleum - Pétrole	113.9	105.2	113.8	142.0	8.3	- 19.9	0.1
Chemicals - Produits chimiques	136.4	128.3	140.6	136.6	6.3	- 2.9	- 3.0
Construction	167.9	160.5	170.0	175.0	4.6	- 2.9	- 1.2
Trade - Commerce	107.9	108.4	99.0	105.8	- 0.5	- 6.4	9.0
Utilities and services - Services publics	85.0	86.8	84.6	89.9	- 2.1	- 5.9	0.5
Transportation - Transport	114.1	117.0	105.5	114.5	- 2.5	- 7.9	8.2
Pipelines - Pipe-line	71.3	72.2	73.9	80.2	- 1.2	- 7.9	- 3.5
Radio and TV broadcasting - Radiodiffusion et télé-diffusion	104.2	105.8	101.6	105.6	- 1.5	- 3.8	2.6
Telephone - Téléphone	88.8	91.5	87.4	90.9	- 3.0	- 3.9	1.6
Electric power - Énergie électrique	90.9	93.2	94.1	96.2	- 2.5	- 2.2	- 3.4
Gas distribution - Distribution de gaz	67.5	68.2	71.0	74.6	- 1.0	- 4.8	- 4.9
Finances	120.0	118.4	116.0	124.9	1.4	- 7.1	3.4
Banks - Banques	125.3	122.6	122.7	132.1	2.2	- 7.1	2.1
Investment and loan - Placements et prêts	108.3	109.8	100.0	107.8	- 0.9	- 7.2	8.3
Insurance - Assurances	103.1	103.2	99.9	107.6	- 0.1	- 7.2	3.2
Mining - Indices des titres miniers							
Gold - Or	118.7	118.6	133.1	150.6	0.1	- 11.6	- 10.8
Base metals - Métaux communs	220.4	221.4	246.3	282.1	- 0.5	- 12.7	- 10.5
Uranium - Uranium	70.0	69.4	78.8	87.5	0.9	- 9.9	- 11.2
Primary oils and gas - Pétrole et gaz primaires	165.6	155.5	160.4	180.4	6.5	- 11.1	3.2
	82.0	70.6	82.6	98.5	16.1	- 16.1	- 0.7

- (1) Gross weighted, including inter-industry shipments. For explanation see page 92. - Indice pondéré brut comprenant les livraisons inter-industrielles. Pour toute explication, voir page 92.
- (2) Indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont sujets à révision.
- (3) Year to year percentage change not shown since these indexes are not comparable. Indexes subsequent to July 1974 are subject to revision. See notes page 93 for details of Western grain prices. - La variation proportionnelle d'une année à l'autre n'est pas indiquée étant donné que ces indices ne sont pas comparables. Les indices postérieurs à juillet 1974 sont sujets à révision. Voir les renvois de la page 93 pour les prix détaillés des grains de l'Ouest.

TABLE 2. Industry Selling Price Indexes by Industry and Selected Commodities
TABLEAU 2. Indice des prix de vente dans l'industrie par industrie et par certains produits

		1961 = 100														
Industries and selected commodities(1)		Month - Mois														Annual
Industrie et certains produits(1)		J	F	M	A	M	J	J	A	S	O	N	D	Annuel		
FOODS AND BEVERAGES INDUSTRIES - INDUSTRIES DES ALIMENTS ET BOISSONS.		1971	124.2	125.6	125.9	125.8	125.6	126.5	127.0	127.6	128.3	129.0	129.3	130.3	127.1

TABLE 2. Industry Selling Price Indexes by Industry and Selected Commodities
TABLEAU 2. Indice des prix de vente dans l'industrie par industrie et par certains produits

		1961 = 100												
Industries and selected commodities(1)		Month - Mois												Annual
Industrie et certains produits(1)		J	F	M	A	M	J	J	A	S	O	N	D	Annuel
		1971												
		1972												
		1973												
		1974												
		1975												
Industry selling price index: manufacturing(7) - Indice de prix de vente dans l'industrie: industries manufactu- rières(7).	1971	119.4	119.8	120.3	121.2	121.2	121.7	122.3	122.4	122.5	122.6	122.7	123.2	121.6
	1972	124.5	125.3	125.9	126.5	126.7	126.9	127.4	127.8	128.5	129.0	129.7	130.9	127.4
	1973	133.1	134.6	136.6	138.2	139.5	141.0	143.0	147.9	147.7	149.0	150.4	152.9	142.7
	1974	157.4	160.1	162.7	165.7	168.5	169.9	173.1	175.9	178.0	179.7	182.6	182.7	
	1975	185.6	187.0	187.1	188.9	190.7								

(1) Indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974 et 1975 sont
sujets à révision.

(2) This industry was changed in commodity content, price sample and weights in accordance with
significant changes within the industry. Figures are revised from January 1971 to date. - La composition
en marchandises, les échantillons de prix et les mesures de poids ont changé dans cette industrie
conformément à des changements importants survenus dans l'industrie même. Les chiffres sont révisés
de janvier 1971 à aujourd'hui.

(3) Effective January 1973 changes have been made in the calculation of this index. For details see page 92. - A
compter de janvier 1973, on a modifié le calcul de cet indice. Pour plus de détails, voir la page 92. - A

(4) An extensive revision of the weight and price sample (including the incorporation of goods purchased and resold in
same condition as purchased) necessitated by developments in the industry's production pattern since 1961 have
resulted in the introduction of new price indexes and a discontinuity in the industry price index. - Une révision
approfondie de l'échantillon des pondérations et des prix (y compris l'intégration des biens achetés et revendus
sans aucune modification), nécessitée par l'évolution du régime de production de l'industrie depuis 1961, a
amené l'adoption de nouveaux indices des prix ainsi qu'une solution de continuité dans l'indice des prix
industriels:

	Old series - Ancienne série	New series - Nouvelle série
December - 1970 - Décembre	95.1	92.3
January - 1971 - Janvier	95.1	92.1
Average - 1971 - Moyenne	95.2	91.8

(5) This series has been revised from January 1969 forward. An expanded list of establishments and commodities has been
selected and prices for these have been aggregated to a total industry index using 1971 shipments data. The price
quotations are, in general, of an improved quality. Selected commodity data on a 1971 time and weight base, are
available on request. - Les chiffres de cette série ont été révisés à partir de janvier 1969. Une liste
augmentée des établissements et des produits a été établie, et les prix de ces produits ont été agrégés pour
former un indice total de l'activité économique à partir des données sur les livraisons de 1971. De manière
générale, le calcul des prix est plus fiable. Les utilisateurs peuvent obtenir sur demande des données sur
certain produits utilisant les facteurs de pondération de 1971 et dont la période de référence est 1971.

(6) Motor gasoline prices are 'list' and may not be a reflection of actual transaction prices. - Les prix
de l'essence sont des prix de détail suggérés et peuvent ne pas traduire les prix réels à la transaction.

(7) Gross weighted, including inter-industry shipments. For explanation see page 91. - Indice pondéré brut
comprenant les livraisons inter-industrielles. Pour toute explication voir page 91.

(1) All indexes for 1974 and 1975 are subject to revision. - Les indices pour 1974

et 1975 sont sujets à révision.

(2) Includes gold. - Y compris l'or.

(3) Consists of iron products and non-ferrous metals groups above but excluding gold. - Se compose des groupes élémentaires des produits du fer et des produits des métaux non ferreux moins l'or.

(4) These two series comprise the General Wholesale Index. - Ces deux séries comprennent l'indice général de gros.

(5) Excludes gold. - Sauf l'or.

(6) See page 94 for additional information. - Pour des informations additionnelles voir page 94.

(7) Final to July 1974. See page 93 for details on Western grain prices and specific publications wherein final indexes or earlier years may be found. - Indices définitifs jusqu'en juillet 1974. Pour des données détaillées sur le prix des céréales de l'Ouest, voir page 93 ainsi que les publications spéciales qui contiennent les derniers indices ou ceux des années précédentes.

TABLE 6. Wholesale Price Indexes of Selected Primary Commodities(1)

TABLEAU 6. Indices des prix de gros de certains produits bruts(1)

1935-39=100

Primary commodities Produits bruts	Months - Mois				Annual averages Moyenne annuelle		
	May 1975 Mai	Apr. 1975 Avr.	May 1974 Mai	Apr. 1974 Avr.	1974	1973	1972
Coffee, green - Café vert	466.5	463.6	513.6	511.7	492.6	468.0	358.1
Copper, electrolytic - Cuivre électrolytique ...	590.9	590.9	722.5	722.5	730.3	594.4	474.3
Cotton, raw - Coton brut	412.9	399.9	524.6	565.0	526.8	389.7	330.0
Eggs - Oeufs	200.7	187.2	214.1	225.4	217.7	196.1	136.2
Fruits, fresh - Fruits frais	281.5	313.1	310.5	291.0	284.3	263.9	223.5
Grains - Céréales	463.8	520.0	540.2	575.1	562.9	406.1	205.7
Hides and skins - Cuirs et peaux vertes	178.9	192.2	233.6	262.3	220.2	323.9	294.1
Lead, electrolytic - Plomb électrolytique	469.5	471.6	527.2	512.6	500.2	367.0	323.2
Livestock - Bétail	644.1	537.8	567.2	565.4	611.1	606.7	458.7
Onions - Oignons	586.0	433.4	291.2	312.2	328.7	476.7	259.8
Potatoes - Pommes de terre	246.9	222.8	843.4	807.3	626.7	485.9	219.1
Rubber, raw - Caoutchouc brut	187.0	185.1	268.0	269.2	246.8	222.7	114.0
Scrap iron and steel - Déchets de fer et d'acier	545.8	578.7	805.8	817.4	740.6	388.8	268.1
Silver - Argent	1159.9	1065.4	1426.3	1131.2	1180.8	663.3	430.6
Steers - Bouvillons	780.5	635.1	757.3	742.4	803.9	645.3	597.6
Sugar, raw - Sucre brut	601.9	843.0	790.6	731.3	943.5	321.0	253.9
Tin - Etain	697.7	707.5	882.5	843.1	764.4	435.6	338.8
Wool, raw domestic - Laine brute indigène	251.5	239.0	333.8	375.4	334.3	492.5	201.7
Wool, raw, imported - Laine brute importée	259.0	237.0	301.1	318.7	284.4	379.6	196.8
Zinc, prime, western - Zinc de première qualité, de l'Ouest	822.8	822.8	756.1	756.1	767.2	522.6	411.6

(1) All indexes for 1973, 1974 and 1975 are subject to revision. - Les indices pour 1973, 1974 et 1975 sont sujets à révision.

valeurs mobilières pour 1971,
1972, 1973, 1974 et 1975

E. Indices hebdomadaires des cours
des valeurs mobilières pour
1975

F. Graphiques

INTRODUCTION

A revision of the Security Price Indexes on the base of 1971 = 100 has been made. It involves changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Definition and Selection Criteria

Security Price Indexes measure through time the effect of price change on the value of a portfolio of Canadian stocks bought and held for investment purposes. The system of Security Price Indexes comprises the Investors Index, the Mining Index, two supplementary indexes (Primary Oil and Gas, and Uraniums) and the Preferred Stock Index. These indexes consist of stocks which fulfill the following criteria:

1. They must be Canadian stocks traded on at least one Canadian exchange.
2. Selected securities must bear an annual dividend.
3. The volume of annual transactions must represent at least 10% of issued stocks listed at the beginning of each calendar year; theoretically, transactions should be distributed evenly throughout the year under examination.
4. The quotations of each security must exceed \$1.00.
5. Eligible issues for the Mining Index and the two supplementary indexes, Primary Oil and Gas, and Uranium, must be of companies owning producing mines and wells.

Accordingly, some stocks previously listed have been deleted, others added. The four common stock indexes now include 158 stocks and the preferred stock index consists of 29 stocks. Although the above criteria are strictly applied in most cases, discretion is sometimes exercised in order to ensure the continuity of the series. For a complete list of the stocks included in the indexes see Appendix C.

The stocks listed in the revised indexes are classified according to the Standard Industrial Classification (Revised 1970). The use of this grouping is based on the assumption that stocks in the same industrial classification are homogeneous in their price movements.

Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. Also the order of the sub-groups has been rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

Index Formula, Prices, and Weights

As was previously the case, the indexes are calculated using the Laspeyres index formula:

$$I_t = \frac{\sum_{i=1}^n \left(\frac{P_{ti}}{P_{oi}} \right) Q_{oi}}{\sum_{i=1}^n Q_{oi}} \times 100$$

where I_t = price index in time t for a sub-group

P_{ti} = price in time t for the i^{th} stock

P_{oi} = average price in base year (1971) for the i^{th} stock

Q_{oi} = number of shares outstanding in base year (1971) for the i^{th} stock

n = number of stocks included in sub-group.

Une révision de l'indice des cours des valeurs mobilières sur la base 1971 = 100 a été faite. Des changements ont été ainsi apportés à la composition et à la méthode du calcul des indices et la base de référence des prix 1961 a été changée en celle de 1971.

Définition et critères de sélection

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placements. Le système des indices des cours des valeurs mobilières comprend l'indice des cours des actions ordinaires, l'indice des prix des titres miniers, deux indices supplémentaires (pétrole et gaz, uranium) et l'indice des actions privilégiées. Ces indices comprennent des actions qui doivent répondre aux critères suivants.

1. Il doit s'agir d'actions canadiennes cotées à au moins une bourse du Canada.
2. Les valeurs mobilières choisies doivent rapporter des dividendes annuels.
3. Le nombre des transactions annuelles doit représenter au moins 10 % des actions émises et cotées au début de chaque année civile; en théorie, les transactions devraient être réparties également sur toute l'année de l'enquête.
4. La cote de toute valeur mobilière doit être supérieure à un dollar.
5. Les actions de l'indice des prix des titres miniers et des deux indices supplémentaires (pétrole et gaz, uranium) doivent provenir de sociétés à qui appartiennent des mines et des puits producteurs.

C'est ainsi que certaines actions qui faisaient partie de l'indice ont été retirées et que d'autres ont été ajoutées. Les quatre indices des actions ordinaires comprennent maintenant 158 actions et l'indice des actions privilégiées est formé de 29 actions. Même si ces critères de sélection sont appliqués strictement dans la plupart des cas, il est possible que parfois ils ne soient pas respectés de façon à assurer la continuité des séries. La liste complète des actions faisant partie des indices figure à l'annexe C.

Les actions faisant partie des indices révisés sont classées selon la classification des activités économiques de 1970. L'utilisation de ce regroupement est basée sur l'hypothèse selon laquelle les actions d'une même classification économique sont homogènes lorsque leurs prix varient.

Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radio-diffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Formule des indices, prix et pondération

Comme avant, les indices sont calculés d'après la formule de Laspeyres:

où I_t = indice de prix à l'époque t pour le sous-groupe considéré

P_{ti} = prix à l'époque t de la $i^{\text{ème}}$ action

P_{oi} = prix moyen pour l'année de base (1971) de la $i^{\text{ème}}$ action

Q_{oi} = nombre d'actions en circulation pour l'année de base (1971) de la $i^{\text{ème}}$ action

n = nombre d'actions d'un sous-groupe particulier.

The major departures from the methodology of the previous indexes are as follows:

1. The prices used in the calculation of the weekly common stock indexes are no longer Thursday's closing quotations. They are now the daily closing quotations from the exchange with the highest volume of shares traded for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales.
2. Weighting at the finest level of detail (the individual securities) remains proportional to the number of shares outstanding as of January 1 of each year. The weights of major groups and sub-groups, however, have been calculated in the 1971 = 100 series according to a formula which modifies the value of the shares outstanding in 1971 by the trading experience in the period 1971 to 1974. This reduces the importance given to stocks held by parent or investment companies for control purposes and which therefore are not available for trading. The weights used are thus proportional to the number of shares actually traded on the market over a period of four years. (See Appendix A.)

Weight of a sub-group

$$= \sum_{i=1}^n \left(\bar{P}_{o_i} \times Q_{o_i} \times \frac{\bar{V}_i}{Q_{o_i}} \right)$$

where \bar{P}_{o_i} = average price of the i^{th} stock in base year.
 Q_{o_i} = number of shares outstanding of i^{th} stock in base year.
 \bar{V}_i = average yearly volume of shares traded of i^{th} stock for the period 1971-1974
 n = number of stocks in a particular sub-group.

In the case of the annual revision, a change in portfolio composition, or a stock split, the adjustments are made in such a way that the index level remains unaffected by the change.

Continuity between 1971 and 1961 Series

Correction factors allowing for conversion of 1961 = 100 based indexes to 1971 = 100 based indexes have been calculated for every major group and sub-group in the common and preferred stock indexes (see Appendix B). Adjustment of the security price series can be made for any data based on 1961 = 100 up to December 1970 inclusively. The procedure merely requires the multiplication of a given index on the base 1961 = 100 by its appropriate correction factor to relate the index to that based on 1971 = 100. From January 1971 on the data has been revised. See Appendix D for monthly indexes from January 1971 to May 1975 and Appendix E for weekly indexes from January 1975 to present. The charts in Appendix F illustrate the movement of the four common stock indexes for January 1971 to May 1975.

Since both Radio and Television Broadcasting and Insurance sub-groups have been introduced at the time of the 1971 revision no data are available prior to January 1971.

The weekly indexes will continue to appear in the Statistics Canada Daily bulletin. The monthly indexes, an arithmetic average of the weekly indexes, will be published in Prices and Price Indexes, Catalogue 62-002.

Les principales dérogations à la méthodologie des indicateurs sont les suivantes:

1. Les prix servant au calcul des indices hebdomadaires ne sont plus les cours de clôture du jeudi, mais les cours quotidiens de clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables de la semaine en question. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes.
2. La pondération au niveau de détail le plus fin (les titres proprement dits) est proportionnelle au nombre d'actions en circulation au premier janvier de chaque année. Les pondérations des groupes principaux et des sous-groupes, cependant, ont été calculées, pour ce qui est des séries 1971 = 100, selon une formule qui modifie la valeur des titres en cours en 1971 en fonction de l'évolution des marchés pendant la période 1971-1974. Ceci réduit l'importance accordée aux actions détenues par des sociétés mères ou de sociétés de placements dans le but de s'assurer le contrôle. Ces actions, par conséquent, ne sont plus disponibles sur le marché. Les pondérations utilisées sont ainsi proportionnelles au nombre d'actions vendues sur les bourses au cours d'une période de quatre années. (Voir annexe A.)

Pondération d'un sous-groupe.

$$= \sum_{i=1}^n \left(\bar{P}_{o_i} \times \bar{V}_i \right)$$

où \bar{P}_{o_i} = cours moyen de la $i^{\text{ième}}$ action en l'année de base
 Q_{o_i} = nombre d'actions en cours de la $i^{\text{ième}}$ action en l'année de base.
 \bar{V}_i = volume annuel moyen des transactions de la $i^{\text{ième}}$ action pour la période 1971-1974
 n = nombre d'actions d'un sous-groupe particulier.

Dans le cas de la révision annuelle, d'un changement de la composition du portefeuille ou d'un fractionnement des actions, les ajustements sont effectués de telle façon que le niveau de l'indice ne change pas.

Continuité entre les séries de 1961 et de 1971

Les facteurs de conversion des indices base 1961 = 100 indices base 1971 = 100 ont été calculés pour chaque groupe principal et sous-groupe tant pour les actions ordinaires que pour les actions privilégiées (voir annexe B). L'ajustement des séries sur les cours des valeurs mobilières peut être effectué pour toute donnée exprimée sur la base 1961 = 100 jusqu'en décembre 1970 inclusivement. Pour effectuer cette conversion, il suffit de multiplier un indice donné sur la base 1961 = 100 par le facteur de correction approprié pour relier l'indice à celui sur la base 1971 = 100. À partir de janvier 1971, les données ont été révisées. Le lecteur peut se reporter à l'annexe D pour les indices mensuels de la période janvier 1971-mai 1975 et l'annexe E pour les indices hebdomadaires de la période commençant en janvier 1975. Les graphiques de l'annexe F indiquent les mouvements des indices des quatre indices des actions ordinaires pour la période janvier 1971-mai 1975.

Comme les sous-groupes de la radiodiffusion et télédiffusion et des assurances ont été introduits lors de la révision de 1971, aucune donnée n'existe pour la période précédant janvier 1971.

Les indices hebdomadaires continueront à paraître dans Quotidien de Statistique Canada, tandis que les indices mensuels, moyenne arithmétique des indices hebdomadaires, seront présentés dans la publication Prix et indices des prix (n° 62-002 au catalogue).

All-items Consumer Price Index converted to 1949=100, May 1975 - L'indice des prix à la consommation de tous les éléments converti à 1949=100, mai 1975 234.2

(1) Indexes prior to May 1973 incorporate 1957 expenditure weights, those for May 1973 forward are based on 1967 expenditures. The revised series is linked to its predecessor at April 1973. For further explanation, see page 95. - Avant mai 1973 les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957; à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 95.

36	May - Mai	188.4	162.1	157.4	129.4	164.1
37	June - Juin					

- (1) Indexes prior to May 1973 incorporate 1957 expenditure weights (1964 expenditure weights for Québec and Thunder Bay); those for May 1973 forward are based on 1967 expenditures. The revised series are linked to their predecessors at April 1973. For further explanation see page 95.
- (2) As of January 1975, the separate consumer price indexes for Saskatoon, Regina, Edmonton and Calgary supersede the combined-cities series. Users of the combined series are therefore advised to switch to the separate city indexes which are available only from April 1973. (The historical data for the combined-cities series are presented in Table 11A). Should users have any questions, contact the Retail Prices Section or consult the Retail Prices and Living Costs Service Bulletin, Catalogue 62-005, Volume 3, No. 5.
- (3) Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes so that the Canada and regional city shelter indexes now contain the same elements. See also page 96.
- (4) Includes shelter and household operation. Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on, homeownership has been included in the shelter element of regional cities' housing indexes, so that the Canada and regional city shelter indexes now contain the same elements. See also page 96.

- (1) Avant mai 1973, les indices étaient calculés à l'aide des pondérations fondées sur les dépenses de 1957 (pour Québec et Thunder Bay sur les dépenses de 1964); à partir de mai 1973 ils sont calculés à l'aide des pondérations fondées sur les dépenses de 1967. Les séries révisées sont raccordées aux précédentes en avril 1973. Pour plus de renseignements, voir page 95.
- (2) A partir de janvier 1975, les indices séparés des prix à la consommation pour Saskatoon, Regina, Edmonton et Calgary remplacent les séries combinées. Nous conseillons donc aux utilisateurs des séries combinées d'utiliser les séries des indices séparés qui sont disponibles depuis avril 1973. (Les données historiques pour les séries combinées sont publiées au tableau 11A). Si il y a des questions, communiquez avec la section des prix de détail ou consultez le Bulletin de service sur les prix de détail et les coûts de la vie, no 62-005 au catalogue, volume 3, no 5.
- (3) Jusqu'en avril 1973, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 96.
- (4) Comprend le logement et l'entretien du ménage. Jusqu'en avril 1963, l'élément logement des indices de l'habitation des agglomérations urbaines était basé uniquement sur les variations des loyers. Toutefois, depuis mai 1973, les frais de possession d'une maison ont été incorporés à l'élément logement des indices de l'habitation des agglomérations urbaines; il en résulte que les indices du logement pour le Canada et pour les agglomérations urbaines comportent maintenant les mêmes éléments. Voir aussi la page 96.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR PRICE SERIES

Industrial Price Indexes

Industry Selling Price Indexes (1961 = 100)

Industry selling price indexes are published for approximately 100 industries within manufacturing. Also published are approximately 425 commodity price indexes for the products of these industries. The Classification system is that of the 1960 standard industrial classification, thus permitting the joint use of price statistics with other data such as production and employment similarly classified.

The data upon which both the initial selection of commodities to be priced and responding firms are made are contained in the Census of Manufacturers, a series of annual surveys collecting statistics on shipments of commodities, employment and materials used. Prices are collected on the 15th of each month or the nearest transaction date for the commodity being priced; sales and excise taxes are excluded.

The industry classified price indexes are useful for analysis of price movements, for estimation of the constant dollar value of shipments, and for purposes of contract escalations.

A complete description of these indexes is contained in: Industry Selling Price Indexes 1956-68. Catalogue 62-528.

Industry Selling Price Index: Manufacturing

The index is gross weighted. It measures the movements of prices of gross shipments of manufacturing industries, including inter-industry shipments between individual industries within manufacturing. Therefore, it duplicates the movements of some prices in the sense that, for example, flour prices are given full weight as part of the shipments of the Flour Mills Industry and then are implicitly counted again through full weighting of the shipment prices of those manufacturing industries which use flour as an ingredient in their outputs, e.g., bread, biscuits, cakes, etc.

"Iron & Steel Mills:" 12-2910

The principal change in the index is as follows: From January 1973 forward prices collected from the various companies are, for any given commodity, weighted together in a way that reflects the relative importance of each company's shipments of the commodity to the total shipments of that commodity by all companies in the year 1971. In addition prices for stainless products were deleted from the series bars hot rolled etc. (12-2910-082), in September 1972 and from the series sheets and strip cold rolled etc. (12-2910-084) in October 1972. Prices for stainless products, however, are included in the price index for the iron and steel mills industry.

The concept of price change measured is net return to mill.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES SÉRIES DE PRIX

Indices des prix industriels

Indices des prix de vente dans l'industrie (1961 = 100)

Les indices des prix de vente dans l'industrie sont publiés pour environ 100 industries manufacturières. Près de 425 indices de prix des produits de ces industries sont également publiés. Les produits sont classés d'après la Classification type des industries de 1960, ce qui permet d'utiliser la statistique des prix avec d'autres données telles que la production et l'emploi classées de la même manière.

Les données sur lesquelles se fonde le choix initial des produits dont il faut déterminer le prix et des établissements enquêtés figurent dans le "recensement des manufactures", série de bulletins sur les enquêtes annuelles au cours desquelles on recueille des statistiques sur les expéditions de produits, sur l'emploi et sur les matières utilisées. La collecte des prix a lieu le 15 de chaque mois ou à la date de transaction la plus rapprochée pour le produit en question; les taxes de vente et droits d'accise ne sont pas pris en compte.

Les indices des prix classés par industrie servent à analyser les mouvements de prix, à estimer la valeur des expéditions en dollars constants et à indexer les contrats.

La description complète de ces indices est donnée dans "Indices des prix de vente dans l'industrie, 1956-68", (n° 62-528 au catalogue).

Indices des prix de vente dans l'industrie: Industries manufacturières

Il s'agit d'un indice pondéré brut. Il mesure les mouvements du prix des livraisons brutes des industries manufacturières, y compris les livraisons inter-industrielles des industries manufacturières. Il prend donc deux fois en compte les mouvements de certains prix: les prix de la farine, par exemple, font l'objet d'une pondération complète comme ayant trait aux livraisons des meuneries et ils sont comptés à nouveau implicitement du fait de la pondération complète des prix de livraisons des industries manufacturières qui utilisent de la farine comme ingrédient de leurs produits, tels que le pain, les biscuits ou les gâteaux.

"Sidérurgie:" 12-2910

Le principal changement apporté à l'indice est le suivant: depuis janvier 1973, les prix recueillis auprès des différentes sociétés sont, pour tout produit, pondérés de manière à refléter l'importance relative des livraisons de chaque société par rapport aux livraisons totales de ce produit par toutes les sociétés en 1971. En outre, les prix des produits en acier inoxydable ont été enlevés de la série "barres, laminés à chaud, etc." (12-2910-082) en septembre 1972 et de la série "tôles et feuillards, laminés à froid etc." (12-2910-084) en octobre 1972. Ils sont toutefois compris dans l'indice des prix de l'industrie de la sidérurgie.

Le concept de la mesure de la variation des prix se fonde sur le revenu net à l'usine.

Purchase Price Indexes of Secondary Metals (1969=100)

Ferrous and non-ferrous indexes are compiled from a series of input prices, inclusive of transportation and brokerage fees, submitted by a wide variety of purchasers from selected industries. Indexes for certain categories of metals cannot be published because of the confidentiality of the data under the Statistics Act.

Canadian Farm Products Price Index (1935-39=100)

Prices for Western grains used in the index are Canadian Wheat Board buying prices for grain in store at Vancouver or Thunder Bay.

Final payments for the crop year August 1973 - July 1974 were announced on December 24, 1974 and have been incorporated into the index. Estimates for the total 1974-75 payments are based on the initial payment plus half of the 1973-74 crop year final payment.

Indices du prix d'achat des métaux de deuxième fusion (1969=100)

L'indice des métaux ferreux et non ferreux est établi à partir d'une série de prix comprenant les frais de transport et de dédouanement; ces données sont fournies par un large éventail de clients de certaines industries. Confidentiels en vertu de la Loi sur la statistique, les indices de certaines catégories de métaux ne peuvent être publiés.

Indice des prix des produits agricoles canadiens (1935-39=100)

Les prix des céréales de l'Ouest utilisés dans l'indice sont les prix d'achat de la Commission canadienne du blé pour les céréales entreposées à Vancouver ou à Thunder Bay.

Les paiements finals pour la campagne agricole août 1973 - juillet 1974 ont été annoncés le 24 décembre 1974 et ont été incorporés à l'indice. Les estimations des paiements totaux de 1974-75 sont basées sur le paiement initial plus la moitié du paiement final de la campagne agricole 1973-74.

General Wholesale Index (1935-39=100)

The General Wholesale Index is a commodity classified index of prices. The index is "general" inasmuch as it incorporates a diverse selection of both primary and processed commodities. It is called "wholesale" because its ingredient prices relate to that broad and heterogeneous area of commodity distribution which excludes only retail trade. In fact, the term "wholesale" has more of a connotation of bulk trading than of any homogeneous level of distribution. Thus, though the index mainly includes prices of producers, it also covers transactions of "middle men" who trade in commodities of a type or in quantities characteristic of primary marketing functions.

Though general wholesale price indexes have been calculated by many countries for years there is no precise answer to the question of what such an index measures. This is so because the index cannot be associated with any adequately definable value aggregate. Unlike a consumer price index which can be identified with expenditures of household consumers, a general wholesale index covers a host of overlapping transactions sometimes involving the same ingredient in as many as three different stages of processing. Yet, conceptually, it is not a measure of the purchasing power of money because it omits significant areas of monetary transactions such as prices of land, labour, securities and services, except in so far as prices of these things are implicit in commodity prices. As a conventional summary figure, its use has tended towards a reference level against which to observe the behaviour of particular price groups such as farm products, industrial materials, building materials and the various other groupings for which indexes are published. And as an indicator of general business conditions it is usually included in the group which is regarded as approximately coincident with the business cycle. However, its main attribute now lies in its long historical continuity.

For further details about the General Wholesale Index please consult: Wholesale Price Indexes 1913-50 (Reference Paper No. 24) Prices and Price Indexes 1949-52 (Vol. 23) (Catalogue 62-501).

Thirty Industrial Materials, (1935-39=100)

The price index of thirty industrial materials is calculated as an unweighted geometric average of prices of the selected commodities. The formula is as follows:

$$\sqrt[30]{\frac{P^1_{tN} \times P^2_{tN} \times P^3_{tN} \times \dots \times P^{30}_{tN}}{P^1_{t\ 35-39} \times P^2_{t\ 35-39} \times P^3_{t\ 35-39} \times \dots \times P^{30}_{t\ 35-39}}}$$

Indice général des prix de gros (1935-39=100)

L'indice général des prix de gros est un indice des prix classés par produit. Cet indice est "général" du fait qu'il comprend une variété de produits primaires et de produits transformés. Il est appelé "de gros" parce que les prix qui le composent se rapportent au domaine vaste et hétérogène de la distribution des produits dont seul le commerce de détail est exclu. En réalité l'expression "de gros" fait penser plus au commerce de gros qu'à un niveau homogène de distribution. Bien que l'indice comprenne surtout les prix établis par les producteurs, il englobe également les transactions des "intermédiaires" qui vendent des produits dont le genre et la qualité sont particuliers aux fonctions premières de la commercialisation.

De nombreux pays calculent l'indice général des prix de gros depuis des années; il n'en reste pas moins impossible de dire exactement ce que cet indice mesure, car on ne peut l'associer à une valeur globale que l'on puisse définir exactement. Contrairement à l'indice des prix à la consommation que l'on peut identifier grâce aux dépenses des ménages, l'indice général des prix de gros couvre une foule de transactions à double emploi impliquant parfois le même élément considéré jusqu'à trois étapes différentes de la transformation. Cependant, du point de vue conceptuel, cet indice ne constitue pas une mesure du pouvoir d'achat du dollar parce qu'il ne tient pas compte de transactions monétaires aussi importantes que le prix du terrain, du travail, des valeurs mobilières et des services, sauf si elles sont comprises dans le prix de produits. En tant que chiffre représentatif classique, on a une tendance à s'en servir pour comparer le comportement de certains groupes de prix, par exemple, celui des produits agricoles, des matières industrielles, des matériaux de construction et de divers autres groupes pour lesquels on publie des indices. Comme indicateur de la situation générale du commerce, l'indice est habituellement intégré au groupe dont on considère qu'il correspond le plus exactement au cycle commercial. Sa qualité principale réside cependant dans sa longue continuité chronologique.

Pour plus de détails sur l'indice général des prix de gros consulter *Wholesale Price Indexes 1913-50 (Reference Paper No. 24)* et *Prices and Price Indexes 1949-52 (Vol. 23)* (n° 62-501 au catalogue).

Indice des prix de trente matières industrielles (1935-39=100)

L'Indice des prix de trente matières industrielles est calculé comme moyenne géométrique non pondérée des prix de certaines marchandises. La formule est la suivante:

$$\sqrt[30]{\frac{P^1_{tN} \times P^2_{tN} \times P^3_{tN} \times \dots \times P^{30}_{tN}}{P^1_{t\ 35-39} \times P^2_{t\ 35-39} \times P^3_{t\ 35-39} \times \dots \times P^{30}_{t\ 35-39}}}$$

The selection of materials for pricing relates to groups such as "stable" prices, numbering 12, food prices, numbering 5 and "sensitive" prices, numbering 13. We plan to construct an index of industrial prices that will relate to current usage of materials and that will be of the more traditional Laspeyre's type in its construction. The presently published index contains prices for some materials that no longer constitute important industrial inputs.

The Consumer Price Index for Canada (1961 = 100)

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The "basket" is an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time.

The index relates to a broad but specific group of urban families and reflects the price changes experienced by that "target group". The index may not represent closely the experience of any one specific family within the group, nor should it be expected to reflect price change for other population groups for which income, family size and place of residence are characteristically different. The target group to which the current index relates is composed of families - (a) living in cities with over 30,000 population, (b) ranging in size from two to six persons and (c) with annual incomes in 1967 ranging from \$4,000 to \$12,000. To measure the influences of price change on the cost of goods and services purchased by such families, the Consumer Price Index reflects movements of some 300 items.

The history of consumer price indexes in Canada extends back to the early 1900's and encompasses periodic revisions of index base reference periods and weighting patterns. In January 1969, the time base was updated to 1961=100 from 1949=100; details are contained in the January 1969 issue of the monthly publication *Prices and Price Indexes*, Catalogue 62-002.

From March 1961 to April 1973 inclusive, the weights or relative importance of the items in the Consumer Price Index were based on 1957 family expenditure patterns; details of these weights can be found in *The Consumer Price Index for Canada (1949=100) (Revision Based on 1957 Expenditures)*, Catalogue 62-518. A subsequent weight revision to reflect 1967 family expenditure patterns (and within the food component, 1969 detailed spending habits) was introduced in May 1973. Full details of the latest weighting pattern and other background information on the Consumer Price Index is available in the occasional paper *The Consumer Price Index for Canada (1961=100) (Revision based on 1967 Expenditures)*, Catalogue 62-539.

Le choix des matières servant au prélèvement des prix et se rapportant à des groupes tels que prix "stables", (12 matières), prix des aliments (5 matières) et prix "variables" (13 matières). Nous projetons d'établir un indice des prix industriels qui se rapportera à l'utilisation courante des matières et dont la structure se rapprochera plus du type Laspeyres plus traditionnel. L'indice publié ici renferme les prix de certaines matières qui ne sont plus considérées comme intrants importants dans l'industrie.

L'indice des prix à la consommation pour le Canada (1961 = 100)

L'indice des prix à la consommation mesure le taux de variation dans le temps du coût à l'achat d'un "panier" constant de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. Le "panier" est constitué par des biens et des services en quantité et de qualité constantes; il comprend uniquement les biens et services qui ont un prix et dont les prix peuvent être observés de façon continue.

L'indice se rapporte à un groupe vaste, mais délimité, de familles urbaines et rend compte des changements de prix auxquels ce "groupe cible" doit faire face. L'indice peut ne pas suivre de près les changements de prix touchant une famille en particulier de ce groupe, pas plus que les changements de prix touchant d'autres groupes de la population dont le revenu, la taille des familles ou les lieux de résidence diffèrent sensiblement. Le groupe cible auquel se rapporte l'indice actuel se compose de familles a) vivant dans des villes de plus de 30,000 habitants, b) dont la taille est comprise entre deux et six personnes, et c) dont les revenus annuels en 1967 étaient compris entre \$4,000 et \$12,000. Afin de mesurer les effets de changements de prix sur le coût des biens et des services achetés par ces familles, l'indice des prix à la consommation suit les mouvements de quelque 300 articles.

L'histoire des indices de prix à la consommation au Canada remonte au début des années 1900, et elle comprend des révisions périodiques des périodes de référence de base de l'indice ainsi que des schémas de pondération. En janvier 1969, on a aligné la base de temps de 1949=100 à 1961=100; d'autres renseignements figurent dans l'édition de janvier 1969 de la publication mensuelle *Prix et indices des prix* (n° 62-002 au catalogue).

De mars 1961 à avril 1973 inclusivement, les poids, ou l'importance relative des éléments de l'indice des prix à la consommation étaient basés sur les tendances de dépense des familles pour 1957; on peut trouver le détail de ces poids dans la publication *The Consumer Price Index for Canada (1949=100) (Revision based on 1957 Expenditure)*, (n° 62-518 au catalogue). En mai 1973, on a introduit une nouvelle révision des poids afin de prendre en compte les tendances de consommation des familles en 1967 (et, dans l'élément aliments, les habitudes détaillées de dépense en 1969). Le détail complet du dernier schéma de pondération et d'autres renseignements fondamentaux sur l'indice des prix à la consommation figurent dans la publication hors série *L'indice des prix à la consommation du Canada (1961=100) (Révision fondée sur les dépenses de 1967)*, (n° 62-539 au catalogue).

The Consumer Price Index for Canada Reclassified by Goods and Services

A revised supplementary classification system, entitled "The Consumer Price Index reclassified by Goods and Services", was introduced in May 1973 with the revision of the weighting pattern of the Consumer Price Index to reflect 1967 expenditures.

This supplementary classification introduces an improved framework for regrouping the items which comprise the Index. In it, all items in the C.P.I. have been reclassified into two major categories — goods and services — according to their most characteristic or dominant attribute. The goods component has been sub-divided into three categories: durable, semi-durable, and non-durable goods, according to expected average useful lifetime criteria. Services, on the other hand, have been sub-divided according to broad functional categories.

Historical series conforming to the revised classification system replace the previously published supplementary indexes and are available, with explanatory notes, for the period January 1961 to April 1973 inclusive, in *Retail Prices and Living Costs Service Bulletin*, Catalogue 62-005, Vol. 2 No. 7.

Consumer Price Indexes for Regional Cities (1961 = 100)

Consumer Price Indexes for Regional Cities are published monthly in this bulletin (Table 11). Except for their individual weighting systems, and the fact that they are based on fewer quotations, the regional city indexes are generally similar in concept and item coverage to the Consumer Price Index for Canada.

Prior to May 1973, the city indexes may have underestimated the degree of price movements occurring because the shelter component of the city indexes moved on the basis of changes in rents only, whereas changes in both rents and homeownership costs were, and continue to be, included in the Canada index. As a result of homeownership costs having increased more rapidly than rents, the housing and the all-items indexes for cities tended to underestimate somewhat the rates of price increase particularly over longer periods. From May 1973 forward, however, homeownership costs are included in the regional city consumer price indexes so that the Canada and the regional city indexes are consistent in terms of their content and treatment.

Each city index is designed to measure the influence of changes in retail prices taking place in the locality specified, upon the cost of a fixed basket of goods and services representing the level of consumption of a representative group of families in the particular area specified.

In using the city indexes, it should be remembered that *they do not in any way indicate whether price levels are higher or lower in one city than in another*. Rather, they measure, *within each city*, the percentage change in consumer prices from the base period to subsequent time periods.

L'indice des prix à la consommation au Canada reclassé par biens et services

Un système révisé de classification supplémentaire, intitulé "L'indice des prix à la consommation au Canada reclassé par biens et services", a été introduit en mai 1973 en même temps que la révision des schémas de pondération de l'indice des prix à la consommation afin de rendre compte des dépenses de 1967.

Cette classification supplémentaire regroupe dans un cadre amélioré les éléments de l'indice. En effet, tous les éléments de l'I.P.C. ont été reclassés dans deux grandes catégories, soit la catégorie des biens et celle des services, suivant leur caractère plus distinctif ou dominant. La catégorie des biens présente trois sous-catégories (biens durables, biens semi-durables, biens non durables) déterminées en fonction de la vie utile moyenne prévue. D'autre part, on a réparti les services suivant quelques grandes catégories fonctionnelles.

Les séries historiques conformes au système révisé de classification remplacent les indices supplémentaires publiés auparavant, et on peut les trouver, avec des notes explicatives, pour la période janvier 1961 - avril 1973, dans la publication "Prix de détail et coût de la vie" - Bulletin de service, n° 62-005 et catalogue, vol. 2 n° 7.

Indices des prix de la consommation dans certaines agglomérations urbaines (1961 = 100)

Ces indices sont publiés tous les mois dans la présente publication (tableau 11). À l'exception de leurs systèmes de pondération particuliers, et de ce qu'ils font appel à moins de prix, ces indices sont en général semblables par leur concept et par les éléments qui les composent à l'indice des prix à la consommation au Canada.

Avant mai 1973, les indices des agglomérations ont pu sous-estimer le degré de changement des prix, parce que l'élément logement des indices des agglomérations ne variait qu'en fonction de l'évolution des loyers, tandis que l'indice pour le Canada comprenait et ne comprend toujours que les changements de loyers et les coûts de propriété. Comme les coûts de propriété ont augmenté plus vite que les loyers, les indices du logement de l'ensemble pour les villes tendent à sous-estimer quelque peu le taux de croissance des prix, principalement sur des périodes plus longues. À partir de mai 1973, cependant, les coûts de propriété sont inclus dans les indices de prix à la consommation des agglomérations urbaines, de sorte que les indices pour le Canada et les agglomérations urbaines sont homogènes à la fois pour leur contenu et de leur traitement.

Chaque indice de ville est conçu de manière à mesurer l'effet des changements des prix de détail dans la ville en question sur les prix d'un panier constant de biens et de services représentant le niveau de consommation d'un groupe représentatif de familles dans cette ville.

Le lecteur devra toujours garder en mémoire que ces indices *n'indiquent en aucune façon si les prix sont plus élevés dans une ville que dans une autre*. Ils mesurent plutôt *dans chaque ville* le taux de variation des prix à la consommation à partir de la période de base et des périodes subséquentes.

For comparisons of retail price differentials between cities, see Table 14 of this publication and the relevant explanatory notes.

Purchasing Power of the 1961 Consumer Dollar

As consumer prices rise, the sum of money required to purchase an unchanging or equivalent quantity and quality of goods and services increases, and the amount of these items that can be purchased with a fixed sum of money decreases. Conversely, as prices fall, the amount of goods and services that can be purchased with a fixed sum of money increases. Thus, rising prices are associated with declining purchasing power of money and falling prices are associated with increasing purchasing power.

The purchasing power of the consumer dollar, in other words, bears an inverse relationship to the movement of the Consumer Price Index. For example, by January 1973, compared with their average level in 1961, consumer prices measured by the C.P.I. were 44.5% higher, so that an equivalent basket of goods and services which could be purchased for \$100.00 in 1961 would cost the consumer \$144.50 in January 1973. Each consumer dollar in January 1973, therefore, buys less than in 1961, and the amount of its reduced value can be expressed in terms of the inverse consumer price movement. Thus, in January 1973 the purchasing power of the 1961 consumer dollar declined to approximately 69 cents ($\$1.00 \times 100.0/144.5 = \0.69).

Users of the tabulation which shows the purchasing power of the 1961 consumer dollar at different points in time (Table 12) should note that, as in the case of the Consumer Price Index from which it is derived, it may not represent closely the experience of any one specific family within the large group to which the C.P.I. relates; nor should it be expected to reflect the experience of other population groups whose income, family size and place of residence are characteristically different. It should also be noted that, like the C.P.I., it is not directly affected by changes in income tax, unemployment insurance premiums and certain other security payments.

Measuring the Purchasing Power of Wages

Changing consumer price levels affect the amounts of consumer goods and services which a dollar will buy, and average wages, insofar as they are spent on such items will, of course, be affected in the same way. A wage measurement which takes the change of consumer prices into account, can be calculated by reducing actual average wages by the percentage rise in consumer price levels, or increasing them by the amount price levels fall. Wages thus adjusted may be used to indicate the comparative purchasing power of average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of average weekly wages rises from \$80.00 in week A to \$100.00 in week B, and that in the same interval a consumer price index advances from 100 to 110.0. Because of the 10% rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. On the

Pour étudier les différences de prix de détail entre les villes, il faut consulter le tableau 14 de la présente publication et les notes explicatives qui l'accompagnent.

Pouvoir d'achat du dollar de consommation 1961

À mesure que les prix à la consommation montent, la somme nécessaire à l'achat d'une quantité et d'une qualité constantes ou équivalentes de biens et de services augmente, et la quantité de ces articles qui peut être achetée avec une somme d'argent fixe diminue. Inversement, à mesure que les prix baissent, la quantité de biens et de services qui peut être achetée avec une somme d'argent constante augmente. Ainsi, la hausse des prix est liée à la baisse du pouvoir d'achat de la monnaie, et la baisse des prix est liée à la hausse du pouvoir d'achat.

Le pouvoir d'achat du dollar de consommation, en d'autres termes, évolue en raison inverse du mouvement de l'indice des prix à la consommation. Ainsi, en janvier 1973, par rapport au niveau de 1961, les prix à la consommation mesurés par l'I.P.C. avaient progressé de 44.5%, de sorte qu'un panier équivalent de biens et de services qui coûtait \$100 à l'achat en 1961 aurait coûté \$144.50 en janvier 1973 au consommateur. Par conséquent, chaque dollar de consommation en janvier 1973 achète moins qu'en 1961, et l'on peut exprimer le montant de sa valeur réduite en fonction de l'inverse du mouvement des prix à la consommation. Ainsi, en janvier 1973, le pouvoir d'achat du dollar de consommation 1961 était tombé approximativement à 69 cents ($\$1.00 \times 100.0/144.5 = \0.69).

Les utilisateurs du tableau qui indique le pouvoir d'achat du dollar de consommation de 1961 à différentes périodes (tableau 12) doivent noter que, comme dans le cas de l'indice des prix à la consommation dont il a été tiré, il peut ne pas suivre de près le cas d'une famille en particulier faisant partie du grand groupe auquel se rapporte l'I.P.C., pas plus qu'il ne rend nécessairement compte des dépenses d'autres groupes de la population dont les revenus, la taille des familles et les lieux de résidence diffèrent sensiblement. Il faut également noter que, tout comme l'I.P.C., in n'est pas touché directement par les changements de l'impôt sur le revenu, les primes d'assurance-chômage et certains autres paiements d'assistance.

Mesure du pouvoir d'achat des salaires

Les changements du niveau des prix à la consommation affectent les quantités de biens et de services de consommation qu'un dollar peut acheter, et les salaires moyens, dans la mesure où ils sont consacrés à de tels articles, seront naturellement touchés de la même façon. Une mesure des salaires qui prendrait en compte les changements de prix à la consommation peut se calculer en réduisant les salaires moyens réels du taux d'accroissement des prix à la consommation, ou en les augmentant dans une proportion égale à la baisse des prix. Les salaires ainsi ajustés peuvent servir à indiquer le pouvoir d'achat comparatif des gains moyens si les prix à la consommation et les tendances de consommation étaient restés constants. L'exemple suivant montre comment on peut procéder à un ajustement de cette nature.

Supposons qu'une série de salaires hebdomadaires moyens passe de \$80 pendant la semaine A à \$100 au cours de la semaine B, et qu'au cours de la même période un indice des prix à la consommation passe de 100 à 110. Par suite de la hausse de 10% des prix à la consommation, \$1 n'achètera pas autant au cours de

other hand, the 25% rise from \$80.00 to \$100.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$100.00 by the amount of the consumer price index increase. The adjusted average is \$90.91 $((100.0/110.0) \times 100)$, which may be referred to as a weekly wage average for week B expressed in the dollars of period A; or it may be said to indicate the level of real weekly wages relative to week A.

The foregoing calculation can be carried a step further to express, in index number form, the relationship between the week A average of \$80.00 and the week B adjusted figure of \$90.91. Assuming the week A average of \$80.00 as an index equal to 100, the week B index becomes 113.6 $((90.91/80.00) \times 100)$. Such an index may be called an index of average weekly real wages. It indicates that average wages for week B will buy 13.6% more goods and services than they did in week A, in spite of a 10% rise in consumer prices. This 13.6% increase in real wages compares with the 25% rise in money wages $((\$100.00 - \$80.00 / \$80.00) \times 100)$.

In Table 13, the index numbers of average weekly wages in manufacturing in current dollar terms (1961 = 100) are calculated by dividing the weekly wages in current dollars by the 1961 average weekly wage in current dollars and multiplying the result by one hundred. For example, the weekly wage index for September 1972 in current dollars (1961 = 100) is 196.4 $((146.23/74.45) \times 100)$. The weekly wages in 1961 dollar terms are determined by dividing the weekly wage in current dollars by the consumer price index for Canada for the month following the month to which the wages relate and multiplying the result by one hundred. Thus, the September 1972 weekly wage in 1961 dollars is \$102.98 $((146.23/142.0) \times 100)$. (The wage and the price data both refer to generally similar time periods: current wages for a particular month relate to the last pay periods in that month, while most prices for the consumer price index of the following month are collected in the first week of that month.)

The index numbers of weekly wages in 1961 dollar terms (1961 = 100) are determined by dividing the weekly wages in 1961 dollars by the base (1961) average weekly wage and multiplying the result by one hundred. For example, the September 1972 weekly wage index in 1961 dollar terms (1961 = 100) is 138.3 $((102.98/74.45) \times 100)$.

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers in manufacturing fairly well, their applicability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular population group. Group spending patterns change over periods of time. To the extent that this occurs, the wage data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be ren-

la semaine B qu'au cours de la semaine A. Par contre, la hausse de 25% (de \$80 à \$100) va surévaluer la hausse qui s'est produite dans le pouvoir d'achat des salaires hebdomadaires moyens. Cette surévaluation peut être réduite en réduisant le chiffre de \$100 du montant de l'accroissement de l'indice des prix à la consommation. La moyenne ajustée sera \$90.91 $((100.0/110.0) \times 100)$, ce que l'on peut désigner comme étant la moyenne du salaire hebdomadaire pour la semaine B exprimée en dollars de la période A; on peut aussi dire qu'elle indique le niveau réel de salaires par rapport à la semaine A.

On peut pousser ce calcul plus loin, en exprimant à l'aide d'un indice, la relation entre le salaire moyen de \$80 de la semaine A, et le salaire révisé de \$90.91 de la semaine B. En supposant que la moyenne de la semaine A soit un indice égal à 100, l'indice de la semaine B devient 113.6 $((90.91/80.00) \times 100)$. On pourrait appeler un tel indice l'indice de la rémunération hebdomadaire effective. Il indique que le salaire moyen pour la semaine B permettra aux consommateurs d'acheter pour 13.6% de plus en biens et services que pendant la semaine A, et ceci, en dépit de l'augmentation de 10% des prix à la consommation. Cette augmentation effective de 13.6% se compare à l'augmentation de 25% des salaires $((\$100.00 - \$80.00 / \$80.00) \times 100)$.

Au Tableau 13, les nombres indices des salaires hebdomadaires moyens dans les industries manufacturières en dollars courants (1961 = 100) s'obtiennent en divisant les salaires hebdomadaires en dollars courants par le salaire hebdomadaire moyen de 1961 en dollars courants et en multipliant le résultat par cent. Ainsi, l'indice des salaires hebdomadaires pour septembre 1972 exprimés en dollars courants (1961 = 100) est 196.4 $((146.23/74.45) \times 100)$. Les salaires hebdomadaires en dollars de 1961 s'obtiennent en divisant les salaires hebdomadaires en dollars courants par l'indice des prix à la consommation pour le Canada pour le mois qui suit celui auquel se rapportent les salaires, et en multipliant le quotient par cent. Ainsi, le salaire hebdomadaire de septembre 1972 exprimé en dollars de 1961 est \$102.98 $((146.23/142.0) \times 100)$. (Les données sur les salaires et les prix portent en général sur des périodes semblables: les salaires courants d'un mois donné sont généralement ceux des dernières périodes de paie du mois, alors que la plupart des prix pour l'indice des prix à la consommation du mois suivant sont recueillis au cours de la première semaine de ce mois.)

Les nombres indices des salaires hebdomadaires en dollars de 1961 (1961 = 100) s'obtiennent en divisant les salaires hebdomadaires en dollars de 1961 par les salaires hebdomadaires moyens de l'année de base (1961) et en multipliant le quotient par cent. Ainsi, l'indice des salaires hebdomadaires pour septembre 1972, exprimés en dollars de 1961 (1961 = 100), sera 138.3 $((102.98/74.45) \times 100)$.

Il convient de souligner que, même si les estimations des salaires réels moyens résument assez bien la situation d'un large éventail de travailleurs dans les industries manufacturières, elles ne peuvent être appliquées aux individus sans quelques précautions. Ainsi, le revenu d'un salarié s'écartera sensiblement de la moyenne du groupe en fonction de sa profession, de l'industrie dans laquelle il travaille, de sa situation géographique ou de son sexe. De plus, les habitudes de consommation varient considérablement d'un individu à l'autre, alors que l'indice des prix à la consommation qui sert à redresser les données sur les gains porte uniquement sur la structure moyenne de consommation d'un groupe déterminé. De même, les habitudes de consommation changent avec le temps. Ainsi, les données sur les gains rajustées par l'indice des prix à la consommation (les habitudes de consom-

ered less valid; the consumer price index weighting pattern as last revised in May 1973, and prior to that, in 1961. Furthermore, some part of income may be saved, and it could be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using an index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax and pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

The table in this report showing indexes of both actual (current dollar) and real (constant dollar) wages uses 1961 as a reference year. However, any reference period may be chosen as a base since percentage changes between any two periods will be the same regardless of the reference period selected.

Further information regarding Table 13 can be obtained from: Labour Division, Statistics Canada.

Inter-City Retail Price Comparisons

Measurements of retail price differentials prevailing between a number of Canadian urban centres previously published to reflect inter-city comparisons as of May 1965, May 1968, May 1969 and May 1971 have been revised to February 1975.

In this new series of updatings inter-city price comparisons will be drawn for goods and services comprising most of the budget on which the Consumer Price Index for Canada is currently based.

Table 14 presents the first five components of goods and services to be updated in this series. Price indexes for additional budget elements will be published on a component-by-component basis as each stage of these results becomes available. The data base for this study was the wide range of retail price quotations collected in the course of production of the national Consumer Price Index in addition to supplementary information gathered in a special program of pricing undertaken for publication of City Average Retail Prices (1).

(1) Retail Prices and Living Costs Service Bulletin, Vol. 4, No. 2, February, 1975.

mation étant supposées "fixes") perdront graduellement de leur valeur; le schéma de pondération de l'indice des prix à la consommation a été révisé pour la dernière fois en mai 1973, et avant cela, en 1961. De plus, il ne faut pas oublier qu'une partie du revenu peut être épargnée et qu'il serait faux de recalculer cette épargne en dollars constants à partir d'un indice qui se rapporte à des habitudes de consommation.

De même, il faut se rappeler que l'évaluation des variations des gains effectifs calculées à partir de moyennes effectives peut différer de l'évaluation des variations du pouvoir d'achat du revenu disponible en raison de facteurs tels que l'évolution de l'impôt sur le revenu des particuliers et des retenues destinées à l'assurance sociale, aux régimes de pensions, etc. Ainsi, l'indice de la rémunération effective ne sert pas à mesurer les variations des niveaux de consommation des salariés ou de leurs familles, mais plutôt à montrer les tendances du pouvoir d'achat des salariés par rapport aux articles contenus dans l'indice; enfin, l'indice ne prend pas en compte les autres revenus des familles (tels que les allocations familiales) ou les variations de l'épargne des familles.

La période de référence du tableau qui présente les salaires tant réels (en dollars courants) qu'effectifs (en dollars constants) prend pour base l'année 1961. En fait, on peut choisir n'importe quelle période de référence comme base, puisque les taux de variation entre deux périodes seront les mêmes quelle que soit la période de référence choisie.

On peut obtenir plus de renseignements sur le tableau 13 en s'adressant à la Division du travail, Statistique Canada.

Comparaisons entre les prix de détail d'une ville à l'autre

Les mesures de la disparité des prix de détail qu'on observe dans un certain nombre de centres urbains du Canada, déjà publiées afin de donner les comparaisons entre les villes aux mois de mai 1965, mai 1968, mai 1969 et mai 1971 ont été révisées en février 1975.

Les nouvelles séries de mises à jour seront faites pour la plupart des biens et services servant actuellement à établir l'indice des prix à la consommation du Canada.

On trouvera au tableau 14, les résultats de la mise à jour des cinq premières composantes. Pour ce qui est des autres éléments du budget à la consommation, on publiera des indices de prix différentiels, composante par composante, au fur et à mesure que les résultats d'enquête seront disponibles. Les données de base pour cette étude ont été constituées par l'importante collection recueillie pour la production de l'indice national des prix à la consommation en plus de l'information supplémentaire obtenue dans le cadre d'un programme spécial de relevé des prix, dont les résultats permettent de publier les prix de détail moyens par ville(1).

(1) Bulletin de Service; Prix de détail et Coût de la Vie, Vol. 4, No. 2, février 1975.

As previously, to facilitate price comparability between locations, differential price measurements are derived between separate pairs of cities in geographic proximity to each other. Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names wherever possible, and also having regard for comparability of retail outlets and merchandising practises. By means of a linking procedure, paired city indexes are initially related to a common base city and subsequently compared with a weighted average of the combined 11 cities equalling 100. This is a departure from previous such studies which were based on Winnipeg price levels equalling 100. Item price relationships are aggregated by application of the 1967 combined cities weighting diagram updated for price change to February 1975.

Further information regarding Table 14 can be obtained from: Comparative Living Costs Section, Prices Division, Statistics Canada.

Farm Input Price Indexes (1961 = 100)

Farm Input Price Indexes measure, through time, changes in prices of commodities and services used in Canadian farming operations. The item content and weights are based on data from the 1958 Farm Income and Expenditure Survey, the most recent source of sufficiently detailed data. These data have been modified to reflect 1961 prices and conditions. Farm Input Price Indexes are calculated quarterly for Eastern, Western and all Canada on a 1961 = 100 time base.

Farm Input Price Indexes replace one of the two major component indexes of the previously published series, Price Index Numbers of Commodities and Services used by Farmers, 1935-39 = 100. The latter index was composed of a Farm Family Living Index and a Composite Index Exclusive of Living Component. The Farm Input Price Indexes replaces the Composite Index Exclusive of Living Component from 1961 forward.

A detailed description of concepts, methods and data sources is contained in the occasional paper, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-534, and is reproduced in the September 1971 issue of *Prices and Price Indexes*, Catalogue 62-002. The foregoing publications also contain total and component price indexes for Eastern, Western, and all Canada, from 1961 to and including the third quarter 1971.

Current price indexes will be published on a regular basis in the quarterly publication, *Farm Input Price Indexes, 1961 = 100*, Catalogue 62-004, and in the monthly publication *Prices and Price Indexes*, Catalogue 62-002.

The Farm Family Living component of the 1935-39 series has not been replaced by an updated counterparts, and publication has been suspended.

Comme par le passé, afin de faciliter la comparaison de prix entre les différents endroits, les mesures différentielles de prix ont été calculées séparément pour des paires de villes géographiquement proches. A l'intérieur de chaque paire de villes, les prix ont été assortis au niveau de l'article, c'est-à-dire en s'assurant que les spécifications étaient semblables, y compris la marque lorsque cela était possible, et aussi en tenant compte de la similitude des points de vente au détail et des méthodes de vente. En utilisant la méthode de couplage, les indices couplés des villes ont d'abord été reliés à une ville de base commune, puis comparés à une moyenne pondérée (la combinaison de 11 villes étant égale à 100). Cette méthode constitue une différence entre cette étude et les études précédentes qui posaient le niveau des prix de Winnipeg comme étant égal à 100. Les relations de prix des articles ont été regroupées en appliquant le schéma de la pondération de 1967 des villes combinées mis à jour en fonction des variations de prix observées en février 1975.

De plus amples renseignements concernant le tableau 14 peuvent être obtenus de: la Section des coûts comparatifs de la vie, Division des Prix, Statistique Canada.

Indices de prix des entrées dans l'agriculture (1961 = 100)

Les indices de prix des entrées dans l'agriculture mesurent l'évolution dans le temps du prix des produits et des services utilisés dans l'exploitation agricole au Canada. Les articles qui sont compris, ainsi que leurs poids, sont fondés sur l'enquête de 1958 sur les revenus et les dépenses des agriculteurs, qui constitue la source la plus récente dont les données soient suffisamment détaillées. Ces données ont été adaptées de manière à rendre compte des prix et des conditions constatées pour 1961. Les indices des prix des entrées dans l'agriculture sont calculés chaque trimestre pour l'Est, l'Ouest et l'ensemble du Canada sur la base 1961 = 100.

Les indices des prix des entrées dans l'agriculture remplacent l'un des deux principaux éléments d'indices de la série précédente sur l'indice de prix des produits et services utilisés par les agriculteurs, (1935-39 = 100). Cet indice comprenait l'indice du coût de la vie pour les familles agricoles et l'indice synthétique sans le coût de la vie. Les indices des prix des entrées dans l'agriculture remplacent l'indice synthétique sans le coût de la vie à partir de 1961.

Le bulletin hors série *Farm Input Price Indexes, 1961 = 100* (n° 62-534 au catalogue) contient une description détaillée des concepts, des méthodes et des sources de données qui est reprise dans *Prices and Price Indexes* de septembre 1971 (n° 62-002 au catalogue). Ces deux bulletins contiennent également les indices des prix totaux et partiels pour l'Est et l'Ouest du Canada et pour l'ensemble du Canada, de 1961 au troisième trimestre de 1971 inclusivement.

Les indices des prix en cours seront publiés régulièrement dans le bulletin trimestriel *Farm Input Price Indexes, 1961 = 100* (n° 62-004 au catalogue) et dans le bulletin annuel *Prices and Price Indexes* (n° 62-002 au catalogue).

On n'a pas remplacé l'indice du coût de la vie pour la famille agricole des séries de 1935-39 par un équivalent à jour et on a cessé de la publier.

Security Price Indexes

Revised security price indexes on the base 1971 = 100 were presented for the first time in the May 1975 issue of this publication. The revision constitutes changes in the composition and method of calculation of the indexes as well as a shift in the price reference base from 1961 to 1971.

Security price indexes measure through time the effect of price change on the value of a portfolio of stocks bought and held for investment purposes. The portfolio represents stocks of Canadian companies listed on at least one Canadian exchange. The number of shares held for each issue is in proportion to the total number of shares outstanding as of January 1 of each year.

The indexes are calculated using the Laspeyres index formula. Prices for the weekly common stock indexes are the daily closing quotations from the exchange with the highest volume for each stock, averaged over the number of trading days in the particular week. For preferred stock, prices used are the monthly weighted averages of daily closing quotations in which the weights are the daily total sales. Index weighting at the group and sub-group level are based on the average yearly volume of shares traded over the period 1971-1974.

The stocks included in the indexes are classified according to the Standard Industrial Classification (revised 1970). Two new sub-groups have been established as part of the Investors Index: Radio and Television Broadcasting has been added to Utilities while Insurance has been added to the Finance group. The order of the sub-groups has been slightly rearranged and two sub-groups (Alcoholic Beverages and Trade) have undergone minor name changes.

Price Indexes of Machinery and Equipment

In response to the need of users wishing either to correct expenditure data of machinery and equipment for price change or to make comparison of commodity movement, a system of machinery and equipment indexes has been under development for a number of years. This is a system of industry indexes relating to types of equipment purchases made by establishments belonging to industries as defined by the 1960 Standard Industrial Classification.

The base-weighted indexes give an estimate of how much more, or less, it would cost today to purchase a group of machines specified for a particular base period.

The interim time base for the indexes is 1968 = 100. Most of the data from which weighting patterns were derived came from 1968 or nearby years. Such data were usually supplied by major purchasers.

Conceptually purchasers' prices should be utilized in the indexes but because of a number of practical problems, manufacturers' selling prices were usually used. Such prices are then corrected as relevant for duty, exchange and general sales tax.

Indices des cours des valeurs mobilières

Les indices révisés des cours des valeurs mobilières sur la base 1971 = 100 ont été présentés pour la première fois dans le numéro de mai 1975 de cette publication. Cette révision comporte des changements à la composition et à la méthode de calcul des indices. Par ailleurs, la base de référence des prix 1961 a été changée en celle de 1971.

Les indices des cours des valeurs mobilières mesurent dans le temps les effets du mouvement des prix sur les valeurs d'un portefeuille d'actions achetées et détenues aux fins de placement. Ce portefeuille comprend des actions de sociétés canadiennes cotées à au moins une bourse du Canada. Le nombre d'actions détenues pour chaque émission est proportionnel au nombre total d'actions en circulation au 1er janvier de chaque année.

Les indices sont calculés d'après la formule de Laspeyres. Les prix servant au calcul des indices hebdomadaires sont les cours quotidiens de clôture pour la bourse où le volume des transactions est le plus élevé pour chaque titre. Ils sont ensuite mis en moyenne selon le nombre de jours ouvrables d'une semaine déterminée. En ce qui concerne les actions privilégiées, les prix utilisés sont les moyennes mensuelles pondérées des cours quotidiens de clôture dans lesquels les pondérations sont les ventes totales quotidiennes. Les pondérations des groupes principaux et des sous-groupes sont basées sur le volume annuel moyen de titres vendus au cours de la période 1971-1974.

Les actions faisant partie des indices sont classés selon la Classification des activités économiques de 1970. Deux nouveaux sous-groupes ont été créés en tant que partie de l'indice des cours des actions ordinaires: la radiodiffusion et la télédiffusion ont été ajoutées aux services tandis que les assurances ont été ajoutées au groupe des finances. Par ailleurs, l'ordre des sous-groupes a été modifié et le nom de deux d'entre eux (boissons alcooliques et commerce) a été changé.

Indices des prix des machines et du matériel

Afin de répondre au besoin des utilisateurs qui désirent réviser les données sur les dépenses en machines et en matériel en fonction des changements de prix ou établir une comparaison du mouvement des marchandises, on prépare depuis un certain nombre d'années un système d'indices des prix des machines et du matériel. Il s'agit d'un système d'indices par industrie ayant trait aux genres d'achats de matériel des établissements qui font partie des industries définies dans la Classification type des industries de 1960.

Les indices pondérés en fonction de la base donnent une estimation de la différence du prix d'achat d'un groupe de machines déterminé pour une période de base donnée.

La base provisoire pour les indices est 1968 = 100. La plupart des données dont on a extrait les facteurs de pondération dataient de 1968 environ. D'habitude, ces données étaient fournies par les principaux acheteurs.

Du point de vue conceptuel, on devrait utiliser les prix des acheteurs dans ce genre d'indices, mais on a habituellement employé les prix de vente de fabricants pour des questions d'ordre pratique. On a ensuite apporté à ces prix les corrections appropriées pour les droits de douane, le change et la taxe de vente fédérale.

Foreign prices utilized in the index are either U.S. Bureau of Labour Statistics commodity indexes or Prices Division collections from manufacturers most of whom reside in the United States.

The first industry index was released mid-1971 and related to purchases by the construction industry. Indexes for other industries will be released from time to time as they become available. In the interim preliminary indexes for a number of other industries are available on request. Certain commodity indexes which exclude adjustments for exchange, duty and federal sales tax can also be provided on request.

Les prix étrangers utilisés dans l'indice sont les indices de prix des marchandises du *U.S. Bureau of Labour Statistics* ou ceux que la Division des prix a recueillis auprès des fabricants dont la majorité réside aux États-Unis.

Le premier indice par industrie a été publié au milieu de 1971; il se rapporte aux achats de l'industrie de la construction. Les indices des autres industries seront publiés de temps à autre à mesure qu'ils seront disponibles. En attendant, on peut obtenir sur demande les indices préliminaires pour un certain nombre d'autres industries. Il en est de même pour certains indices de prix de marchandises, compte non tenu des ajustements pour le change, les droits de douane et la taxe de vente fédérale.
